CHEAP COLLECTIONS

Offered to Introduce Our Stock

No discount will be allowed on the following collections, except that we will pay the express charges if the sum of the order amounts to \$5 or more. All goods will be first-class, and not cheap in the sense of inferiority. Order by collection number only. Do not name the articles.

Our \$5 Fruit Collections

Collection No. 1. For \$5 we will send 2 Belle of Georgia, 2 Arp Beauty, 2 Slappey, 2 Hobson, 2 Guinn, 2 Texas King Peaches and 1 Red October, 2 Eagle, 2 Climax and 1 Happiness Plums.

Collection No. 2. For \$5 we will send 1 each of Admiral Dewey, Hobson, Matthews' Beauty, Gov. Lanham, Carman and Chilow Peaches; 1 each of Red October, Eagle, Gonzales, Wickson, Doris and Climax Plums; 1 San Jacinto Apple; 2 Crabs.

Collection No. 3. For \$5 we will send 12 Peaches (small), 6 Apples (small), 6 Plums, 3 Pears, 3 Apricots, 12 Grapes, 12 Blackberries, 12 Mayes' Dewberries.

Fruit and Flower Collections for \$2.50

Collection No. 4. For \$2.50 we will send 2 Gov. Hogg, 2 Matthews' Beauty, 2 Guinn, 2 Jessie Kerr, 2 Carman and 2 Chilow Peaches.

Collection No. 5. For \$2.50 we will send 2 Red October, 2 Eagle, 2 Botan, 2 Roulette and 2 Wickson Plums.

Collection No. 6. For \$2.50 we will send 1 Admiral Dewey, 1 Belle of Georgia, and 1 Chilow Peach; 1 Eagle, 1 Doris, 1 Roulette Plum; 1 San Jacinto Apple.

Collection No. 7. For \$2.50 we will send 12 Chrysanthemums (all named and of the best varieties), 12 Roses (all named and of the best varieties), 12 Geraniums (of the best varieties), 12 Coleus (of the best varieties), 6 Verbenas (of the best varieties), 6 Carnations (all named and of the best varieties), 6 Violets, 6 Gladiolus, 1 Hibiscus, 1 Heliotrope, 1 Lantana, 1 Salvia and 1 Trifoliata Orange.

The above Seven Collections must go by Express

Our 50-Cent Collections—Grand Values for 50 Cents

COLLECTION

No. 8—50 cts. 6 Everblooming Roses.
No. 9—50 cts. 12 Chrysanthemums.
No. 10—50 cts. 12 Coleus.
No. 11—50 cts. 12 Verbenas.
No. 12—50 cts. 16 Pansies.
No. 13—50 cts. 10 Double Geraniums.
No. 14—50 cts. 10 Single Geraniums.

COLLECTION

No. 15—50 cts. 10 Carnations.
No. 16—50 cts. 10 Choice Basket or Vase Plants.
No. 17—50 cts. 6 Grape-vines.
No. 20—50 cts. 6 Rosedale Hybrids. Our new evergreen.

The above may go by Mail or Express

These collections are sold so cheap that they cannot be included in the clubbing rates. The choice of varieties must invariably be left to us.

Special Rates to Customers and Club Raisers

Purchaser's Choice from Catalogue

For a remittance of \$2 you may select plants (not trees or seeds) priced at	\$2.30
For a remittance of \$3 you may select plants (not trees or seeds) priced at	3.60
For a remittance of \$4 you may select plants (not trees or seeds) priced at	4.80
For a remittance of \$5 you may select plants (not trees or seeds) priced at	6.00
For a remittance of \$8 you may select plants (not trees or seeds) priced at	10.00
For a remittance of \$10 you may select plants (not trees or seeds) priced at	13.00
For a remittance of \$15 you may select plants (not trees or seeds) priced at	20.00
For a remittance of \$20 you may select plants (not trees or seeds) priced at	26.00

Above rates apply on Plants only. We do not allow discounts on Trees, Seeds, etc.

Address

BAKER BROS.

Fort Worth, Texas

Cut-Flower Department

OUR trade in Cut-Flowers has grown so rapidly of late that we have been compelled to greatly increase our facilities for growing and handling them. We ship everywhere, and can pack flowers to arrive in good condition anywhere in the United States. We furnish them for weddings, receptions, banquets, table and mantel decorations, funerals, the sick, presents to friends, school commencements, Decoration Day, etc.

Frequently our friends are undecided as to what to order, or they may order flowers that are not in season, or sometimes they order kinds that will not keep well. It is frequently better for the customer to write us what the flowers are to be used for, and state the amount of money to be expended, and then leave the selection to us. In nearly every case we can give better satisfaction than if we are restricted in what we send. Prices vary according to season, and it is impossible to give fixed prices here. They usually cost about twice as much at Christmas, Easter and Decoration Day as on other occasions. In ordering funeral designs always state the amount you wish to pay, and we will send you as large and handsome pieces as we can afford for the money. If undecided what to order, we will make the selection for you. We cannot recall any instance where we have failed to please. If ordered by telegraph or telephone, flowers will be shipped C. O. D. When convenient to do so, it is much better to order by telephone. We have four phones and can be reached at any time, night or day. During business hours call for the store, Phone No. 23 ; at other times call for Mr. Pool, manager Cut-Flower department, Phone No. 372.

No order accepted for Cut-Flowers for less than \$1

APPROXIMATE PRICES

Sheaf of Wheat, with Roses. Tied with ribbon, \$4, \$5, \$7, \$10.

White Doves. Natural stuffed; used on many designs. Per quality. \$2, \$2.50 to \$3 each.

Catalogue for 1905

We are grateful to our friends for the liberal patronage of last year, and especially for the many kind letters they wrote us, telling how they were pleased with our treatment of them, or with the goods we sold them. We are always glad to open a letter and find money in it, but we are gladder still to know that our customer is pleased. We know that a pleased customer is the best advertisement we can have, and it is our purpose to please every one, and this we generally succeed in doing if we are only given a chance. The customer that we cannot please is the one that makes his complaint to some one else and not to us. If the complaint is made to us, we can in ninety-nine cases out of one hundred make everything satisfactory. All we ask is that our customers be patient and give us a chance. The fault is not always ours. We receive a great many letters with no names or no post-office given. We have letters in our possession now that were sent us last year, without name or address. They contained money or stamps, and yet we had no way of identifying the sender. With the beginning of 1905 we are entering upon our twenty-first year in business in Fort Worth. It is very gratifying to note that each year's business has been better than that of the preceding year, and we confidently expect the trade of 1905 to be the best in our history. The good crops and good prices of 1904 are sure to cause a marked stimulation in business of all lines.

We have a good stock of trees—in some respects the best we have ever grown. We know our assortment of roses is the best we have ever had. Our seed department has increased very much, especially in heavy field seeds, and the new department lately added, namely, incubators and poultry supplies, has grown far beyond our expectations. Incubators have proved a real success, and poultry raising is not so much of an experiment as it was a year or two ago, but has become one of the most extensive and profitable industries in the land.

We advise our friends to send in their orders early, before the assortment is broken. Toward the close of the season we cannot always furnish everything quoted in this catalogue, but if the order is given early we will set the goods aside and hold them for late shipment if desired. Parties desiring to set out large orchards should correspond with us and get our special prices.

ABOUT SHIPPING, ETC.

NURSERY STOCK should be shipped by express. Large orders may go by freight, but, as we get specially low rates from the express companies, it is almost as cheap, and much quicker and safer to ship in this way.

SEEDS in packets by mail, in bulk by express. **PLANTS** by mail or express. Small orders for plants may be sent safely by mail. This is by far the best way for post-offices not on the railroad. Whenever it is convenient to do so, it is much better to have plants sent by express. We can send larger plants, better packed, and with dirt on the roots, and they are usually delivered much quicker and safer by express than by mail. That our customers may have these advantages without any additional expense,

WE will deliver by express, charges prepaid, to any railroad town in Texas and Indian and Oklahoma Territories, all orders for trees and plants amounting to \$5.00 or more. To receive this advantage, cash must in all cases accompany the order.

This liberal offer does not apply to plants in pots, hanging baskets, etc., nor when plants and trees are included in the same order. It must be for at least \$5 worth of trees, or at least \$5 worth of plants, as they must be packed separately. Nor does it apply to seeds and bulbs. In no case do we pay the express charges where special prices are quoted by letter, unless we should so agree in the letter. Some of our friends have so misunderstood these conditions as to expect us to prepay express charges on potatoes, corn and other heavy articles.

TERMS, Cash with Order. We decline to ship C. O. D. unless a partial remittance be made with the order.

Baker Brothers, Fort Worth, Texas

Please remember to write your name, post-office and state distinctly. If you should fail to hear from us within a week, please write us again, as we sometimes get orders from people who forget to sign their names or give their post-offices.

Remittance should be made by Express or Post Office Money Order, or by Draft on Fort Worth. Do not send checks on local banks, as it costs 10 to 25 cents each to collect them.

REFERENCES: American National Bank, the commercial agencies, or any other business firm in the city.

Please write the order legibly, and apart from the body of the letter. Use our order sheet.

CHEAP EXPRESS RATES

While we ship thousands of plants by mail, and can do it as well, perhaps, as any firm, we would strongly urge all our customers living on the railroad in Texas or Indian or Oklahoma Territories to have their plants shipped by express. As above stated, we can send larger and better plants, etc. Another advantage is that the *express companies have allowed a reduction of 20 per cent*, so that the cost of shipping is small—not often over 25 or 30 cents. That the purchaser shall not lose this entirely, we always send enough plants gratis to pay the charges. As has been our custom, we prepay the charges on all orders of \$5 and over.

If Plants Perish in Transit, the Loss is Ours. Sometimes by unavoidable accident plants perish on the road. *If promptly notified of the fact by return mail*, and a list of the respective plants be sent us, we will duplicate them at once. We always try to do even better than we promise or than fair dealing requires. *Our prosperity depends upon your receiving satisfaction.*

OUR RESPONSIBILITY

We guarantee plants and seeds to reach their destination in a live, growing condition, but when we have done this our responsibility ceases, because we know that if they receive proper care they will grow nicely. Many plants die from careless treatment and neglect; in such cases we cannot and should not be expected to replace them.

OUR GUARANTEE. We give no guarantee with our seeds. We warrant our plants and trees to be true to name, and to be delivered in good condition. When we plant trees and charge additional, we guarantee them to make a start to grow. The money is due as soon as the work is done, and we replace only such trees as failed to make a start. If goods are not desired on these terms, they must be returned at once.

NO AGENTS. We have no traveling agents, and any one representing himself as such does so without authority. We have been greatly annoyed by men, and especially by one man of our own name, who pretend to be selling our goods. They usually order a few trees or plants from us, as any one may, and then buy a lot of inferior stock from other nurseries, which they deliver as ours, showing the shipping tag as addressed to them from us. We warn our customers against such people. Of course this does not apply to persons who wish to raise clubs among their own friends.

CAUTION. We wish our customers would, in every case, keep a copy of their orders, and verify them on arrival of plants; this will prevent mistakes as to what they thought they ordered, but which was never written upon their order sheet. If not too much trouble, please drop us a card on arrival of the goods. We are glad to know when you are pleased, and we wish to know of any dissatisfaction, that we may make it right.

ERRORS—we make them—so does every one, and we will cheerfully correct them, if you will write to us. Try to write to us good-naturedly; but, if you cannot, then write anyhow. Do not let an error pass or complain to your neighbor about it; he cannot correct it. We want an early opportunity to make right any of our mistakes that may occur.

INVITATION. We are always glad to have our out-of-town friends visit our **Office and Seed Store, 415 Houston Street**, or our **Nursery and Greenhouses at Riverside**, one and three-quarter miles east of the court-house. *We have a telephone at each place*, and for people living within fifty miles of Fort Worth, this is often the most satisfactory way of ordering.

BAKER BROS.

FORT WORTH, TEXAS

Choice Fruits for Texas

PLANTING DIRECTIONS

The soil should be thoroughly plowed, the deeper the better. Dig large holes, so that the tree-roots will not be cramped; set the trees a little deeper in the ground than they grew in the nursery, and fill in the holes with good, rich soil, but no manure. When the roots are covered with earth, pour in a bucketful of water, and when this has disappeared fill the holes, pressing the earth firmly with the foot and leaving it, when finished, lower next to the tree, that the water during showers may gather in toward the roots of the tree or plant. When trees are received, keep the roots covered with something moist till you are ready to plant them. Do not fail to cut off at least half of last year's growth. A peach tree, for instance, that is 5 feet high when received should be cut back to a straight stock $2\frac{1}{2}$ feet high. It will then branch out and make better growth and shape than if not pruned at all.

CARE OF TREES

The one chief thing that we wish to urge upon our friends is to cultivate their trees. More failures occur from the lack of cultivation than from all other causes together. You may just as well expect to raise good corn or cotton without cultivation as good fruit. It is plowing and hoeing your trees need, and not so much rain. Of the hundreds of thousands of trees we have grown, we have never watered one, and yet we always have good trees. It is well to cultivate some small crop in your orchard: melons, vegetables, sweet potatoes, or even cotton, but not corn; and never, on any account, sow oats, wheat, etc., among your trees, as is often done by planters anxious to utilize every inch of land.

PEACHES

We have made a close study of Peaches for Texas for more than twenty years, and so feel confident, in offering the following list, that it contains the cream of the hundreds of varieties now grown. Still, improvements are being made every year, and it is necessary to test new varieties as they are offered. This is one of the duties of the nurseryman, — to test all and recommend only such varieties as have special merit. The average planter, however, is not willing to wait two or three years before planting some valuable novelty he has heard of, but wishes to do a little testing himself. For this reason we offer below, and all through our Catalogue, some trees that we have not tested, but which we believe are decided acquisitions. The descriptions, of course, are borrowed; but, in most cases, are those given by the originators. In ordinary soil set the trees 14 to 16 feet apart each way. In very rich soil they require more room.

To secure healthy, vigorous and fruitful trees and fine fruit, the following points must be well attended to in Peach culture: (1) Keep the ground clean and mellow around the tree, and give it an occasional dressing of wood ashes. (2) Keep the head low; the trunk ought not to exceed 3 feet in height. (3) Attend regularly every spring to pruning and shortening the shoots of the previous year's growth. This keeps the head round, full and well furnished with bearing wood. Cut weak shoots back about one-half and strong ones one-third; but see that you have a sufficient supply of fruit-buds. Sickly and superfluous shoots should be cut out. It should always be borne in mind that the fruit is produced on wood of the last season's growth, and hence the necessity for keeping up a good supply of vigorous annual shoots all over the tree.

In planting Peaches, it is of the highest importance to cut back the trees severely. The stem should be reduced about one-half and the side branches cut back to one bud. Most failures in newly planted orchards may be ascribed to a non-observance of these directions. Late Peaches should be planted in moist soil.

We cannot too much emphasize the fact that Texas-grown Peach trees are most likely to succeed on Texas soil, and that it is a mistake to order stock from a distance, risking the dangers and delays of long transportation and acclimatizing, when as good stock, all ready to grow off healthy and free, may be purchased with less expense near by.

NEW PEACHES OF SPECIAL MERIT

Belle of Georgia. The largest Peach tree grower in the world, who grows four millions of peach trees a year, tells us that his favorite Peach is the Belle of Georgia. He says, besides its being large, showy and productive, its flavor is beyond comparison. On his recommendation and that of other

leading nurserymen, where it is known, we are offering it to our trade before testing it ourselves. We are planting it largely ourselves in our own orchard. Very large; skin white, with red cheek; flesh white, firm and of excellent flavor; fruit uniformly large and showy; free. Rapid grower, prolific. July 1 to 15. 50 cts. each, \$5 per doz.

SLAPPEY PEACH.

when only two years old. They are as large as the very largest Elberta, and the yellow and red is even brighter than the shadings on the Elberta. It ripens with Elberta, but is a cling, and the yellow flesh is very firm and will ship to any market. It originated from seed right here in Austin. I have never taken greater pleasure in introducing any new fruit." \$1.

Arp Beauty. East Texas is one of the best Peach-growing districts in the world. Thousands of acres are being planted to Elbertas there. Arp Beauty now comes forward as a rival to Elberta, and is being planted there as fast as trees can be propagated. It is claimed to be the same size, color, quality and character of Elberta and three or four weeks earlier. The value of this as a market or family Peach will be easily seen, and no other statement will be necessary to place it at the head of the list of good Peaches. 50 cts. each, \$5 per doz.

Philip Horton. Another East Texas Peach that is being planted extensively and is probably the best late Peach grown. Very large, some specimens weighing nearly a pound; yellow, fine flavor, and the tree is enormously productive. Col. Bonner, the introducer, says the parent tree has borne as many as eight bushels of fine fruit in one season. 50 cts. ea., \$5 per doz.

Slappy. We were surprised last June to notice on the northern markets a remarkably large and handsome yellow freestone Peach, such as heretofore we had seen only in August or the last of July. We found this to be the Slappy, a new Peach from Georgia, and so have procured some of the trees to offer to our customers. We believe in the Peach, and shall plant largely in

Guinn. East Texas, with Cherokee county as the center, is probably the best Peach country in the world. Yet the growers there who have tested most of the varieties in cultivation, grow only a few varieties. Next to Elberta, Mamie Ross and Arp Beauty, they are beginning to plant all they can grow of the Guinn, a native seedling of that section, which is of large size, and becomes a very bright red color long before it is ripe, putting it in condition for shipping before it is soft. It ripens between Alexander and Elberta. 50c. each, \$5 per doz.

Governor Latham. Introduced by F. T. Ramsey, of Austin, who says of it: "This is one of the most beautiful and one of the very largest Peaches I have ever seen. The trees bear full of extra large Peaches

PHILIP HORTON.

our own orchard. Herewith we give the description as we receive it: "The earliest and handsomest freestone Peach grown; ripens at a season when the market is bare of good Peaches; a thrifty grower; very hardy and prolific, excellent flavor, splendid keeping qualities, free of excessive rot usually caused by too much rain; no better shipper yet introduced; ripens thoroughly to the seed; very sweet, yellow flesh; color, a clear golden yellow with dark shades; a beauty. The secret of successful Peach-growing depends upon the selection of varieties for planting. The Slappey ripens from June 15 to July 1; is over and your money made before the general crop comes." Best Peach of its season; free. 50 cts. each, \$5 per doz.

Weaver. Another native Peach introduced by Mr. Ramsey, who says that during the nine years he has known it, it has not failed to bear. A yellow cling over-spread with red, often measuring nine and ten inches; flesh very yellow and very firm; of very best quality. Sept. 1 to 15. He sold 3,000 trees to Mr. Falkner, the great fruit-grower of Waco, who says it has paid him more per tree than any other Peach. 50 cts. each, \$5 per doz.

Texas King. Another fine Peach from East Texas, where only the very best Peaches are given any room. It is of the Mamie Ross type, but of better quality. The hardiest in the bud of any yet recorded, making it a very sure bearer. As large and well colored as the Carman. 25 cts. each, \$2.50 per doz.

Hobson Cling. Large, white, sweet, rich, firm, cling; hardy, vigorous, prolific; equal to Oldmixon Cling, but ripe in June. One of the best of all Peaches. 25 cts.

Admiral Dewey. A new Peach, having all the good qualities of the Triumph and none of its defects. Its claims for preëminence are early maturity (it ripens with Triumph), early and abundant bearing, vigorous, symmetrical growth, hardy wood and fruit-buds; flesh uniformly yellow to the stone, from which it parts perfectly free, bright yellow color with lively red blush, and fine size (as large as Triumph). The quality is very fine, being more like a midsummer than a June Peach. It will supersede all the old June Peaches for market and home use. 25 cts. each, \$2.50 per doz.

Matthews' Beauty. This is becoming so popular as a successor to Elberta that we have secured some of the stock. In the section where it originated, a noted fruit man says it is the

most valuable succession to Elberta so far introduced. In comparison it is a size larger and far superior in quality, while its bearing and shipping qualities are just as good. Its season of ripening is three weeks later than Elberta. Skin golden yellow, streaked with red; flesh yellow, firm and of excellent flavor; perfect freestone. The original tree of Matthews' Beauty has been in bearing for eight years and missed but one crop in that time, keeping up its high standard one year with another. 25 cts. each, \$2.50 per doz.

White Indian Cling. A white Peach of the Indian type. Medium size, very abundant bearer of very best flavor, and one of the surest bearers in cultivation, as the parent tree has borne almost every year for about twenty years. 50 cts. each, \$5 per doz.

Chilow (Elberta Cling). A seedling of Chinese Cling, but, like Elberta, shows a little Persian blood. The fruit is as large as Elberta, rich yellow, shaded on one side with soft red, and is remarkable for uniformity of size. Many varieties in the orchard bore nothing last summer, but the crop on this tree drove away the last doubt about its value on all scores, and especially productiveness. While leathery enough to ship long distances, it is not tough. July. 35 cts. each, \$3.50 per doz.

ARP BEAUTY PEACH.

CHILOW.

STANDARD LIST OF PEACHES

	PRICE	Each	Per doz.	100
2 to 3 feet		\$0 10	\$1 00	\$7 50
4 to 5 feet		20	2 00	12 00
Extra large		35	3 50	

JESSIE KERR.

Alexander. Above medium; highly colored; flesh greenish white, very juicy, vinous and of good quality. Matures from May 25 to June 10 in Fort Worth.

Amelia. Very large, white, nearly covered with crimson; highly flavored; one of the best. July 5 to 15.

Carman. A standard Peach of the Mamie Ross type and similar to it in appearance and time of ripening.

Crawford's Late. Fruit of the largest size; skin yellow or greenish yellow, with deep red cheek; flesh yellow; productive; one of the best; free.

Chinese Cling. Very large, specimens often measuring 14 inches in circumference. Usually a shy bearer, but of superior richness and flavor.

Crawford's Early. Large; yellow, with red cheek flesh yellow, juicy and rich; very productive; a standard market variety, and a very fine Peach. July 1 to 10.

Early Rivers. Pale straw, with delicate pink cheek; one of our finest Peaches for home use, but it is too tender to ship long distances. June 10 to 20.

Elberta. The most popular Peach ever grown. In many places there are more Elbertas planted than all other varieties combined. Large, yellow, juicy, high flavored, and a good shipper. In fact, it possesses all the good qualities that could be wished for in the Peach.

Family Favorite. Large, juicy, white flesh, red cheek; free; sure; prolific; seedling of Chinese Cling. Is making a most favorable record in many sections.

Fleitas (Yellow St. John). Large, rounded; rich orange-yellow, with deep red cheek; juicy, sweet and high flavored; flesh yellow; free. Ripens with Early Tillottson, and lasts longer. July 1.

General Lee. Above medium; oblong; creamy white, with carmine wash; flesh very fine-grained; melting, very juicy and of high flavor; quality best. Cling. July 5 to 20.

Greensboro. Originated in Greensboro, N. C., and is a worthy production of the "Old North State." The largest of the early Peaches (nearly twice the size of Alexander); white flesh, very juicy. In appearance it is far ahead of the other early varieties; highly colored, bright red over yellow.

Governor Hogg. It is one of the very largest Peaches grown; white, nearly covered with red; the first clingstone of the season to ripen; quality the very best; ripens June 10 to 15.

Heath Cling. Large, oblong, creamy white, slightly tinged with red in the sun; very tender, juicy, melting, very rich and luscious. September 15.

Henrietta (Levy). The most magnificent yellow cling known; of largest size; mostly covered with bright crimson; hardy, productive, sure bearer, always commands fancy prices. September 25.

Jessie Kerr. A freestone, larger and earlier than Alexander, which it resembles in tree and fruit. Preferred to the latter by many orchardists. Adapted to the same sections as Alexander.

Lemon Cling. Large and oblong, with swollen point like the lemon; skin yellow, with dark, brownish red cheek; flesh yellow, firm, slightly red at the stone, with rich, sprightly subacid flavor. One of the most beautiful yellow-fleshed clings. August.

Mamie Ross. Large; blush-white flesh; semi-cling; productive, and one of the best for the family or market. June 1 to 10.

Mountain Rose. Fruit large; skin white, nearly covered with brilliant crimson; flesh white, melting, sweet and delicious. July.

Oldmixon Cling. Large; oblong; white with pink cheek; good bearer. August 1.

Oldmixon Free. Large, creamy white, red cheek; flesh firm, juicy and well flavored. Last of July.

Sneed. Originated near Memphis, Tenn. The fruit is of medium size, very red on one side and greenish white or blush on the other. It ripens from 10 to 15 days before Alexander, but is much larger, with better flavor, and ripens to the seed better. Ripened on the tree, it is a fine eating Peach. It has large blooms, and stands frost well. Ripens May 20.

Stinson's October. Large; skin creamy white with pale blush on one side; flesh juicy and of good quality. Last of September.

Stump the World. Large; white, with bright red cheek; flesh white, juicy and of good flavor; stands carriage well; is a fine market variety. July 20.

Triumph. Ripens with Alexander; blooms late, and so escapes frost; has large flowers; is a sure and abundant bearer, and the tree makes a very strong growth. Surface is yellow, nearly covered with red and dark crimson in the sun. Flesh bright yellow; freestone when fully ripe, and of excellent flavor.

Wonderful. Large yellow freestone, ripening two or three weeks after the Elberta and coming at a time when really good Peaches are scarce and in good demand.

THE SNEED

APPLES

Apples do well in northern and eastern Texas. They thrive best in sandy soil with a clay foundation, or in stiff creek-bottom land. We have seen a few good orchards on black waxy prairie land, but as a rule they are not a success here.

San Jacinto. Like an enormously large Red June Apple, of which it appears to be a seedling, coming in just as the Red June goes out. Tree vigorous and prolific; very productive. A variety of the highest merit both for market and table. Fruit hangs to the tree remarkably well, and is a fine keeper for an early Apple. Fortunate will be the orchardist who gets an early start of this Apple. 50 cts. each, \$5 per doz.

STANDARD LIST OF APPLES

	PRICE		
	Each	Per doz.	100
2 to 3 feet	\$0 10	\$1 00	\$7 50
4 to 5 feet	20	2 00	12 00
Extra Large	35	3 50	

Arkansas Black. Large; dark red, nearly black; fine flavor. Valuable market and keeping variety.

Ben Davis. Large, greenish yellow, with crimson cheek; very showy; keeps well.

Early Harvest. Fine size; bright yellow, tender, juicy; can be cooked long before it is ripe. June.

Fall Pippin. Large; green; subacid; quality best. August and September.

Gano. An improved Ben Davis, nearly covered with deep dark red.

Grimes' Golden. Large; yellow; of best quality; tree hardy, vigorous, productive.

Jonathan. Medium red; quality extra.

Maiden's Blush. Medium; somewhat flattened; clear yellow, with red cheek; juicy, good. First of Sept.

Mammoth Black Twig. The fruit is fully one-fourth larger than the Black Twig or Winesap, which it resembles very much in color, flavor and keeping qualities; vigorous. A good and showy market Apple. November to April.

Missouri Pippin. Large; oblong, bright red, with numerous gray dots; very handsome and of fair quality; an early and very abundant bearer, and a profitable orchard fruit. December to March.

Red Astrachan. Large; crisp; acid; beautiful. June 1 to 10.

Red June. Medium; conical; deep red; juicy, productive. June 20.

Shockley. Medium; conical; regular; yellow, with a crimson cheek; flesh firm, sweet or subacid, with some flavor. Tree erect, vigorous, exceedingly productive. Ripens in October and has been kept until the following August. Produces large, regular crops; the fruit is uniformly of fine size and beautiful in appearance; the tree bears very young. Does best in sandy loam.

Summer Queen. Large, yellow, striped and clouded with red; aromatic, sugary; good. July.

Winesap. Medium; dark red; juicy; of good flavor. One of the best of Apples.

Yellow Horse. Very vigorous; abundant; yellow; large; good culinary Apple.

Yellow Transparent. Medium; yellow; good quality. A productive and excellent variety, but trees are of a dwarfish habit. June.

York Imperial (Johnson's Fine Winter). Medium to large; yellow, shaded red; firm, juicy, subacid. An excellent shipping Apple.

CRAB APPLES

Crab Apples come into bearing as young as the peach, and produce large crops of fruit every year. Excellent for preserves and jellies. Quite ornamental when in bloom. Few fruits combine beauty and utility to the same extent as these hardy little trees.

Price, 25 cts. each, \$2.50 per doz.

Hyslop. Deep crimson; very popular on account of its large size, beauty and hardiness. The trees are hardy and the growth strong and rather spreading. The fruit is produced in clusters; roundish ovate; dark rich red, covered with a thick blue bloom; yellowish; subacid; good for culinary uses and for cider. September to December.

Transcendent. Tree productive; fruit from 1½ to 2 inches in diameter; excellent for sauce and pies, and is also a good eating Apple. Skin yellow, striped with red. Vigorous, and an early bearer. This is one of the best of the early varieties, and gives a fruit with flesh of a creamy yellow; subacid and astringent until fully mellow, when it is pleasant and agreeable. Ripe in August and September.

Whitney. Large, averaging 1½ to 2 inches in diameter; skin smooth, glossy green, striped, splashed with carmine; flesh firm, juicy and rich. Said to be a great bearer, and very hardy. Tree a vigorous, handsome grower. Has no superior, if any equal.

YELLOW TRANSPARENT

We have no traveling agents, and any one representing himself as such does so without authority.

LINCOLN CORELESS PEARS.

PEARS

There is a great scarcity of Pear trees all over the country this season. This is partly due to the greatly increased demand for them among planters who are finding this one of the most profitable trees to grow. They are long-lived, bear heavy crops, and the fruit always commands a good price. The tree is also highly ornamental and can be planted on the lawn. It should not be cultivated after June, thus stopping the growth to allow the wood to ripen thoroughly before cold weather. The blight seldom affects well-ripened wood.

Price, except where noted, 25 cts. each, \$2.50 per doz. A few specimens, three and four years old, at \$1.50 to \$2 each.

Lincoln Coreless. This fruit has neither seeds nor core, being all solid, rich meat; it is from Tennessee, where the original tree is still standing, over sixty years old, and has seldom failed to bear. Fruit very large, sometimes weighing 1 to 1½ pounds, high-colored, handsome; flesh rich yellow, mellow, aromatic. Season late; fruit picked when hard and laid away to ripen has kept until March—longer than any other Pear has been known to keep. Good shipper; good for market. 50 cts. each, \$5 per doz.

Garber. The Garber has the hardy constitution, rapid growth and prolific bearing qualities of Kieffer and Le Conte, and fills the gap between the two, ripening after the former and before the latter. In size and appearance it resembles Kieffer, but is of superior flavor. Our trees are very healthy and prolific.

BETTER-KNOWN PEARS

Bartlett. Large; buttery, melting, rich flavor. July.

Clapp's Favorite. Large; good quality; showy. July.

Duchesse d'Angouleme. Very large; melting, juicy, good flavor. One of the best Pears for Texas. August and September.

Flemish Beauty. Large; melting, sweet; handsome. August.

Kieffer. Very large; skin yellow, with a bright vermillion cheek; flesh brittle, very juicy, with a marked musky aroma; quality good. Matures from September to October. Tree very vigorous and prolific. Begins to bear when four years old, and is very productive. The fruit should be gathered during September in this latitude, and kept in a cool, dark room until mellow, when its quality as a table Pear is greatly improved. The Kieffer is of unquestioned value for canning and preserving.

Le Conte. Fruit large, pyriform; skin smooth, pale yellow; quality very variable, usually second quality, but if carefully gathered and allowed to mature slowly in a cool, dark room or in drawers, it improves in a remarkable degree. Matures from July 20 to August 31.

GARBER PEAR.

PLUMS

More attention has been given to Plums the last five years than perhaps in the preceding fifteen years. Formerly the American or Chickasaw types of Plum were too small and sour, the large European was too uncertain in bearing, and the tree too delicate, while the few Japanese varieties then known were too early in blooming and the tree too delicate. Lately, however, all these faults have been overcome in the new class of Plums introduced, many of them being crosses or hybrids of the above different types. The following list contains varieties that will give the greatest satisfaction to planters.

Price, except where noted, 25 cts. each, \$2.50 per doz., \$15.00 per 100.

Happiness. A cross between the Wild Goose and Japanese types, introduced by Mr. Ramsey, who says of it, that if there is a better Plum grown than the Gonzales it is the Happiness. The tree is one of the handsomest that grows; leaves very large; the sun never burns a plum. The fruit is borne well inside the tree, so the limbs are not pulled down out of shape. The fruit is very large, often measuring six inches around; color glowing red, and in quality it is rarely equaled. It bears full, but does not over-bear, so has no off years. This is the Plum that was exhibited without a name at our State Horticultural meeting in 1903, and which attracted more attention than any other fruit on exhibition. \$1.

Red October. A remarkable Plum for north and northwest Texas, but not recommended for the central and southern parts of the state. Most late Plums in Texas are small and tasteless on account of our long, dry summers, but this, being a native of Clay county, seems to be an exception, as it produces good crops of large Plums of the finest flavor as late as October, making it valuable alike for market and home use, both for eating and cooking. 50 cts. each, \$5 per doz.

Eagle. It has been several years since we introduced the Eagle Plum. Since then we have seen and tried a great many new varieties, but from our experience we still believe the Eagle to be the best all-round Plum grown, for our particular locality. It has become a standard in Texas, and we feel that we have been a blessing to our generation by bringing it into general favor. There is one thing we feel we should call attention to, and that is the size. We have always said so much about the productiveness, flavor and beauty of the Eagle that some people imagine we say it is the largest Plum, and hence are disappointed when they see it. It is large compared with Robinson and Golden Beauty, but small compared with Wickson, Kelsey, etc. But where Wickson and Kelsey will yield one bushel, the Eagle will yield ten bushels.

The fruit is medium to large, about three times as large as the Robinson, and perfectly round; flesh yellow; skin at first yellow, changing as it ripens into a beautiful, bright red, making altogether a strikingly handsome fruit. In flavor it is entirely distinct, being sweet, juicy and unusually pleasing. Generally pronounced by those who try it to be the finest Plum they ever tasted. For cooking it is far superior to anything known in the South, being very similar to the Green Gage, which does not bear here. It is the longest-keeping of any Plum we know. Ripening in our hottest weather, it keeps perfectly sound twelve days after being gathered. If shipped to a cooler climate it would probably keep three or four weeks, thus enabling it to carry to Europe with safety. The tree is a strong, handsome grower, begins to bear the second season after planting, and will probably bear every year as long as it lives. It begins to ripen June 17 and continues to August 28, thus bearing through a period of seventy-two days, or more than ten weeks. When the fruit in the top of the tree is ripe, that on the lower branches is only half grown. Small trees, 25 cts. each, \$2.50 per doz., \$15 per 100; large trees, 50 cts. each, \$5 per doz.

Doris. Doris was loaded down last year and began ripening the first days of June. In shape and size it is like a large Botan, but is of darker color. It is decidedly earlier than Botan and every Plum from the first ripe to the last is superlatively sweet. The skin is very thin but strong as linen paper. It colors before it is ripe. 50 cts. each, \$5 per doz.

Gonzales. Very large, sweet and juicy; bright red; showy; tree very healthy and vigorous: bends to the ground with its load of fruit. You can make no mistake in planting these. Large trees, 35 cts. each, \$3.50 per doz.; small trees, 25 cts. each, \$2.50 per doz.

Shiro. Size and shape of an egg; color pure yellow. Will keep two or three weeks after being fully ripe. Will sell anywhere. Ripens during July. 35c. each.

Climax. One of Luther Burbank's latest and best productions. A cross of Simoni and Botan. Very large, measuring 6½ to 7½ inches. So fragrant that a whole house is perfumed with a single fruit. Mr. Burbank says: "Productive as the Burbank, four or five times as large, two or three weeks earlier, and very much more richly colored. The most wonderful Plum ever grown, and one which will change the whole business of early fruit-shipping." 35 cts.; small trees, 25 cts.

EAGLE PLUMS.

PLUMS, continued

Sultan. Very large, dark red skin; flesh wine color. Shape, size and color are all that could be desired. Mr. Burbank says he has measured them seven inches around. 35 cts. each.

Bartlett. A cross between Simoni and Delaware. Said to have exactly the quality, flavor and fragrance of the Bartlett pear, but the Bartlett Plum is so much superior to the pear that no one will ever eat the pear if this Plum is at hand. Fruit turns to deep crimson when fully ripe. Light salmon-colored flesh, which is very solid and firm, making it a good shipper. 35 cts.; small trees, 25 cts.

America. "The fruit of America is larger than the average Japan Plum, and from four to sixteen times as large as popular American varieties, such as Robinson, Wild Goose, Marianna, Wootton, Pottawottamie and others. The glossy coral-red fruit is not surpassed in beauty by any Plum. The light yellow flesh is moderately firm and very delicious, so good that those who do not like most Plums call for 'more' and keep right on eating Americas. It ripens two or three weeks before Burbank or Robinson, and is a splendid keeper." 35 cts.; small trees, 25 cts.

Chalco. "The fruit, which ripens just before Burbank, is large, flat like a tomato, deep reddish purple, with very sweet, rather firm exceedingly fragrant yellow flesh and small seed. The fruit is almost as stemless as the peach, and completely surrounds the older branches as thick as it can stick, like kernels on a large ear of corn. A superior shipping Plum, as it ripens well when picked green, and keeps nearly or quite a month. A tremendous grower and unsurpassed in productiveness." 35 cts.; small trees, 25 cts.

AMERICA PLUM.

THE BEST PLUMS FOR TEXAS

CHALCO PLUM.

Botan, Yellow-fleshed (Abundance). Flesh yellow, very juicy, subacid, apricot flavor; quite firm; skin tough; clingstone; quality best. pit large. Maturity June 25 to July 5. Carries well to distant markets. 25c.

Burbank. In general characteristics resembles the above. Color cherry-red, mottled yellow; shape usually more globular; flesh, flavor and quality are identical, but its period of maturity here is from three to four weeks later, or middle to last of July. 25 cts.

Caddo Chief. One of the earliest; fruit round; red; good bearer. Tree vigorous, hardy and very productive; of upright habit. 25 cts.

Golden Beauty. Medium; yellow; round; flesh firm and pleasant; should not be eaten until quite ripe, when the flavor equals that of the finest apricot. A late bloomer and sure bearer; should be in every collection. August 10 to 25. 25 cts.

Hale. A very handsome, large, round-cordate Plum; usually lop-sided; orange, thinly overlaid with mottled red, so as to have a yellowish red appearance, or in well-colored specimens, deep cherry-red with yellow specks; flesh yellow, soft and juicy (yet a good keeper); not stringy, with a very delicious, slightly acid peachy flavor; skin somewhat sour; cling. Very late. 25 cts.

Kelsey. One of the largest and best flavored Plums grown, but sometimes a shy bearer. 25 cts.

Irby. Prized highly in eastern Texas, where they say it never fails to bear. Medium; round; red. Sept. 25 cts.

McCartney. Very valuable because it is large, very early, a native of Texas and well suited to this climate. Fruit large, oblong, pure yellow; ripens the latter part of May or early in June, according to location. Tree a strong, shapely grower, and bears enormous crops when very young. 35 cts. each, \$3.50 per doz.

Red June. Large, pointed; skin thick; purplish red, blue bloom; flesh yellow, solid, juicy; subacid, Damson flavor; clingstone; good, very prolific; showy, good market variety. June 25. 25 cts.

Roulette. Rather large, oblong, chocolate-red with white specks. No other Plum surpasses it in flavor. Seems to be identical with Forest Rose. July. 25 cts.

Wickson. The fruit is very large, obconical in shape, of rare beauty, and evenly distributed over the tree. Color glowing carmine, with a heavy white bloom. The stone is small and the flesh is of fine texture, firm, sugary and delicious. Will keep two weeks or more after ripening, or can be picked when hard and white, and will color and ripen almost as well as if left on the tree. Ripens after Burbank and before Satsuma. 25 cts. each, \$2.50 per doz.

Wild Goose. Large; somewhat oblong; bright vermilion-red; juicy, sweet; good quality; cling. Ripens middle of June. A very showy and profitable market fruit; a prolific bearer, both North and South. 25 cts.

RED JUNE PLUMS.

GRAPES

Grape culture in Texas is receiving more attention of late years than formerly. Since the people have learned what varieties to plant, there has been little or no complaint of failure. Grapes grow and bear on almost any kind of soil, though a sandy loam seems to suit them best. Remember that Grapes, like everything else, must be cultivated. You need never expect to have good fruit of any kind without cultivation. Grape vines must be well pruned in winter. This must not be neglected. The majority of amateurs are afraid to cut their vines enough.

In pruning, all weak shoots and vines should be cut off entirely from the main stem, and only the strong young canes of the previous season's growth allowed to remain. These, too, must be cut back to within 6 to 10 inches of the old wood. *All that remains of a Grape-vine after being properly pruned is one or two bare stems about five feet high, and on these six to a dozen spurs 6 to 10 inches long;* in fact, nearly the whole vine has been cut away. This is all there is in the art of Grape-pruning, and any one can learn it in five minutes.

Our list of Grapes is short. Yet, if we were to restrict it to profitable market varieties, it would be still shorter. Champion, Ives' Seedling, Concord, Niagara and Delaware are the only kinds grown with much profit. The varieties mentioned, except the Delaware, are extremely hardy and prolific. We shall be pleased to correspond with planters contemplating putting out large vineyards.

Price, except where noted, 10 cts. each, \$1 per doz., \$6 per 100. Very large vines, 25 cts. each, \$2.50 per doz. Write for special prices on large lots. If very large vines are wanted, the selection of varieties should be left chiefly to us.

Agawam. Red; bunches large; berries very large, of a peculiar aromatic flavor; pulp soft; a very vigorous Grape of the Rogers class.

Black Spanish. Large, black; very hardy, productive; a good arbor Grape.

Catawba. Red, late, good, large; sweet, rich musky flavor; extensively grown North.

Champion. Black; bunches medium; berries large, early and productive.

Concord. Has long been the standard variety, on account of its hardiness, productiveness and adaptability; large, black; good for table, market or wine.

Delaware. Bunches small, compact, shouldered; berries small, round, light red; exceedingly sweet and vinous. 15 cts. each, \$1.50 per doz.

Goethe. Bunch medium to large; berries large, oblong, yellowish green; reliable; very good.

Herbemont. Bunch large, long, shouldered and compact; berries small, black, sweet, juicy; highly flavored. Fine wine Grape.

Ives' Seedling. Bunches and berries medium, often shouldered; black when fully ripe; very early.

Moore's Early. Bunch medium; berries large, round, black, with a heavy bloom; flesh pulpy and of medium quality; vine hardy and moderately prolific; ripens with the Hartford. Its large size and earliness render it desirable for an early crop.

Niagara. White; bunch and berry large; very showy and as hardy and productive as the Concord; a superb white Grape, and one of the most profitable grown.

Moore's Diamond. Large and productive; one of the very finest white Grapes grown. In many localities preferred to the Niagara. 15 cts. each, \$1.50 per doz.

America. Strong grower; berries medium size, black, melting, juicy, sweeter than Delaware, rich peculiar flavor, ripens a little after Concord. Vine very hardy. 15 cts. each, \$1.50 per doz.

Brilliant. Large clusters; berry large, red, handsome, meaty, tender and delicious; ripens before Delaware, is fully twice as large and better flavored. Hardy as Concord. 15 cts. each, \$1.50 per doz.

Carman. Growth vigorous, very prolific; cluster large, berries medium, black, meaty, rich flavor. Three weeks later than Concord. 15 cts. each, \$1.50 per doz.

Rommel. Cluster small, berry large, greenish yellow, fine flavor, earlier than Concord. 15c. each, \$1.50 per doz.

NIAGARA GRAPE.

APRICOTS

The only drawback to successful Apricot culture in Texas is their tendency to bloom too early, and thus get killed by late frosts. They should be planted on high hills and other cold localities, to prevent their blooming early, or in cities where they will be protected from the late frosts. Makes a good shade and ornamental tree, being an object of great beauty, especially when in bloom. 25 cts. each, \$2.50 per doz.

We can supply the following standard varieties: **Early Golden** and **Catherine**.

New Apricot, Stewart. The above little paragraph on Apricots has stood in our catalogue for several years. It has been our honest judgment as to their value. But last season we secured something that promises to be of real value to the general planter. Just as here and there is found a variety of plum, peach or apple that bears continually, so now it seems that we have found an Apricot which possesses the same desirable habit. Years ago Mr. Stewart, of Hood county, planted seeds of some California Apricots, and among the trees he has one that has borne full crops every year for eight or ten years. It is said that the fruit is of a flavor much superior to that of the ordinary Apricot. We have only a few trees to offer this season, and prefer to sell them only one or two to each order, in order that we may have them tested in as many different localities as possible. Young trees, 2 to 3 feet, 50 cts. each, \$5 per doz.

FIG.

FIGS

In the latitude of Fort Worth, Figs are sometimes winter-killed to the ground, but spring up again and bear the next summer. A little further south and east they can be raised easily, and they are very desirable, either to eat green or preserve in the usual way. The trade in Figs and Fig trees grows larger every year, as people everywhere learn the better to appreciate this fine fruit, how easy it is to grow, and how truly a pleasurable thing it is to sit "under one's own vine and fig tree." We have the best fruiting sorts of Figs, all in clean, vigorous young stock. 25 cts. each, \$2.50 per doz.

QUINCES

Quinces have not been extensively planted in Texas, but yet the finest, probably, in the world are raised at El Paso and along the Rio Grande. The Quince thrives best in a deep, strong, moist soil, and needs thorough culture, vigorous pruning, and a free use of fertilizers. Potash and salt are recommended as a top-dressing about the roots of this fruit tree. 25 cts. each, \$2.50 per doz.

CHERRIES

Cherries are rather uncertain in Texas, save in some localities. We have culled from long lists of Cherries the finest varieties which seem adaptable to our soil and climate, and we can supply the leading sorts. 50 cts. each, \$5 per doz.

MULBERRIES

Mulberry trees are desirable for shade on account of their hardiness and rapid growth. The fruit is highly prized by many people for pies, etc., as well as for eating "out of hand." Too soft to transport long distances. Profitable also for chickens, hogs, etc.

Hicks' Everbearing. A handsome upright and rapid grower; very abundant and continuous bearer. 20 cts. each, \$2 per doz.; 8 to 10 feet, 50 cts. each, \$5 per doz.

Russian. See page 17.

SOFT-SHELLED ALMONDS

The Almond grows well in all parts of Texas, and is even hardier than the peach, but on account of its early blooming it is very unreliable, except in the western and southwestern parts of the state. 25 cts. each, \$2.50 per doz.

JAPANESE PERSIMMONS

(*Diospyros Kaki*)

The fruit of most varieties described is of a bright orange-red or light vermilion color, in shape and general appearance resembling a large, smooth tomato; it begins to color when half-grown, but should be allowed to hang on the tree until just before a frost is expected; or, in the case of the early-ripening varieties, until fully soft. The flesh is soft, rich and sweet, with a slight apricot flavor, and is certainly far richer than the American Persimmon. There are pleasant commercial possibilities in growing Persimmons for northern markets. 50 cts. each, \$5 per doz.

PECAN

Texas beats the world on Pecans, which was demonstrated at the St. Louis World's Fair. The people of Texas are just waking up to the fact that we have a most valuable fruit in our midst, the value of which has been overlooked. The tree is of slow growth the first few years of its life, and for this reason, the prices asked seem to be high, and consequently but few trees have been planted. We can supply some choice Paper Shell trees 4 to 5 ft., 75 cts. each, \$7.50 per doz.; 2 to 3 ft., 50 cts. each, \$5 per doz.

JAPANESE PERSIMMON.

We will deliver by express, charges prepaid, to any railroad town in Texas and Indian and Oklahoma Territories, all orders for trees and plants amounting to \$5 or more.

Small Fruits

STRAWBERRIES

Strawberries will succeed well in almost any good garden soil, and should be planted by every one owning a garden. For field culture, plant 1 foot apart in rows and 3 feet between the rows. For the garden, the rows need be but 2 feet apart. Pinch off all runners in spring and summer. Mulch in summer.

Price, except where noted, 35 cts. per doz., 75 cts. per 100, \$5 per 1,000.

Crescent. Early, prolific, bright-colored; excellent for market; pistillate; needs Michel Early to fertilize it.

Michel Early. Earliest of all; large, vigorous; flower perfect. A fine pollinator for other kinds.

Lady Thompson. The money-making Strawberry of the southern states. In the past few years there have been many varieties discarded to make room for the Lady Thompson. It is profitable, and profit is what the strawberry-grower is after. Large size; good color and shipper; resists drought better than most sorts.

Excelsior. A new very early Arkansas berry of much promise; makes strong, healthy plants freely; berries large, well shaped; claimed to be the best early sort out. 50 cts. per doz., \$1 per 100.

BLACKBERRIES

The Blackberry is a profitable fruit to cultivate; grows in any good soil, bears the second year, and yields from \$200 to \$400 profit per acre. To insure success with the Blackberry, cut off all the top of the plant and bury the root entirely under ground. New shoots will soon sprout up. The fruit comes on the previous year's growth. After fruiting the canes die, and all dead wood should be removed yearly. The more branches the more fruit. When the young canes are 4 or 5 feet high, pinch off the tops, to induce growth of side branches.

Price, except where noted, 40 cts. per doz., \$2 per 100

Dallas. A native of Texas and a week or ten days earlier than the Kittatinny; large, round, juicy, sweet; very productive.

Kittatinny. Very large, sweet and productive; this and the Dallas Blackberry give a succession of fruit for 6 to 8 weeks.

Robinson. Very vigorous, upright, prolific, uniformly very large; of best quality. Sells at the highest market price. It has fruited for a number of years, and has proved itself one of the most valuable varieties in cultivation. It endures climatic hardships well. 75 cts. per doz., \$3 per 100.

McDonald Berry. We have secured from Mr. Kirkpatrick, of McKinney, stock of his celebrated McDonald berry. Especially would we recommend it to people living on the black land where other berries are not quite so successful. We give the introducer's description: "Large, tender, juicy, of best quality. Earliest, hardiest, most vigorous and most productive of all berries here. This is a new berry, a cross between the Blackberry and Dewberry. It stands up like a Blackberry, and 'tips' like a Dewberry. It is incomparably more productive than any berry fruited here, one plant producing more fruit than a half dozen plants of any of the older sorts. Twenty quarts of fruit have been gathered from a single plant. Its bright green foliage is held through the hottest summers and is nearly or quite evergreen. Among its admirable qualities is its earliness; the fruit is ripe one week earlier than the Austin or any other good Blackberry. Planters here, who have thoroughly tried this berry, would not exchange it for any other. It was discovered in this county near Wiley, Texas. We introduce it with confidence that it will prove a valuable acquisition." 10 cts. each, \$1 per dozen, \$5 per 100.

DEWBERRIES

The Dewberry is a native of most parts of Texas, and is well known. It is greatly improved in size, productiveness and flavor by cultivation.

Austin-Mayes. Probably a hybrid with the Blackberry, as the plant is a strong, erect grower. Remarkable for its productiveness, size, beauty, flavor and earliness. 40 cts. per doz., \$2 per 100.

The Rogers. Discovered near Alvin, Texas, in 1895, has been thoroughly tested since that time and found to be most excellent. It is a vigorous grower, stands drought well, and is not affected by disease nor bothered by insect pests. The berry is large, oblong, very firm and possesses a fine flavor. It ripens in South Texas the early part of April, a month earlier than the Lucretia and Austin-Mayes. Picking season lasts from 35 to 45 days. Its shipping qualities are far ahead of any other dew- or blackberry now in cultivation. No family should be without this extremely early and healthful fruit. The commercial small-fruit grower cannot afford to do without it, because it is the earliest and commands the highest price on the market. On April 16, 1902, they sold in Dallas at \$8 a crate. They also carried from Alvin, Texas, to Colorado Springs, Colo., in good condition, a distance of more than 1,000 miles. 75 cts. per dozen, \$3 per 100.

GOOSEBERRIES AND CURRANTS

These are classed among the uncertain fruits of Texas. They can be grown with moderate success in a moist partially shaded place. 15 cts. each, \$1.50 per doz.

RASPBERRIES

We can supply any of the leading varieties of Raspberries, including both the blackcap and red sorts, in any quantity. 75 cts. per doz., \$3.50 per 100.

ESCULENT ROOTS

ASPARAGUS. Roots of this valuable vegetable can be supplied, 2 years old, ready for immediate setting. A bed of Asparagus is a most desirable adjunct to any home place, and, if grown to any extent, is quite profitable. The beds should be narrow, so as to permit of cutting to the center. Set plants about a foot apart, crowns 4 inches below the surface. Before winter cover the transplanted beds with about 4 inches of manure. Salt is an excellent manure for Asparagus. 25 cts. per doz., \$1.50 per 100.

RHUBARB, or PIE PLANT. This deserves to be ranked among the best early fruits in the garden. It affords the earliest material for pies and tarts, continues long in use, and is valuable for canning. Make the border very rich and deep. 10 cts. each, \$1 per doz.

HORSE-RADISH. A useful esculent root. Small roots, 25 cts. per doz.

Shade Trees for the South

On account of our heavy local trade in Fort Worth, we have given considerable attention to the growing of shade trees, especially large ones, so that we have, probably, the largest stock and best assortment to be found in the state. As all prices in this Catalogue are for trees delivered anywhere in Texas or Indian Territory, we quote only the small and medium-sized trees.

We have a fine stock of very large trees, however, and will give prices on application. We are often asked which is the best shade tree. That is a difficult question to answer. We sell more **Sycamore** than anything else. It is a rapid grower, hardy, long-lived and handsome. However, we consider the **Elm** a better tree for permanent shade, though it does not make so good a growth for the first three or four years. The **Catalpa** is the hardiest of all trees and long-lived. The **Umbrella China** is the quickest grower, and will thrive under almost every condition and in any soil, yet is short-lived. But the tree that possesses more nearly all the good qualities of a shade tree is the **Hicks Mulberry**. The trees are hardy, grow rapidly to large size, and live a long time. The **Black Locust** is a hardy, rapid grower, well suited to west Texas and the panhandle country. The **Poplar** and **Box Elder** grow rapidly, but are often destroyed by the borer.

Read what we say about the cultivation of fruit trees. It is just as necessary to cultivate Shade Trees, at least for a few years. On lawns or sidewalks, where it is not convenient to plow, the ground should be kept well loosened and the grass kept away at least two feet on all sides of the trees. Our trees are all nursery-grown, well rooted, have straight bodies, handsome tops, and will compare favorably with any in the United States.

Customers desiring large numbers will find it to their interest to correspond with us for special prices. We will give you prices on trees, delivered in your own town, and guaranteed in good condition.

ASH, Native. A well-known tree. Handsome shape and color. 3 to 4 feet, 15 cts. each, \$1.50 per doz.; 6 to 7 feet, 25 cts. each, \$2.50 per doz.; 8 to 10 feet, 50 cts. each, \$5 per doz.

CATALPA speciosa. The best tree to plant on sidewalks or other exposed localities. Horses and cattle will not touch it. It is also very ornamental, with its large, heart-shaped leaves, and is especially handsome when covered with its white and fragrant blooms in spring. Its timber is very durable, also resisting rot for many years. We have a good stock of fine trees. Transplanted trees, 6 feet, 20 cts. each, \$2 per doz.; 7 feet, 30 cts. each, \$3 per doz.; 8 feet, 40 cts. each, \$4 per doz.; 10 feet, 50 cts. each, \$5 per doz.

BOX ELDER. The beautiful light green shade of its foliage and its rapid and handsome growth make it a very desirable tree, but quite subject to attacks of the borer. Being a very soft-wooded tree, the borer almost invariably attacks and kills all trees that are transplanted, except those that are transplanted when quite small. This insect does not seem to attack a very small Box Elder, and after it once becomes established it grows so rapidly that nothing seems to hurt it. For this reason we advise the planting of only the small trees, from 3 to 8 feet. We can furnish handsome large trees of almost any size. Prices quoted on application. 6 feet, 25 cts.; 8 feet, 35 cts.; 10 feet, 50 cts.

ELM, White. The Elm has proved very successful in Texas as a shade tree, and is being more extensively planted now than formerly. Like the China tree, it grows well in rocky soil, where most trees would die. Our trees are all nursery-grown. 4 to 5 feet, 15 cts. each, \$1.50 per doz.; 7 feet, 25 cts. each, \$2.50 per doz.; 8 feet, 40 cts. each, \$4 per doz.; 10 feet, 50 cts. each, \$5 per doz.

LOCUST, Black. This well-known tree is a good grower and very hardy. We particularly recommend it for west Texas and for sidewalks in cities, or any place where the tree is likely to be neglected. 3 to 5 feet, 10 cts. each, \$1 per doz.; 6 to 7 feet, 20 cts. each, \$2 per doz.; 8 to 10 feet, 35 cts. each, \$3.50 per doz.; 10 to 12 feet, 50 cts. each, \$5 per doz. For extra-large trees, write for prices.

CATALPA SPECIOSA.

MULBERRIES. For description and varieties, see page 14. We wish, however, to call special attention here to the value of the **Hicks Mulberry** as a shade tree. It is an upright and very rapid grower, and makes a handsome, permanent tree. It often grows 12 feet from the graft the first season, and in two or three years is a large tree. One tree of this variety planted on our grounds fifteen years ago now has a well-balanced, symmetrical head of 50 feet spread. 4 to 6 feet, 20 cts. each, \$2 per doz.; 6 to 8 feet, 35 cts. each, \$3.50 per doz.; 8 to 10 feet, 50 cts. each, \$5 per doz.

NON-BEARING MULBERRIES. The varieties of non-bearing Mulberries that we have tried have not been altogether satisfactory. Still there is a persistent demand for a hardy non-bearing Mulberry, especially in west Texas. For such a demand, the best thing we have to offer is the **Russian Mulberry**. It is classed with the fruiting kinds, and in the vicinity of Fort Worth it does bear one crop of fruit each year. But the fruit is small and is gone in about two weeks. In the West, however, the fruit fails to mature, and hence never becomes a nuisance. The tree grows rapidly, is handsome and large, growing almost anywhere, and hence is very valuable. We have a fine stock of very handsome trees, and they can hardly fail to grow. 6 to 7 feet, 25 cts. each, \$2.50 per doz.; 9 to 10 feet, 50 cts. each, \$5 per doz.; 10 to 12 feet, 75 cts. each, \$7.50 per doz.

SYCAMORE. One of the most popular shade trees for all purposes; a sure, rapid grower; long-lived and of handsome appearance. 4 feet, 15 cts. each, \$1.50 per doz.; 6 feet, 25 cts. each, \$2.50 per doz.; 8 to 9 feet, 50 cts. each, \$5 per doz.; 10 to 12 feet, \$1 each, \$10 per doz.

UMBRELLA CHINA. For quick, useful shade, no tree equals the Umbrella China. A native of Texas, it is especially adapted to our peculiar climate and soils; it grows well on black land, sand, gravel or almost solid rock; as symmetrical as an umbrella. Sometimes lives to the age of twenty or twenty-five years, but more frequently dies, or, rather, breaks to pieces after eight or ten years. For this reason it should not be depended on for permanent shade. A good plan is to plant Chinas alternately 15 feet with Sycamores, Elms or Maples. The Chinas will make a good shade after the first year for eight or ten years; by that time the other trees will be large enough for shade, and the Chinas can then be removed. 2 to 3 feet, 10 cts. each, \$1 per doz.; 4 feet, 25 cts. each, \$2.50 per doz.; 6 feet, 50 cts. each, \$5 per doz.; 7 to 8 feet, 75 cts. each, \$7.50 per doz.; 8 to 9 feet, slightly branched, \$1 each. Price by the 100 or 1,000 given on application. For extra large trees, write for prices.

HYBRID CHINA. We are not offering this as a distinct variety, but still it is distinct enough to be classed separately. Every year we notice among our Chinas some trees that have in them more or less of the blood of the common or sour China. Evidently the blossoms of the Umbrella have been fertilized by the pollen of the sour China. The trees are taller, handsomer and longer-lived than the Umbrella, but sometimes they are not quite so symmetrical in their growth. The prices on these will be the same as on the Umbrella, though we are not always certain of detecting the hybrids, especially in smaller sizes.

SOUR CHINA. The old original China grows faster and larger than either of the above, lives longer and is preferred by many. Prices same as for Umbrella China.

SOFT or SILVER MAPLE. With many people the favorite shade tree for this climate. If cultivated for a few years it makes a rapid growth, which can hardly be equaled by any other tree for the freshness of its foliage and its beautiful appearance. It thrives best in sandy soil, though with a little care it will grow readily in black land. It is the well-known and very popular "Silver Maple" of the North. 4 to 5 feet, 15 cts. each, \$1.50 per doz.; 8 feet, 25 cts. each, \$2.50 per doz.; 10 feet, 50 cts. each, \$5 per doz. For larger trees, write for prices.

WALNUT, Black. Rather slow in starting, but afterwards makes a fairly rapid growth, and soon becomes a handsome tree—as hardy as anything that can be grown here, and bearing large, annual crops of the well-known and ever popular nuts. 3 to 4 feet, 25 cts. each, \$2.50 per doz.; 5 to 7 feet, 50 cts. each, \$5 per doz.

WILLOW, Weeping. Well known everywhere, and also popular everywhere. Of beautiful drooping habit. The soft, delicate green of the foliage appears very early in the spring. The under sides of the leaves on nearly all Willows are silvery, and give a beautiful effect when the wind blows. 25 cts. each, \$2.50 per doz.; large trees, 50 cts. each.

WHITE ELM (See page 16.)

We will deliver by express, charges prepaid, to any railroad town in Texas and Indian and Oklahoma Territories, all orders for trees and plants amounting to \$3 or more. To receive this advantage, cash must in all cases accompany the order.

Evergreens

It is no longer necessary to press the claims of Evergreens in this country. There are too many to be seen growing everywhere to need any other argument to convince people that they will form

THE NEW EVERGREEN, ROSEDALE HYBRID.

50 cts. each, \$5 per doz. Extra-fine specimens, 2½ to 3 feet, \$1 each, \$10 per doz.

ARBORVITAE, Chinese. Hardy, and a rapid grower; inclined to branch, but can be made a compact tree by frequent and careful pruning. 2 feet, 25 cts. each, \$2.50 per doz.

Golden. Very close and symmetrical in growth. The most popular evergreen in the South; is easily transplanted, grows quickly, and needs little pruning; very desirable and largely planted. 12- to 15-inch, 25 cts.; 15- to 20-inch, 50 cts.

BOX, Tree. Dark, glossy green and vigorous in stiff soil, but not so much so in sandy soil. 25 cts.

CAPE JASMINE. A good plant for southern and eastern Texas, but too tender for this locality. 25 cts. to \$1.

CEDRUS deodara (The Great Cedar of the Himalayan Mountains). A stately tree, attaining a height of 50 to 75 feet; foliage glaucous green, branches feathery and spreading. Perfectly adapted to this climate. \$1 to \$2.

beautiful specimens here. Still, not all the varieties are successful in western Texas. The following list comprises nearly everything in this line that is really suited to our varied climate.

The handsomest, most easily grown and most useful of the following lists are *Magnolia grandiflora*, Golden Arborvitæ and Rosedale Hybrid. These will grow in any part of the state, in any soil, are pretty when young, and grow handsomer the longer they live. Evergreens are among the most valuable trees grown for utility and ornament. As specimen trees on the lawn they are most valuable and effective, while their practical value as shelter-belts, screens, hedges, etc., cannot be overestimated.

ROSEDALE HYBRID

This is pronounced by all nurserymen who have seen it to be the handsomest evergreen of its class. It originated at the Rosedale Nurseries in Washington county, Texas, and is a true hybrid, a cross between the Golden Arborvitæ and *Retinospora squarrosa*. It has the same dense, compact, upright and uniform growth as the Golden Arborvitæ, while in texture and color it resembles the *Retinospora*, except that it is soft and feathery to the touch, and in color it is a bright, fresh pea-green, very striking and attractive. Being a native of Texas, it seems to be perfectly adapted to this peculiar climate, and does well in almost any situation, amply repaying the expense and labor of purchase and planting. It retains the same bright, healthy appearance summer and winter. It is inclined to be dwarf, and apparently will never grow more than 6 or 8 feet high.

Through our extensive advertising, this evergreen has been brought to the notice of nurserymen all over the United States, and has created almost a sensation wherever seen. During the last three years we have grown great numbers of them, but have never had sufficient to supply the demand. This season we have 100,000 plants, but we expect to sell all of them before the season closes. 10 to 12 inches, 25 cts. each, \$2.50 per doz.; 18 to 20 inches,

EUONYMUS Japonica. A hardy and ornamental plant, with rich, handsome foliage. 25 cts. to 75 cts.

HARDY ORANGE, *Citrus trifoliata*. Dwarf, symmetrical, with glossy green trifoliate leaves. The fragrant white blossoms are borne continually. The fruit is small, bright red in color, very curious. We have a tree 12 feet high on our grounds that has never been protected since it was planted, ten years ago, and is now (November) covered with Oranges some half grown, others turning red. 25 to 50 cts. If wanted in large quantities for hedges, write for special prices.

MAGNOLIA grandiflora. This is the grandest of all evergreens and flowering trees; hardy in this latitude; all the leaves should be cut off when the tree is planted. 1 foot, 50 cts.; 2 feet, \$1; 3 feet, \$1.50.

OLEANDER. A good house plant, vigorous and hardy 200 miles south or east of Fort Worth. Pink and White. Small plants, 25c.; larger plants, 50c. to \$1.

HYDRANGAEA PANICULATA GRANDIFLORA.

Flowering Shrubs

Where the grounds are large enough, these should always find a place. Everybody should have the *Cydonia Japonica*, because it brightens the garden with its gay blossoms so early in the season, often in January. Then the Lilac and Spirea (Bridal Wreath) can never be left out—they are so early and showy; while the Calycanthus, Snowball and Hydrangea, though requiring a little more attention than others, are too grand to be overlooked. The Deutzia, not quite so well known, will please everybody. But the shrubs that we would heartily recommend to everybody, no matter how small the ground, are the Althæa, Crape Myrtle and Flowering Willow. Commencing in May or June, they bloom on continuously till frost—just the time of the year when flowers are the scarcest. We find the semi-double pink *Althæa elegantissima* the showiest and freest bloomer of all. The Crape Myrtle is par excellence the shrub for the South. The white is the prettiest and most dainty-looking, but the crimson is the showiest, grandest and hardiest of all. Purple and pink are not pretty.

Price, except where noted, 25 cts. each, \$2.50 per doz.

ALTHAEAS. Hardy and tree-flowering; will bloom continuously from June until frost.

Double White, Double Purple, Semi-Double Pink and Single White.

CALYCANTHUS florida (Sweet Shrub). Flowers double, of a chocolate color, and very fragrant. 35c.

CHILOPSIS linearis (Flowering Willow). A tall-growing shrub from southwest Texas, which is well adapted to this climate. Leaves linear; flowers very showy, in terminal racemes. Each flower is composed of a corolla-like tube divided at the end into five lobes, nicely crimped. Tube lilac; end of corolla mottled deep lilac, with two yellow stripes in center of tube. A most valuable shrub, which blooms almost continuously throughout the summer. 25 cts.

CYDONIA Japonica (Japan Quince). Covered in early spring with scarlet blossoms.

CRAPE MYRTLE. The well-known flowering shrub or small tree; very showy in summer or fall.

Crimson and Purple. 25 cts.

White. 50 cts.

DEUTZIA. A neat, bushy shrub, bearing in spring beautiful clusters of flowers that are of exquisite beauty.

Crenata fl. pl. Double-flowering and exceedingly handsome variety; flowers white, tinged rose. These are sometimes called Tassel Flowers.

HYDRANGAEA paniculata grandiflora. Form spreading, bearing large foliage and immense pyramidal panicles of white flowers more than a foot long, which change to pink, and finally to purple; blooms from June till frost. It is a very attractive plant, its clusters of bloom presenting a striking appearance. Most effective when planted in groups. 35 cts.

BUSH HONEYSUCKLE.

FLOWERING SHRUBS, continued

HONEYSUCKLE, Bush or Upright. Early-blooming; very fragrant. Succeeds over wide areas.

JASMINE, Catalanian. A hardy shrub, with beautiful foliage and fragrant white flowers. This plant always gives pleasure, and is effective in well-arranged grounds.

LILAC. Grows and blooms well here.

Purple. The well-known variety.

White. Bears large, handsome panicles of pure white blossoms. 35 cts.

POMEGRANATE. Grows here as a flowering shrub, but grows larger and bears abundant crops of fruit in southern Texas. It has small leaves and handsome orange-red flowers. The fruits are the size of small oranges, and ripen in late summer or autumn. Makes a fine specimen also when grown in tubs.

SPIREA. One of the most useful flowering shrubs; very hardy and free-flowering.

Billardii. Flowers in spikes, deep pink.

Crimson, Anthony Waterer. Outshows all Spireas in brilliancy of color—a bright crimson. It is also much dwarfer and denser in growth; when scarcely 3 inches high it begins to bloom, and thereafter is seldom out of flower. As a house plant nothing can equal it. In the garden it will make a plant 3 feet high and wide, and will be covered with flower-heads 6 inches across. It is

also perfectly hardy, and will stand the most severe winter with slight protection. 35 cts.

Prunifolia. Flowers small, pure white, very double; produced in great profusion upon long, slender branches.

Reevesii, or Bridal Wreath. The well-known favorite; single white.

SNOWBALL. A great favorite where it succeeds well, but it too often succumbs to our very long, hot summers. When in full bloom, very early in spring, the great bushes are thickly massed with spherical, fluffy balls of snowy white. Gives the same effect in spring that the showy hydrangeas do in August. 35 cts.

SYRINGA (Mock Orange). The Syringa is an invaluable shrub. Of vigorous habit, very hardy, with large, handsome foliage and beautiful white flowers; produced in the greatest profusion at the blooming season, it merits a prominent place in all collections of shrubbery. Most of the varieties, except these of dwarf habit, form large shrubs 12 to 15 feet high. They can, of course, be kept smaller by pruning.

Coronarius (Garland Syringa). A well-known shrub, with pure white, highly scented flowers. One of the first to flower.

Grandiflora (Large-flowered Syringa). Has very showy large flowers, slightly fragrant; branches somewhat straggling.

We will deliver by express, charges prepaid, to any railroad town in Texas and Indian and Oklahoma Territories, all orders for trees or plants amounting to \$5 or more. To receive this advantage, cash must in all cases accompany the order.

Roses for the South

ROSES are our great specialty. For twenty years we have been studying what are the best varieties for this climate, and also how best to care for and handle them. The season just past was not a favorable one for Roses. The severe freeze of November 17, 1903, following right after warm growing weather, and then again the severe cold of March, 1904, following right after warm weather, killed many plants each time, and many that were not entirely killed were so damaged that they made very little growth. For this year, however, we have to offer a very excellent lot of plants, both in variety, size and vigor.

To our old customers it is hardly necessary to say any more than that we have a good stock of plants, larger and healthier than heretofore, besides a fine list of new varieties. The rose-lover is not satisfied to plant only the old standards, even if they should be the best. He wants to try the new Roses, and see if he cannot get something better or newer than what he already has. Of course he expects to be disappointed many times, but many times he is delighted in finding a real acquisition. The improvement in new Roses seems to go on unabated, and the last few years have produced many decided acquisitions. In the following list we try to offer only such new Roses as have decided merit. The work that we have done toward obtaining and disseminating some practical knowledge of the Rose is having its reward in our greatly increased sales. Our customers are beginning to believe that if Baker Brothers recommend a Rose it has decided merit, and if certain Roses are not found in our Catalogue, it is well to let them alone. We doubt if as good a collection of Roses for Texas can be found anywhere else. Of course, some florists in the North offer all the Roses we do and many more; but it is because of this "many more" that it is not safe to order from them. Three-fourths of the Roses offered in northern catalogues are not suited to our soil and climate; all of our Roses have special merit, and are adapted to this climate. We have tested many new varieties this season, and some of them are decided acquisitions.

We can supply field-grown plants of nearly all the varieties offered. There is quite a difference between our field-grown plants and the stock offered by northern florists as "**two-year-olds**." They mean plants that have been kept in pots through the second season, and have tall, weak growth. Ours are grown in the open ground and have a strong, bushy growth which is much superior to the spindling of a pot Rose. As usual, we have added a number of new varieties to our list, and have also dropped a few superseded by better and similar varieties of the same class. This selection of the best we shall continue, thus keeping our list up to the very best standard for this climate. Of the new varieties offered, we have tested a number and can heartily recommend them. Some we have not tested, and their descriptions are, of course, borrowed. There is such a desire and ambition among most of our customers to get the newest and best that they do not care to wait for us to try a new kind, but are willing to make the experiment themselves. Occasionally such people will be disappointed, but they must remember that not every variety that will succeed well in Ohio, New Jersey or France is suitable to this climate.

Field-grown Roses begin to grow early in March, and unless transplanted before that time they are not likely to grow. We have always had this difficulty when customers ordered late, as some are sure to do. Of late years, however, we have overcome this trouble by packing the plants in cold storage, so that when they were planted in the open ground, even so late as May, they grew off beautifully. Of course this refers only to field-grown Roses, and it does not mean that the plants are frozen.

Our small pot-plants are growing in pots, and can be planted any time that we have them. We advise our friends to plant them out before April, except in Kansas and more northern points. A little cold weather will not hurt a Rose. The prices given are for healthy, vigorous young plants, 5 to 10 inches tall, taken from 2½-inch pots. Those marked "field-grown" are plants taken from the open ground, are bushy, and from 1 to 3 feet tall, according to variety. When planted out the tops should be cut back nearly to the ground.

Roses require a rich soil and plenty of water. They succeed best on stiff soil—black-waxy, clayey or black sand—but they will grow and bloom well in any soil if well manured and watered.

A comparison of our Catalogue with other Catalogues of this year will show that we do not offer the various Ramblers and Wichuraianas which have such prominent places in northern catalogues. We do not offer these Roses, because they will be disappointing to our friends. They are very desirable in the North on account of their hardiness, and where the finer Everblooming Climbing Roses will not grow. But here in the South, where the Marechal Niel, Reine Marie Henriette, Climbing Kaiserin, Climbing Meteor, Climbing Bridesmaid, Climbing Malmaison, and a dozen other fine climbers, will bloom all the year, there is no need of planting Roses that will not bloom the first season, and only once a year after that. Many people have been disappointed to find that the Crimson Rambler is only a spring bloomer. The new Roses offered in the following list have been carefully selected as suited to this climate.

ROSES, continued

Perfect flowers cannot be expected from plants set out late in February or March, and which produce blooms before they are well established. But if these plants are allowed to grow until the following fall, and if they receive proper treatment, there will be no cause for complaint.

Roses planted in the fall. While we issue our Catalogue but once a year—in January—yet we sell a great many Roses in the fall, and, of course, sales are made through our Spring Catalogue. Much correspondence on our part, and annoyance on the part of our customers, could be avoided if they knew a little more of the nature of the Rose. We offer two sizes of Roses—the field-grown at 25 cts., 35 cts. or 50 cts. each, and the pot Rose at 10 cts. or 15 cts. each, or \$1 per doz., and a certain collection of 18 for \$1. The field-grown Roses are strong, stout bushes, 12 to 24 inches high, with two or three branches. On these the growth is ripened and hard, and hence can be left in the open ground all winter. The pot-grown Roses are rooted in the fall, are kept growing in the greenhouse all winter and have only tender young growth, which cannot stand any exposure to freezing weather. When this is properly understood, it is easy to see that the small plants should not be ordered before spring. In south Texas they may be planted safely in February, but in north Texas it is best to wait until March.

Directions for Planting, Pruning and Fertilizing

Any good garden soil is suitable, but should be well fertilized with decomposed stable manure. Keep the soil free from weeds and stir frequently during the summer. Mulching in fall with stable manure is beneficial. A small amount of bone-meal or good fertilizer applied in summer is advisable.

When planting, cut off all but two or three of the strongest branches; cut these back to three inches. Plants thus cut back will transplant better and produce finer flowers.

Pruning. After the first killing frost, most of the varieties should have two-thirds of the past year's growth cut off. As a general rule, the more vigorous the variety the less it should be pruned. Remove all decayed wood. Climbing Roses should have only their side branches shortened in; do not disturb the main stem.

We frequently receive complaints from our patrons who order late in the spring; they state that the flowers produced on their Roses are very inferior and do not come up to description. We would state that perfect flowers cannot be expected from plants set out late in February or March, and which produce blooms before they are well established. But if these plants are allowed to grow until the following fall, and if they receive proper treatment, there will be no cause for complaint.

Insects. For "aphis" and "thrips" spray plants daily with a solution of tobacco stems. (Tobacco stems 1 lb., boiling water 3 gals.; strain when cool; must be used within 48 hours after mixing.)

For Rose Slug spray with hellebore or insect powder. For rose leaf-hopper spray with insect powder, tobacco decoction or kerosene emulsion.

Mildew. This is caused by extremes of heat and cold, or by a continuance of damp, cold weather. Sprinkle the plants with water and dust them with sulphur or soot

GENERAL MCARTHUR.

NEW AND NOTABLE ROSES

Gen. McArthur. A new Rose of this year's introduction which promises to be what rosarians have long been looking for, namely, a good red with full pointed buds, produced freely on long stems, like the Bridesmaid, and in addition delightfully fragrant. Color brilliant scarlet, a very bright-colored Rose, of good size and double, very free-blooming and fragrant. It is claimed for it that it is the very best red Rose for outdoor planting as it will stand all sorts of weather without losing its vigor and blooming qualities. Small plants, 35 cts. each. We have no large plants.

La Detroit. (Hybrid Tea.) The new Breitmeyer Rose, which has been so largely exhibited and advertised. Shell-pink, shading to soft rose; reverse of outer petals cream-colored; fragrance like that of old Bon Silene. In form it is large, cup-shaped; petals shell-like. Rich, glossy foliage; a rampant, vigorous grower, producing long shoots, and we believe a fine Rose. Small plants, 35 cts. No field-grown plants.

Franz Deegen. Of all the new Roses of last year's introduction, the Franz Deegen and Antoine Rivoire pleased us most. We are sure it has come to stay, and will take its place alongside of Kaiserin, American Beauty, Madame Testout, La France, and the very best. A seedling from Kaiserin. This beautiful yellow Hybrid Tea is a fine grower, having dark leathery foliage and the good habit of throwing up numerous heavy canes, each one crowned by a glorious flower of large size. Composed of large petals; the outer petals are of about the color of Perle des Jardins; the inner petals a good orange shade, very deep and rich. It is a constant bloomer, opening its buds freely. A strong, healthy grower, not subject to mildew. Received six gold and silver medals in America during 1902. Small plants, 20 cts. No field-grown plants.

Silver King. (Bourbon.) This new Rose is a beauty indeed. In fact, to see a bed of it in bloom is absolutely startling, it is so grand and beautiful. The bud and flower are of the largest size when fully expanded, cup-shaped, full and double, but the petals are so arranged as not to crowd one another. The color is a clear shell-pink, so exquisite as to resemble the delicate, soft pink seen in deep-sea shells. It is very fragrant. A true ever-bloomer and hardy everywhere. This is the grandest of all light pink Roses. Be sure and try this Rose. Small plants, 20 cts. No field-grown plants.

Antoine Rivoire. After growing this Rose two seasons in the field, we are convinced that it is one of the best Roses ever introduced and we are sure it will at once become a standard. It is a vigorous grower, with fine-shaped buds and flowers, color salmon flesh in center to the edge of its petals shading to a creamy white, with a delicate pink tinge. No other Rose we know of is like it either in color or make-up—the color is so fresh and clean. It will last longer by far than any Rose cut from the field and retain its fresh, bright appearance. One customer writes that in the heat of summer, when cut, it keeps fresh for three to five days, while other Roses are drooping within a day. This is due to the thick, leathery-like petals seen only in this variety. This Rose is in a class all by itself. A No. 1 in every respect. Small plants, 20 cts.; field-grown, 50 cts.

Gainsborough. As a hardy ever-blooming climber it has no equal, eclipsing even that grand variety Mrs. Robert Peary. For beauty and size we place this variety at the head of the Hybrid Teas. The foliage is an exact counterpart of its parent, Viscountess Folkestone. Its delicate colors are hard to describe, being delicately tinted flesh, almost white, and lustrous as satin. When in full bloom it resembles a large, fine, white, fluffy peony, but without a suggestion of stiffness, often measuring 8 to 9 inches in diameter. Small plants, 15 cts. No field-grown plants.

Aurora. (Hybrid Tea.) A new Rose that has come to stay. Very strong grower, free bloomer, color bright glowing pink, deeper than La France. This is a finer pink Rose than either Mrs. John Laing or Mrs. R. G. Sharman-Crawford, and all who know these famous varieties know that they are hard to beat. It has the true deep penetrating fragrance of the Hybrid Perpetuals and is the sweetest of all Hybrid Tea Roses. It is a beauty from every point of view, and can be best described as grand, superb. You will make no mistake in growing it. Small plants, 15 cts. No field-grown plants.

Coronet. (Hybrid Tea.) In the bud the color is a deep rich carmine, which, as the flower opens, lightens to a soft, clear pink, with each petal distinctly edged with silver-gray. The effect is beautiful. It has been scarce and will remain so, as it is difficult to root, but grows easily. We offered this Rose several years ago, when first introduced, but lost stock of it. It is such a decided acquisition, however, that we were very glad to be able to secure stock of it again. Small plants, 15 cts. No field-grown plants.

FRANZ DEEGEN.

NEW AND NOTABLE ROSES, continued

Winnie Davis. (Hybrid Tea.) This excellent Rose was raised from seed, being a cross between the famous Empress Augusta Victoria and the well-known Belle Siebrecht. The color is apricot-pink, shading to a flesh tint at the base of petals; buds oblong and well formed, when fully expanded resembling a sunburst; most peculiar and strikingly beautiful. Its habits are vigorous and robust, very free-blooming, each eye producing flowers; foliage leathery, reddish green, glossy and very large; also has the disposition of throwing up vigorous shoots from the roots, producing three to eight blooms, its peculiar fragrance like luscious apricots. For the middle and southern states we claim the Winnie Davis to be an acquisition second to none introduced in recent years. Small plants, 15 cts.; field-grown, 35 cts.

BESSIE BROWN.

Lady Clanmorris. (Hybrid Tea.) Perfectly distinct. A splendid Rose of robust growth and free branching habit; flowers continuously and freely throughout the season; blooms large and of good form; petals large, smooth, and of great substance; creamy white, with delicate salmon center, edge of petals margined pink. 15 cts.

Dr. Cazenueve. (Hybrid Tea.) A new Rose of very great merit. It is the darkest colored flower of all the everblooming Roses, and can best be described as a rich dark crimson velvet. It stands in a class by itself. A vigorous, strong grower and free bloomer; destined to become famous. Small plants, 15 cts.; field-grown, 35 cts.

Souvenir de Catherine Guillot. (Tea.) Good grower and bloomer. The freest blooming Tea Rose, producing a long pointed bud of the color of Austrian copper, flushed with rose, by far the best of the high-colored Roses. This is a beauty. Must be seen to be appreciated. Small plants, 15 cts.

Lady Battersea. (Hybrid Tea.) This variety has long, pointed buds of the largest size, and is very striking in form. The color is bright cherry-crimson, often approaching the shade of Liberty. The stems are stiff and extremely long; a vigorous grower and free in bloom; early in the season the flowers are not very double, but on strong plants the blooms are well filled. An unusually promising bedder. Small plants, 15 cts.; field-grown, 35 cts.

Lady Mary Corry. (Tea.) An exquisite decorative Tea Rose; growth vigorous and of erect, branching habit, fine large bold flowers of perfect build, very freely produced; color deep golden yellow, delightfully tea-scented. Small plants, 15 cts.

Meta. This is a grand, high-colored variety. It has all the different shades of color, with a few additions, that Luciole has; coppery yellow, suffused with pink and crimson. Small plants, 15 cts.

Madame Jules Grolez. (Tea.) An exceedingly free-blooming variety, with very bright, large, full, finely formed flowers. Superb and worthy of a page description; color a distinct and charming shade of satiny pink. This is a winner. Small plants, 15 cts.

Bessie Brown. A Rose of transcendent beauty, totally distinct, and one of the largest and fullest that we have ever seen. It is erect and vigorous in growth, flowering profusely in the open ground all through the summer. Color pure white, sometimes faintly flushed pink. Petals enormous and of shell-shape. It is really marvelous that such large flowers can be so freely produced. Received gold and silver medal from the National Rose Society, England, and numerous certificates and prizes. Small plants, 15 cts. No field-grown plants.

Virginia R. Coxe. (Gruss an Teplitz.) The color is a fiery crimson, shaded with a dark velvety sheen, producing the most magnificent effect ever seen in any Rose, and which completely overshadows varieties that have been considered heretofore the most brilliant of their class. The flowers are large, full and double, handsomely made, and are produced on extraordinarily long stems that shoot out beyond the foliage in free yet handsome disorder. The fragrance is distinct and deliciously sweet. It makes a strong bush 4 to 5 feet high; has splendid foliage, which is free from all disease. It is perfectly hardy in all sections. 15 cts.; field-grown, 35 cts.

Sunrise. In close bud form it shows a deep coppery pink, but as the flower opens the inner side of the petals shade from a clear yellow to a deep copper, making a very pretty color effect. The fragrance is delightful, much the same as the old Rose Bon Silene. The young foliage comes a copper-bronze, and as it grows older changes to deep green. This Rose has a good future, having been thoroughly tested. Small plants, 15 cts. No field-grown plants.

Helen Gould. We have never had a new Rose to please us more thoroughly than this, as it is grand in every respect. It has as many good qualities as the La France, and its rich color will make it even more valuable. The color of this fine new hardy everblooming Rose is unique, very soft, intense carmine-crimson, with deeper shades in the depths of the petals, in color very like American Beauty. The profusion of bloom is truly marvelous, every shoot producing a flower. It is a better Rose for general planting than the American Beauty, because it blooms so much more freely. The flowers are full and perfectly double and the buds beautifully made, long and pointed. It is a grand acquisition to our red Roses, and is equally valuable for winter forcing or for summer blooming in the open ground. Small plants, 15 cts.; field-grown, 35 cts.

Admiral Dewey. (Hybrid Tea.) In color this is among the most beautiful of pink Roses, a delicate Daybreak blush, clear and distinct and very captivating, nothing weak or washy in color. It is a sport from Madame Caroline Testout, is more vigorous in habit and a very free bloomer. Like Testout, the flowers are very perfect in form, a little lacking in fulness when fully expanded, forces finely and is very fragrant; fine cold weather Rose of enormous size. Small plants, 15 cts.

Queen of Bedders. This season we have only a limited number, and we advise that orders be placed early to secure the plants. To those who know the Rose no description is necessary. It is as large as American Beauty, of a darker color, a stronger grower and a freer bloomer. It produces immense crimson blooms through the summer. Plants from 2½-inch pots., 20 cts.; field-grown, 50 cts.

Mrs. Robert Garret. The flowers are very large, on strong stems, clothed with clean, heavy foliage and strong spines. The buds are long and pointed in shape, and open up beautifully into a full rounded flower. In shape of bud and half-open flower it very much resembles Souvenir du President Carnot, but is very much larger; color a glowing shell-pink, very deep in the center; the fragrance is delicate and pleasing. 15 cts.; field-grown, 35 cts.

Madame Abel Chatenay. This is a wonderfully strong, healthy-growing variety, with rich, bright foliage. A grand bedding Rose, as it is a profuse and continuous bloomer; flowers of good size, very double, with slightly recurved petals; elegant buds, just the right size and shape for buttonhole use. Color rosy carmine shaded salmon. 15 cts.; field-grown, 35 cts.

Souvenir du President Carnot. The finest Rose presented to the public in many years. In beauty of form it is simply unsurpassed, while to our taste it is the loveliest combination of pink and white tints that we have ever seen. Small plants, 15 cts.; field-grown, 35 cts.

Miss Helen Gambier. (Hybrid Tea.) The color at first is salmon-rose, varying to apricot-yellow at the base. A decided advance toward a true yellow Hybrid Tea. Flowers large, very double, with full, high center. A prolific bloomer. 15 cts.; field-grown, 35 cts.

Madame C. Testout. We have never seen a finer Rose than a well-grown specimen of Madame Testout. It is a bright, vivid rose color, as large and perfect as Baroness Rothschild and as free a bloomer as La France. If called upon to name the prettiest Rose we know, we should say Madame Testout. It is very scarce on account of its being difficult to propagate. During the severe season just passed, this has given us the most satisfaction of all the Roses in the field. During the most severe part of the drought, when nearly everything else stopped blooming, this continued to produce fine buds and blooms without ceasing. Small plants, 20 cts.; field-grown, 50 cts.

American Beauty. This is hardly now a new Rose, but it is one of the best we have for outdoor culture. It is a strong, vigorous grower and a very free bloomer. The buds are extra large, very full, double and exceedingly sweet. The color is a dark, rich crimson, most exquisitely shaded. The flowers are very lasting after cutting, keeping fresh and bright from one to three weeks. Field-grown plants, 35 cts.; extra-large, 50 cts. No small plants.

Crown Princess Victoria. (The White Malmaison.) This Rose is a vigorous grower, with large, fine foliage, and is one of the loveliest of all Roses. The color is pure waxen snow-white, sometimes lemon-tinted, and those who desire a fine double flower when fully expanded will be delighted with it, as it is beautiful when full blown. 15 cts.; field-grown, 35 cts.

MADAME C. TESTOUT.

TEA AND OTHER EVERBLOOMING ROSES

The Everblooming Roses are the most popular of all, and for the South, where all are entirely hardy without protection, are especially desirable for their continuous growth and bloom.

PRICES OF ALL ROSES, EXCEPT WHERE NOTED: Vigorous young plants, from pots, 10 cts. each; larger plants, from 3½-inch pots, 20 cts. each; field-grown plants, 25 cts. to 50 cts. each.

PRICES OF ROSES IN QUANTITIES

Varieties quoted at 10 cts. each.....	\$1 00 per doz.	Varieties quoted at 25 cts. each	\$2 50 per doz.
" " 15 " "	1 50 "	" " 35 " "	3 50 "
" " 20 " "	2 00 "	" " 50 " "	5 00 "

No order for less than 25 cts. accepted.

Bride. A lovely pure white, very fragrant Rose. The buds have more substance than Niphetos, are very full and double, and possess the good characteristics of Catherine Mermet. The outside of the petals is sometimes tinged with pink. Field-grown, 25 cts.

Bougere. Color violet-crimson, delicately shaded with violet. Field-grown, 25 cts.

Bridesmaid. This is an improvement on the world-renowned Catherine Mermet. About the same shade as the famous Duchess of Albany, the deep red La

TEA ROSES, continued

France, and, strange to say, both of these sports bloom more freely than their parent, while in growth, foliage, etc., there is no perceptible difference. 10 cts.; field-grown, 25 cts.

Bon Silene. Deep rose; semi-double; beautiful in bud; very fragrant and free-flowering. Field-grown, 25c.

Catherine Mermet. Clear flesh, with silvery luster, like La France. Large, well-formed, exquisite buds. Considered the finest of all the Tea Roses. Field-grown, 25 cts.

Clara Watson. Salmon and pink; extremely free in bloom; a vigorous grower, with handsome foliage. A new English variety, highly recommended as a bedder. 15 cts.; field-grown, 35 cts.

Coquette de Lyon. Vigorous, rapid grower and constant bloomer. Pure canary yellow. Field-grown, 25 cts.

Clothilde Soupert. For freedom of bloom, beauty of form and delicacy of coloring, we know of no Rose superior to this. It is a strong, vigorous grower. The flowers are large, double and beautiful in form, and borne in sprays; the color blends from soft shell-pink to pure satiny white. 10 cts.; field-grown, 25 cts.

Devoniensis (the Magnolia Rose). Beautiful creamy white, with rose center; large, full and double; delightfully sweet Tea scent. An old and well-known Rose, that has never been surpassed. 15 cts.; field-grown, 35 cts.

Duchesse de Brabant. Soft, rosy flesh, changing to deep rose; very free in bloom, and valuable. Field-grown, 25 cts.

Etoile de Lyon. A magnificent Tea Rose, of brilliant chrome-yellow, with center of pure golden yellow. Field-grown, 25 cts.

General Jacqueminot. A rich, velvety crimson, changing to scarlet-crimson. A magnificent Rose, equally good in the bud state or open. This is the best known of all Hybrid Perpetuals, and is without a rival in fragrance and richness of color. It is, moreover, as easy of cultivation as many of the more common varieties, and perfectly hardy. 15 cts.; field-grown, 35 cts.

Duchess of Albany. One of the finest Roses we have seen, not excepting La France, with which it is identical, except that it is of more vigorous growth, and has a larger and more expanded flower of deep, even pink. 10 cts.; field-grown, 25 cts.

Golden Gate. A promising Rose of American origin, and one that seems to be admirably adapted to the needs of our climate. The flowers are large, very full and finely formed, and of excellent substance; the buds are long and of a most desirable form; the color is rich, creamy white, beautifully tinged with fine golden yellow; the petals are large and broad, and exquisitely bordered and tinted with clear rose, making altogether a Rose of rare beauty. 10c.; field-grown, 25 cts.

BUD OF ETOILE DE LYON.

Grace Darling. One of the most elegant Roses, ever our pleasure to behold. Color a porcelain rose, elegantly shaded with vinous crimson, a decided color but never quite obscuring the ground of beautiful yellow upon which it rests. The colors seem to stand out separate and distinct. Very sweet. A veritable beauty. 15 cts.; no field-grown.

Hermosa. The well-known garden Rose. Light pink. Field-grown, 25 cts.

Ivory. A "sport" from the fine old variety Golden Gate. Ivory embodies all the good points of its parent,—size, freedom of bloom and strong, vigorous, healthy growth,—with a pure white color which makes it an invaluable acquisition to the list of forcing Roses. It has received highest honors wherever shown. Small plants, 10 cts.; no field-grown.

Jules Finger. Bright rosy-scarlet and intense crimson. No field-grown plants.

J. B. Varrone. One of the finest Teas of later years; very high shade of red in the opening bud, which is long and pointed; fine double flower of varying shades of red and rose. One of the very freest; habit grand. 15 cts.; field-grown, 35 cts.

Kaiserin Augusta Victoria. This seems destined to become the leading white Rose in cultivation. We have white Roses with elegant buds, but the full-blown flowers are not so handsome. Again, we have white Roses elegant when full blown, but with poor buds. This Rose combines both these good qualities. It is a continuous bloomer, producing successive crops of buds and flowers in the greatest profusion. The buds are beautifully formed, with large petals of the best substance; the flowers show no center when fully open; color pure snowy white; very fragrant, and a vigorous grower. 15 cts.; field-grown, 35 cts.

La France. (H. T.) One of the most beautiful of all Roses, and unequaled by any in its delicious fragrance. Flowers very large, double, and superbly formed. The prevailing color is light, silvery rose, shaded with silvery peach, and often with pink. Field-grown, 25 cts.

GENERAL JACQUEMINOT.

METEOR.

Mad. Joseph Schwartz. Light salmon-rose; extra fine in its blooming habits. Field-grown, 25 cts.

Mad. Welche. An extra fine variety. Very large, double, and of beautifully rounded form; color soft, pale yellow, sometimes cream, with short inner petals of glowing orange and copper. Not to be forgotten when once seen. Vigorous in habit. The rich color of the flowers varies with the soil. 10 cts.; field-grown, 25 cts.

Maman Cochet. A vigorous grower, with beautiful foliage. In bud it resembles the Mermet family, being long and shapely, borne on long, stiff stems. It is of the largest size, and the flower is built up or rounded, and very double. The color is a deep rose-pink, the inner side of the petals being a silver-rose, shaded and touched with golden yellow. Pronounced to be the finest Rose by far that has been introduced from France in the last five years. 10 cts.; field-grown, 25 cts.

Marie Guillot. Perfect in form; large, full and pure white. This Rose should be planted more extensively, as it is never disappointing. The blossoms are always of the purest white, never showing the pink or cream tinge so often seen in other white Roses. It is always full and double and simply perfection in form; does not come thin or single in summer, as do so many Roses. 15 cts.; field-grown, 35 cts.

Marie Van Houtte. Pale yellow; an excellent bedding variety. No field-grown.

Marion Dingee. A splendid Rose, with large cup-shaped flowers of a deep crimson, changing to carmine. Field-grown, 25 cts.

Meteor. A pure Tea. Flowers rich, dark, velvety crimson; plant strong, clean, vigorous grower, like Bon Silene but with flowers larger and more double. The richest colored Everblooming Tea Rose yet introduced; very distinct, grows and blooms in remarkable profusion outside as a bedding Rose. Field-grown, 25 cts.

Mlle. Francisca Kruger. It is closely allied to Catherine Mermet, and resembles it in everything save color. In its shading of deep coppery yellow, it stands unique and distinct from all other Roses. The flower, when open, is of good size and very symmetrical. 10 cts.; field-grown, 25 cts.

Mme. Margottin. Rich saffron-orange, of fine form; a most desirable bedding Rose. Field-grown, 25 cts.

Mrs. De Graw. Rich, glossy pink. Such a strong grower that it is almost proof against attacks of insects. For gardens or cemetery plants it has no equal; is never seen without a profuse crop of flowers. Grows and blooms well in almost any situation. Field-grown, 25c.

Princess Bonnie. A free-flowering crimson Rose; a good grower, good bloomer and very fragrant. 10 cts.; field-grown, 25 cts.

Paul Neyron. The largest-flowering Rose in cultivation and one of the most prolific bloomers; color deep clear rose; very fresh and attractive. The plant is an exceptionally good grower, making straight shoots 4 to 5 feet high in one season, each shoot tipped with an immense flower, often 5 inches in diameter. We always recommend Paul Neyron when a good, hardy pink or rose-colored Rose is desired. 15 cents; field-grown, 35 cts.

Perle des Jardins. Without doubt the finest yellow Rose in cultivation. Canary or golden yellow; flowers large and beautifully formed; handsome in every stage of development. Field-grown, 35 cts.

Pierre Guillot. Deepest crimson. A grand Rose. 10 cts.; field-grown, 35 cts.

Sombreuil. Creamy white, tinted with rose; very large. 10 cts.; field-grown, 25 cts.

MLLE. FRANCISCA KRUGER.

TEA ROSES, continued

Souvenir de la Malmaison. Flowers extremely large, quartered and double; flesh white. Field-grown, 25 cts.

Souvenir de Wootton. Color velvety red, equal to Jacqueminot. Double; good in bud, half open, or fully expanded. Fully opened flowers frequently measure 6 inches in diameter. 15 cts.; field-grown, 35 cts.

Sunset. This grand, richly colored Rose is a great favorite wherever known; the color is a rich golden amber or old-gold, elegantly shaded with dark ruddy crimson, resembling the beautiful tints seen in a summer sunset; the flowers and buds are extra large, full, finely formed and deliciously perfumed; it is a strong and vigorous grower and free bloomer, highly recommended both for open ground and house culture. Small plants only, 15 cts.; field-grown, 35 cts.

The Queen. We have never grown a white Tea Rose that has given us so much general satisfaction as the Queen. It is a sport from Souv. d'un Ami, and possesses its many good qualities in a remarkable degree. It has a pure white flower, and makes good, finely formed buds; quite full and double, and very fragrant. The substance of the flowers is very thick

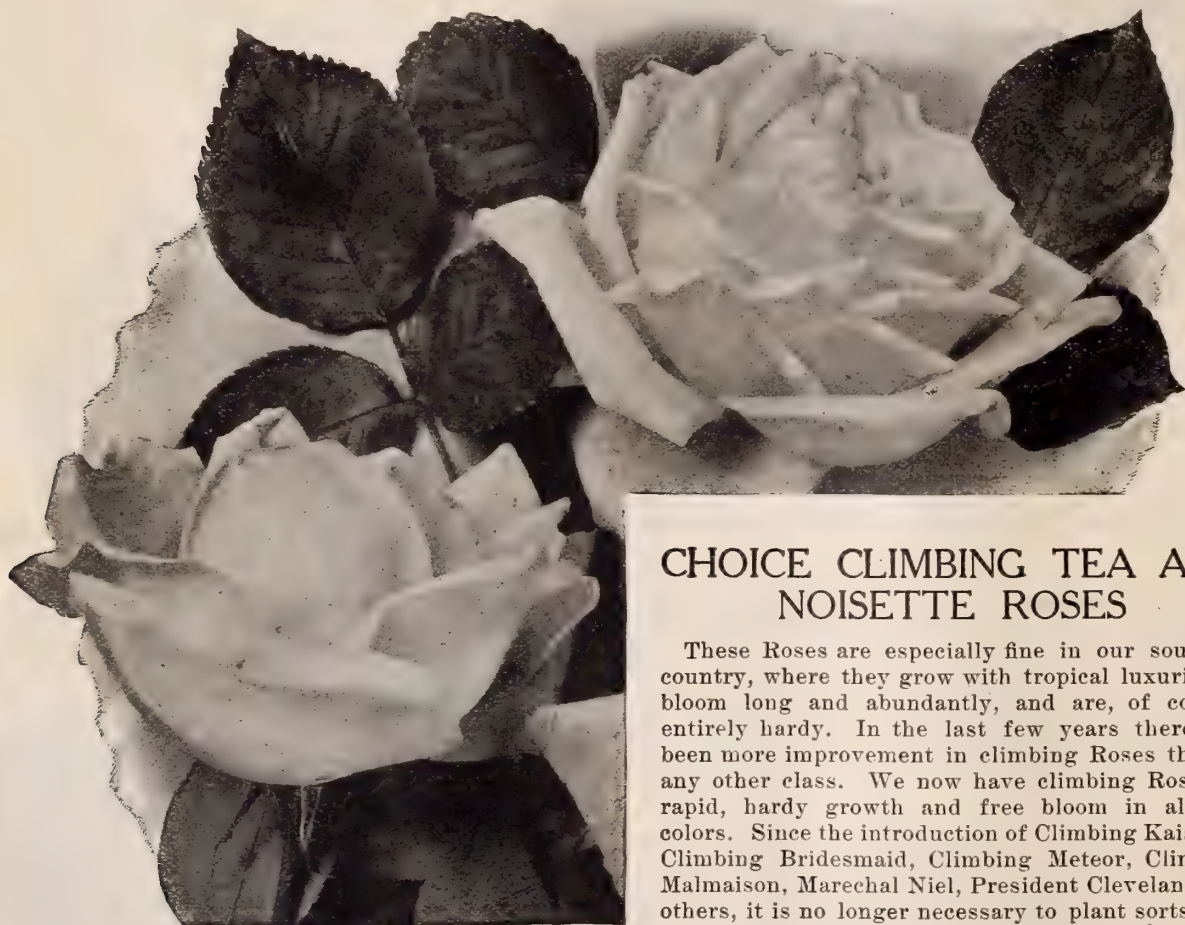

and waxy, so that they last a long time after cutting. 15 cts.; field-grown, 25 cts.

Triomphe de Pernet Pere. Bright, shaded red, with slightly recurved petals; elegant buds, full and double. A continuous bloomer, very brilliant and handsome. Excellent for bedding. 10c.; field-grown, 25c.

Viscountess Folkestone. The flower is almost white, delicately tinted with flesh, and as lustrous as satin. When full blown it is like a fine white peony, but without the least stiffness. 10c.; field-grown, 25c.

White La France. This is really a beautiful Rose, and most desirable, but if you expect a pure white Rose you will be disappointed. It is identical with La France, except in color, which is pearly white, sometimes tinged with fawn. This is one of the most striking and beautiful Roses to be found on our grounds. 10 cts.; field-grown, 25 cts.

White Maman Cochet. This American sport of the grand French variety is very likely to prove the very best of white bedders; wherever outdoor Roses are grown Maman Cochet is a favorite; it is so extremely large, rounded and full. All this can also be said of its white sport. 10 cts.; field-grown, 25 cts.

CLIMBING MARECHAL NIEL ROSE.

CHOICE CLIMBING TEA AND NOISETTE ROSES

These Roses are especially fine in our southern country, where they grow with tropical luxuriance, bloom long and abundantly, and are, of course, entirely hardy. In the last few years there has been more improvement in climbing Roses than in any other class. We now have climbing Roses of rapid, hardy growth and free bloom in all the colors. Since the introduction of Climbing Kaiserin, Climbing Bridesmaid, Climbing Meteor, Climbing Malmaison, Marechal Niel, President Cleveland and others, it is no longer necessary to plant sorts with semi-double flowers or that bloom only in spring. Climbing Roses should not be cut back in winter, like other sorts, because the best crop of bloom always comes from the old wood of the last season's growth.

Celine Forester. Beautifully shaded flowers of a soft, rich yellow, deepening toward the center. The hardiest of the Tea-scented Roses.

Chromatella, or Cloth of Gold. Golden yellow; fragrant, large and beautiful. 10c.; field-grown, 25c.

Crimson Rambler. Strong grower, very hardy; rich crimson. Blooms in clusters. Annual bloomer. Field-grown, 35 cts.

Climbing Bridesmaid. This is the everblooming pink climber, with flowers full and double, a free bloom and strong growth so long desired. This is a Rose that has all these good points. All who are familiar

with Bridesmaid, and know how near perfection it is in a pink Rose, will see at once the value of Climbing Bridesmaid. Small plants, 10 cts.; field-grown, 25 cts.

Climbing Clothilde Soupert. Clothilde Soupert is one of the most popular Roses grown, filling a place all its own, and for which there is no substitute. The Climbing Clothilde has the same free, vigorous habit and strong constitution; it is extremely hardy, withstanding zero weather and producing its fine clusters in profusion. This promises to prove the most valuable climbing sport of any everblooming Rose. 15 cts.; field-grown, 35 cts.

Climbing Paul Neyron. (Madame Wagram.) A grand new Rose. Paul Neyron has always been known as the largest Rose extant. In Climbing Paul Neyron we have this large size, coupled with its bright, fresh pink color that no Rose excels. And it is also a true perpetual bloomer. The freest of all climbers. This Rose is a wonder. Be sure and try it. Small plants, 15 cts.; strong field-grown, 35 cts.

Climbing Kaiserin Augusta Victoria. It is an offspring of that grand variety Kaiserin Augusta Victoria, and is the first white hardy everblooming climbing Rose. The flowers are extra large, full, deep and double. They are of excellent substance and produced on long stiff stems like a forcing Rose; in fact, both in bud and flower this grand new variety is superior in grace and finish to any white Rose grown for cutting. The buds are long and pointed, a remarkable feature not found in any other climbing Rose; the fragrance is delicious. The most remarkable feature of this climber, however, is that it blooms continuously the first year. Then it is absolutely hardy, and its flowers are truly beautiful. If you want a quick-growing hardy climbing Rose that will give you flowers this year, this is the only white variety that will do it. It grows to perfection outdoors, sending up numerous shoots 10 to 15 feet high in a single season. This variety is the same as Mrs. Robert Peary. Be sure to try it. 15 cts.; field-grown, 35 cts.

Climbing Wootton. (Climbing Tea.) A climbing variety of this fine red Rose that is bound to be very popular. It is a very strong, rapid grower, with long, thick canes, bearing large clusters of true Woottons. In the South and on the Pacific slope this will be of the greatest value, as a free-blooming red climber has always been in great demand. Small plants, 15 cts.; field-grown, 35 cts.

Climbing Malmaison. This is identical with the old Malmaison, except that it is a very vigorous climber. This is already a fixture in our list of climbing Roses from its decided merit. 15 cts.; field-grown, 35 cts.

Climbing Meteor. This new Rose might, from its rich red color, almost be called a Perpetual Blooming Climbing General Jacqueminot. Buds exquisite; flowers large, beautifully shaped, and of that rich, velvety crimson seen only in Jacqueminot. 15 cts.; field-grown, 35 cts.

Marechal Niel. A beautiful deep sulphur-yellow; full, large and exceedingly sweet; still the finest yellow Rose in existence. It has a climbing habit, and yields thousands of beautiful flowers. Foliage large, smooth, rich green. Large budded plants, \$1; smaller budded plants, 50 cts., small plants on own roots, 10 cts.

President Cleveland. (Climbing Marie Guillot.) A glorious new Rose. It is one of the most rapid-growing, vigorous climbing and an exceedingly healthy Rose, with every attribute that a perfect Rose should have. The flowers are magnificently made, extra large, deep and double. The buds are particularly beautiful and the fragrance delightful. The color is pure snow-

white, sometimes faintly tinged toward the center with pale yellow. It will bloom the whole year in the far South, and wherever Marechal Niel is grown this variety will undoubtedly equal it in beauty of flowers and surpass it in vigor of growth. 15 cts.; field-grown, 35 cts.

Reine Marie Henriette. Bright cherry-red, of a pure shade; a strong, vigorous grower. The most brilliant of climbers except Crimson Rambler. Field-grown, 25 cts.

Washington. Of medium size, pure white, double; blooms in clusters. Strong grower, quite hardy. Field-grown, 25 cts.

CLIMBING KAISERIN
AUGUSTA VICTORIA.

HARDY WATER LILY (*Nymphaea odorata gigantea*)

This is a gigantic form of the common white Water Lily. We have measured leaves of it which were 22 inches in diameter, and flowers 8 inches across. The leaves are very thick and heavy. Their edges are curiously ruffled, and in some instances turned up, forming a rim after the manner of *Victoria regia*. Flowers fragrant, pure white, with a golden yellow center, of a decided cup-shape and a very distinct appearance. Begins to flower very early in the spring and continues to bloom profusely until frost. 20 cts.

HEDGE PLANTS

These Hedge Plants, used instead of unsightly and expensive wooden fences, are most valuable, economical and ornamental. Live hedges increase yearly, and are usually very satisfactory, both in appearance and as a protection against trespass.

BOX, Tree. Beautiful evergreen hedge; not thrifty in sand, but quite so in clay or black land, where it always does well. Small plants for borders, \$5 per 100.

ARBORVITAE, Chinese. Evergreen; makes a fast-growing, ornamental hedge when neatly pruned; rich color. 18 to 24 inches, \$20 per 100.

EUONYMUS Japonica. \$10 per 100.

PRIVET, California. Nearly evergreen; a strong pyramidal shrub, with bright green leaves and white flowers; makes a most desirable hedge; grows very rapidly when trimmed in any shape. \$3.50 per 100; 2-year, \$5 per 100.

HARDY ORANGE. For description, see page 46. Small plants, \$5 per 100.

Hardy Climbing Plants

The hardy climbers are simply indispensable for many ornamental uses. By planting them about an unsightly fence or old stump, it can be turned into an object of living beauty, and thus become a delight rather than an offense to the observer. Our assortment is select.

Price, except where noted, 25 cts. each, \$2.50 per doz.

AMPELOPSIS quinquefolia. A strong grower and rapid climber, with rich green foliage, changing to bright red in the autumn. The foliage is large and not so glossy as the following. When trained over a building, fasten the stems to the wall in some way, or storms will tear them off.

Veitchii. A hardy Ampelopsis of Japanese origin. It grows as rapidly as the old Virginia Creeper, and attains a height of 50 feet. It clings firmly to any wall, tree, etc. The leaves are small on young plants, which at first are of an olive-green brownish color, changing to bright scarlet in the autumn.

CHINESE WISTARIA.

Ampelopsis Veitchii, continued

As the plant acquires age the leaves increase in size. This variety becomes more popular every season, as it becomes more widely known, and is without question one of the very best climbing plants for covering brick or stone walls that can be grown. 2-yr., 25 cts.; extra strong, 3-yr., 50 cts. each.

BIGNONIA grandiflora, or **Trumpet Creeper.**

An extremely hardy and rapid-growing vine, always growing and blooming luxuriantly under the most unfavorable conditions; blossoms trumpet-shaped, scarlet, and borne in clusters. May be trained to standard form.

HONEYSUCKLE. Still remains the most popular vine; it has every qualification to recommend it—beautiful foliage, fragrant and lovely flowers, ever-blooming habit and evergreen leaves. Covers porch or trellis very rapidly.

Chinese Evergreen. White, buff and pink; delightfully fragrant.

Golden Netted. Foliage variegated* with yellow veins and blotches; flowers white and cream-colored.

Belgian, or European Sweet. Sometimes called Monthly Fragrant or Dutch Honeysuckle. A fine, hardy grower; flowers large and exceedingly sweet, buff, yellow and red. Constant-blooming.

Scarlet Trumpet, or Red Coral. A rapid grower, with bright red, trumpet-shaped flowers. This is the old, well-known variety.

Hall's. Beautiful dark green, with glossy foliage; flowers white and buff, with a strong jasmine odor. 35 cts.

IVY, English. Evergreen and hardy; the richest foliage of any vine. Our plants are very healthy and vigorous, and will be sure to live, as they have all been grown outdoors in pots.

WISTARIA, Chinese Purple. One of the handsomest vines in cultivation, producing long, pendulous clusters of blue flowers in the greatest profusion. 25 cts.

White. 50 cts.

CLIMBING ROSES. See page 28.

CLEMATIS. See page 41.

☞ Other vines of rapid growth at market prices.

Ornamental Grasses

For large beds or groups on the lawn these tall-growing, graceful Grasses give beautiful effects. In many of the finest public parks they are now given prominent positions. The spikelets, or plume-like heads, are also used in a dry state for winter decorations. The following are favorite sorts.

ARUNDO Donax variegata (Ribbon Grass). This scarce and beautiful variety is one of the most stately of silvery variegated reed-like plants, and one that can be used either as a single specimen or in groups; its graceful foliage is creamy white and green striped. Makes a superb specimen on a large lawn. 25 cts.

ERIANTHUS Ravennae. Attains the height of 10 or 12 feet, throwing up numerous flower-spikes of a grayish white color; blooms profusely for a long time. 25 cts.

PENNISETUM Longistylum. (See page 47.)

EULALIA Japonica. A hardy perennial from Japan, with long, narrow leaves, striped with green and white. It sends up stalks 4 to 6 feet high, terminating with a cluster of flower-spikes, on which the individual flowers are arranged. 25 cts.

E. Japonica zebrina. Striking and distinct. Unlike most plants with variegated foliage, the striping or marking is across the leaves instead of longitudinal, the leaves being striped every 2 or 3 inches with a band of yellow $\frac{1}{2}$ inch wide. 25 cts.

General Collection of Greenhouse and Bedding Plants

ABUTILONS

Beautiful and very popular plants of easy culture, growing from 2 to 3 feet high. They are fine for bedding out during the summer, being a mass of bloom all the while. If kept in pots in summer, they will bloom very freely in the winter. They cannot be too highly recommended, being entirely free from insects of every kind, and will thrive with but little attention. Several varieties in all the leading colors. 10 cts. each, \$1 per doz.

AMARYLLIS

Belladonna major. White and rose, A free and continuous bloomer; hardy and quite attractive. 25 cts.

Formosissima (Jacobæan Lily). Crimson velvety blooms; the plants flower early in summer. 20 cts.

Fine Hybrids of Johnsonii. These are very showy and admirably adapted for pot culture, blooming almost every two months. The flowers are brilliant vermillion, striped with white. The bulbs must be kept at rest for two or three months every year, or planted in the open ground every summer. One of the surest blooming species. Price, according to size, 50 cts., 75 cts., \$1 and \$1.50.

ANTHERICUM VARIEGATUM

Valuable as a decorative plant, being suitable either for the greenhouse, parlor or dinner-table. The foliage is bright grass-green, beautifully striped and margined with creamy white. 15 cts.

ANTIGONON LEPTOPUS

("Mountain Rose," or "Queen's Wreath.")

A lovely climber from central Mexico, with beautiful rose-colored flowers in racemes 2 feet long. The profusion of bloom is such as to give the appearance of roses at a distance; hence its Mexican name, "Rosa de Montana," or Mountain Rose. It is moderately hardy with protection; the vines are killed to the ground by frost, but grow and bloom the next spring. Strong roots, 25 cts.; extra strong, 2 yrs., 50 cts.

ANTIRRHINUM.

ABUTILON.

ALOYSIA CITRIODORA

(Lemon Verbena)

A shrubby plant, with fragrant, lemon-scented leaves; useful in bouquets and vases of cut-flowers; can be kept from year to year in increasing beauty. 10 cts.

ALTERNANTHERA

Aurea nana. Bright golden yellow under the sun of summer; very dwarf and compact. 10 cts. each, 50 cts. per doz.

Paronychioides major. This and *A. aurea nana* form the two great bedding varieties of Alternanthera for this climate. Leaves crimson, green and straw color. 10 cts. each, 50 cts. per doz.

ALYSSUM, SWEET

A useful class of plants for hanging baskets, vases, pots, bedding out or winter blooming, producing fragrant white flowers in great abundance. It continues to bloom the entire season, and is easily cultivated. One of the most useful of summer flowers. 10 cts. each, 50 cts. per doz.

ANTIRRHINUM (Snapdragon)

We offer this year an unusually fine lot of Antirrhinums, seedlings from seed saved from the finest and most beautiful flaked, mottled and striped varieties in cultivation. 10 cts. each, 50 cts. per doz.

ASPARAGUS PLUMOSUS NANUS.

ARAUCARIA EXCELSA

(Norfolk Island Pine)

The dark green branches are arranged in symmetrical whorls. Give the same treatment as any ordinary house plant, in regard to soil, watering, heat and ventilation, and, in addition, syringe the foliage freely every day with fresh water. Must be sent by express; too large to mail. 12 inches, \$1.50; 18 to 20 inches, \$3.

ASPARAGUS

Plumosus nanus. One of the handsomest of our foliage plants. The leaves are bright green, gracefully arched, and as finely woven as the finest silken mesh. Their lasting qualities when cut are remarkable; they retain their freshness for weeks, hence the plant ranks as the most valuable plant we have for bouquets, surpassing Maidenhair Fern in grace, fineness of texture and richness of color. 15 cts., 25 cts. and 50 cts.

Sprengeri. A most desirable new species, especially useful to grow as a pot-plant for decorative purposes or for planting in suspended baskets; the fronds are frequently 4 feet long, of a rich shade of green, and most useful for cutting, retaining their freshness for weeks after being cut. It will make an excellent house plant, as it withstands dry atmosphere, and will succeed in almost any position. The most satisfactory basket plant we know. Buy one and you will be pleased with it. Strong young plants, 15 cts.; larger, 25 cts.; extra large, 50 cts. and \$1.

AZALEA INDICA.

ASPIDISTRA LURIDA

Beautiful plant, with large, lance-shaped leaves. An elegant window or conservatory plant of the easiest culture, of strong growth; will succeed in any position; an excellent hall or corridor plant. 25 cts. and 50 cts.

ASTER (Summer Chrysanthemum)

Beautiful, summer-blooming, chrysanthemum-like flowers, of all shades of blue, pink, crimson and white. Mixed colors, from best strains. 10 cts. each, 50 cts. per doz.

AZALEA INDICA

A greenhouse plant, with flowers unsurpassed in beauty, of rich color and borne in large clusters above the small leaves. The plants bloom from January to April. If selection is left to us, we cannot fail to please. Our stock of single and double Azaleas in white, variegated or solid colors is unusually fine this year. We offer large, fine plants, full of buds ready to open into beautiful flowers, for from \$1.50 up to \$4.

ARAUCARIA EXCELSA.

BALSAM

These are easy-growing annuals, free bloomers, and well suited to this climate. Best varieties, mixed colors. 5 cts. each, 40 cts. per doz.

BANANA

The Banana makes a very showy tropical plant for outdoor culture. It delights in rich soil and plenty of water. The plants in this part of the state must be taken up in winter and placed in pit or cellar. The leaves may be cut off in winter. 50 cts. to \$3 each, according to size.

BOUGAINVILLEA GLABRA SANDERIANA

Often called "Chinese Paper Plant," on account of the lasting qualities of the flowers (or bracts). The color is soft, rosy crimson, and when in full bloom the plant is both beautiful and interesting. 20 cts.

BEGONIAS

Treated as geraniums and many other pot-plants, Begonias will be a failure. So many ladies have failed with their Begonias that many of them are discouraged, and do not care to be "bothered with them any more." Yet, when once you learn their requirements, they can be grown as easily as weeds. They need plenty of pot room, good drainage, moist soil and atmosphere and but little sun. Never put them in the sun or wind, though they need light. Use two-thirds of rich potting soil and one-third coarse clean sand. Water them frequently, and sprinkle the benches or floor, or keep a pan of water in the room to prevent the air from becoming dry.

Price of all varieties, except where noted, 10 cts. each, \$1 per doz.

FLOWERS OF BEGONIA RUBRA.

Alba picta. Very ornamental; has long, ear-shaped medium-sized leaves of the darkest green, with silvery spots.

Argentea guttata. A cross between Olbia and Alba picta, with the silvery blotches of Alba picta and the form and beauty of Olbia. Purple-bronze leaves, oblong in shape, with silvery markings; white flowers, borne on the tips of stems.

Erfordia. We recommend this variety as being one of the very best. It grows in symmetrical, compact form, with shining green foliage, and is continually covered with clusters of rosy salmon flowers. One of the most prolific blooming of the family.

Lobata variegata. Glossy green foliage, covered with small white spots; fine, erect grower. 15 cts.

Marguerite. Somewhat like Metallica, but more bushy in form; leaves bronzy green; large trusses of light rose-colored flowers freely produced. A better market variety than Metallica.

Metallica. A fine, erect-growing Begonia, with dark, rough leaves; the surface is lustrous bronze-green, vein depressed and dark red; a free bloomer. The panicles of unopened buds are bright red, with a surface like plush; when open, the flower is waxen pink. A splendid house plant.

M. de Lesseps. In the style of Argentea guttata, but with much larger leaves, beautifully spotted with silver. A very strong-growing sort.

President Carnot. A remarkably strong-growing variety, of stiff, upright habit; foliage very large; flowers beautiful coral-red, in large, pendent panicles similar to Rubra's, but very much larger. 15 cts.

Rubra. This is one of the finest acquisitions to our winter-flowering plants; the leaves are dark green, the flowers large, ruby-red, glossy and wax-like. This peculiarity is so marked that when plants are potted singly in a room their glossy appearance gives the idea that they are artificial. Popular wherever known. 10c.

Semperflorens gigantea rosea. A superb variety of strong, upright growth. Large flowers of clear cardinal-red, the bud exceeded in beauty only by the open flower, which is borne on a strong, thick stem. The leaves are smooth and glossy and attached closely to the main stem; both leaf and stem are quite upright-growing, forming a shrubby, round plant. 20c.

Sandersii. An old and popular variety, with bright, glossy green foliage and scarlet flowers; stands the sun well; splendid center plant for baskets or vases.

Vernon. This excellent variety is of unusual merit as a bedding sort, flowering as freely when planted out as when grown as a pot-plant. It begins flowering when first planted and continues throughout the whole season until stopped by frost. Foliage rich, glossy green, often shaded with deep bronze. The flowers on first opening are deep red, changing to a beautiful clear rose when fully open. It thrives everywhere, and is destined to become one of the most popular bedding plants. 15 cts.

Weltoniensis. A very handsome winter-flowering variety, giving in profusion its lovely pink flowers; of easy culture.

Bertha de Chateaurocher. This is the freest-flowering Begonia we have. It blooms the year round, makes a handsome window plant, with its beautiful foliage and bright currant-red flowers. 15 cts.

McBethii. Shrubby in growth, with very deeply indented leaves, which are fine and small. Very free-flowering, being constant the year round. A fine summer bedding plant if given light soil and perfect shade. Put it among your ferns. White flowers, waxy texture. Carried in panicles.

Manicata aurea. Large, glossy leaves, beautifully blotched with creamy white, carmine etchings in the mature leaves. Flowers delicate blush-white on long stems. It is easily grown and is one of the finest ornamental foliage plants for the house imaginable. 15c.

NEW TRAILING BEGONIA, MARJORIE DAW

This Begonia is distinct from all other Begonias, for instead of growing upright it droops. It bears great clusters of large, shining pink flowers that droop from the long stems, making a beautiful sight. For single specimen pot-plants or for baskets and vases "Marjorie Daw" is proving one of the best plant introductions in years. 20 cts.

REX BEGONIA, SPECULATA

Leaves are bright green, with a background of chocolate; veins light pea-green, the whole leaf spotted with silver. In bloom it is magnificent; the panicles, composed of numerous individual pink blooms, are lifted high and spray-like quite clear of the foliage. 20 cts.

Several other varieties of Rex Begonia, 25 cts. each.

BEGONIAS, TUBEROUS-ROOTED

A class of bulbs that is now very popular, as their coloring is bright and flowers large and lasting. They do well in any ordinary living-room or conservatory, and will send out masses of beautiful bright flowers. They delight in a partially shaded location in soil composed of leaf-mold, sand and well-rotted manure. Dry bulbs, 20 cts. each, \$2 per doz. Large plants, in bud or bloom (after May 1), 50 cts.

BRILLIANT CANNAS

Cannas should have rich soil and plenty of water, and should be planted in a bed by themselves, or with such plants as bananas and caladiums.

Price, except where noted, 10 cts. each, \$1 per doz. If large quantities are wanted, for special prices.

ALLEMANIA. Produces the largest flowers which have been obtained from any Canna. The outer petals are scarlet, with a very broad, golden yellow border. The inside of the bloom is scarlet and dark red. Exceedingly beautiful. The plant grows 6 feet high.

Alphonse Bouvier. Green foliage; color bright crimson, flowers large. A grand red. Resembles Ehemanni in habit of flower-spike. 6 feet.

AUSTRIA. Massive clumps 6 to 7 feet high. Plants set out early in the season will before midsummer form clumps with 20 to 30 strong stems, each stem surmounted by tall spikes of golden yellow flowers standing upright like immense lilies.

BLACK BEAUTY. In the large display of Cannas at the Pan-American Exposition, probably no variety attracted so much attention and proved so effective as Black Beauty; and, while its flowers are small and insignificant, the massive foliage of the plant is of such an intense rich color as at once to place it at the head of the list of ornamental bedding plants, where foliage or subtropical effect is wanted. The plant grows 5 to 6 feet high, with foliage of the richest glistening bronzy purple color, shaded with black, the leaves having peculiar crimped, wavy margins. 25 cts. each, \$2.50 per doz.

Charles Henderson. A splendid dwarf, compact grower, throwing up erect, compact heads of bloom of immense size. Color dark crimson, center of the flowers marked with gold pencilings.

Egandale. Bronze foliage; strong, compact flower-spikes; color currant-red. The finest Canna of its color. 4 feet.

Florence Vaughan. A grand yellow, of bright golden shade, heavily dotted with red; very broad petals, forming an elegant flower.

Italia. Flowers nearly as large as those of Austria; bright golden yellow, with a large blotch of bright scarlet on each petal, in the style of Queen Charlotte, but the lower petal is usually two inches wide.

Madame Crozy. Immense flower-heads of the deepest vermilion, gold-bordered; petals very wide, foliage green. It is the standard Canna. 4 feet.

Paul Marquant. Green foliage; strong flower-spikes; large flower; a deep salmon color, smoothly shaded orange; petals are wide. 4½ feet.

MADAME CROZY CANNA.

Queen Charlotte. The center of the flower is bright scarlet, bordered with a wide band of pure gold, encircling each petal, which produces a very novel and beautiful effect.

Red Indian. Height 4 to 4½ feet, the finest of bronze-leaved Cannas, sending up numerous flower-stalks well above the foliage. Each stalk carries from five to six flowering spikes. Color deep scarlet; flowers make a grand contrasting effect. 20 cts.

CALADIUM ESCULENTUM

One of the most striking ornamental foliage plants in cultivation, either for pot or lawn planting, a full-sized plant being 4 or 5 feet in height, with immense leaves. The roots should be preserved in dry sand in the cellar during winter. 25 cts.; extra large, 50 cts.

FANCY-LEAVED CALADIUMS

Among ornamental foliage plants none are more beautiful in design or gorgeous in coloring than the Fancy-leaved Caladiums. They are simply wonderful in the colorings and markings of the leaves. Some idea of the manner of these variegations may be formed from our cut, but an artist's brush could not portray the exquisite colors and marvelous combinations. One variety may be regularly dotted with round, raised spots of white on a ground of emerald green; another be ribbed with pink or scarlet and sprinkled with silver spangles; while a third may be splashed and marbled with white or shaded almost black. As the tubers become old, enormous specimens may be produced. They are of special value for pot culture and for window and piazza boxes. 20 cts. each, \$2 per doz.

CEREUS GRANDIFLORUS

(Night-blooming Cereus)

Flowers straw color, 9 to 11 inches across; remarkable for beauty and sweetness; they begin to open about 7 P. M. and continue until after midnight. The most popular and grandest species of cactus in cultivation anywhere. 15 cts.

FANCY-LEAVED CALADIUM.

CARNATIONS

The Carnation is the great florists' flower, and millions of dollars are invested in the growing of them for cut-flowers. New varieties are being introduced every year to supersede some old favorite. Nearly all the varieties grown today take the places of what were new only a few years ago. Many of the varieties we grow now are the best to be had anywhere, but they will be in a few years displaced by a still better list.

Carnations are almost hardy here, and can easily be kept through the winter by slightly covering the plant with leaves or straw during the coldest weather. Young plants should be set out early in the spring, that they may become thoroughly established in the ground before our hot weather comes; otherwise they will not bloom freely through the summer. If wanted for winter blooming in the house, pinch off all buds as they appear in the summer, and in October take up the plants, pot them, and keep them in a moderately cool room. Water moderately.

Price, except where noted, 10 cts. each, 75 cts. per doz.

America. Color pure, light scarlet, of soft, even shade. It is very early in coming into bloom and its strongest points are its freedom of bloom, easy culture and great size.

Armazindy. One of the most showy of the whole collection of fancy Carnations. Flowers very large and full, with center petal standing erect, giving the bloom a beautiful, well-rounded form. Habit of plant strong and vigorous. An even and constant bloomer from early to late. Color clear white, heavily edged and striped with bright scarlet. 15 cts.

G. H. Crane. This is unquestionably the very finest scarlet Carnation grown today.

Cressbrook. Received a score of 94 points at the meeting of the American Carnation Society. An exceedingly fine grower, with bright pink flowers of good size and strong, wiry stem. Calyx seldom, if ever, bursts, and, taken all together, we consider it one of the best of newer varieties. 15 cts.

El Dorado. Deep golden yellow, daintily penciled with red; the best of its color.

Flora Hill. Probably the best known of all white Carnations. Entirely free from disease, and will furnish more flowers than any other white variety in our list.

Golden Beauty. A beautiful clear lemon yellow, slightly tipped with pink. Flowers extra size and fragrant. Produces fine three-inch blooms, well filled and with high centers on long stems. This is the finest of all yellow Carnations. 15 cts.

Gen. Gomez. Brilliant cardinal-maroon, very double, well-fringed flower.

Jubilee. Rich, intense scarlet. An excellent large-flowered variety and one of the best reds. Blooms on straight stems 12 inches long.

Mrs. Thos. W. Lawson. It has been fully described by all the newspapers throughout the country, and is without doubt the largest pink Carnation of the present time. The flowers measure over 3½ inches in diameter. The color is a beautiful deep pink. The originator of this grand Carnation was paid \$30,000 for the original stock, the highest price ever paid for a plant novelty in this country. 15 cts.

Mrs. F. Jooste. An almost pure pink in color, showing scarcely any lavender. It combines large size with good length and stiffness of stem and strong growth. We had good results from this variety this season.

Norway. We believe this to be the very best white Carnation for all purposes. It is a strong grower and free bloomer, coming into flower early. In color it is purest white, 2½ to 3 inches in diameter, delightfully fragrant and a very good keeper.

Prosperity. The flowers are full and double, and have a delightful clove fragrance. The color is a pure white ground, overlaid with shadings of soft pink, reminding one of the beautiful tints seen in azaleas and rhododendrons. 15 cts.

Queen Louise. Purest white, produced evenly all through the season; shows a continuous display of bloom wherever tried.

The Marquis. (Marquisee.) This very large, light pink variety has already made a heavy sale, and is enthusiastically praised by florists who have been watching its development. Color, true pink, soft and rich, form exceptionally perfect, of the very largest size; stems strong, two or three feet, very fragrant and a good keeper and continuous bloomer. 2-inch pot plants, 15 cents each.

Viola Allen. Clear white, delicately splashed and laced with clear rose-pink.

White Cloud. A remarkable new white Carnation; blooms very early on strong, stiff stems and continues to bloom the entire season. Flowers large, of fine shape, and very fragrant.

MARGUERITE CARNATIONS

Very profuse-flowering; with ordinary care will be in bloom in four months after sowing the seed, and flourish equally well in open ground or in pots. The flowers range through many shades of red, pink, white, variegated, etc.; of fine form and large size. Young plants from pots, 5 cts. each, 50 cts. per doz.

CESTRUM PARQUI

(Night-blooming Jasmine)

A plant of strong, shrubby growth, with small, greenish white blossoms, having a delightful odor, which is dispensed freely during the night only; of easy cultivation. Makes a beautiful little shrub for pot culture, and has been well tested by many years of culture; is not so popular as to have become "common." 15 cts. to 25 cts.

PROSPERITY

CHRYSANTHEMUMS

The following list comprises the very cream of the many new and desirable varieties which were leading prize-winners in the Chrysanthemum shows of New York, Chicago and other large cities. Besides the new sorts offered, we still have the best of our older varieties. Every year we cull out the poor sorts and keep the best ones, so that we grow none but the best. Nearly all the varieties will grow and bloom outdoors before severe weather sets in. The later-blooming varieties, however, should be taken up, put in pots and kept in a light, moderately warm room in cold weather. In this way some varieties may be kept in bloom until Christmas. Chrysanthemums should have a very rich soil and a sunny location. Give plenty of water from the time the buds first appear till they are in full bloom. The plants should be pinched back while growing to give them good shape, and all the weaker buds should be removed. To have plants blooming in the house, take them up and put them in 6- or 8-inch pots any time during wet, cloudy weather in September. They should be well shaded for a few days until they begin growing.

NEW VARIETIES OF CHRYSANTHEMUMS

Our selection from the following list, \$1.50 per doz.

W. Duckham. This has proved to be the leading new Chrysanthemum in all the shows this season taking first prize over everything in pink. A really good pink is what everybody has been looking for, and it seems that Duckham will prove to be everything desired. The color is an exquisitely beautiful shade of pink, its form is grand, it lasts long on or off the plant, is easily grown and produces very large blooms on stiff, well-foliaged stems. 25 cts.

Harry Plumridge. Japanese incurved. A handsome, waxy white bloom of great depth and width; broad petals, well incurved; very full, fine rounded form, with outer florets curling. A nice grower; a prize-winner. 20 cts.

Percy Plumridge. A very large, Japanese, incurved variety, of buttercup yellow; bright and glistening; petals of medium width, going off to a point; very full flower, as large as Mme. Carnot, with no sign of an eye; no drooping petals; not coarse; easy to grow. Nice foliage. 20c.

Leila Filkins. A lovely shade of pink, fully 7½ inches; may be described as a pink Mrs. Packett, but does not droop its petals so much; habit very stout, with beautiful foliage. 25 cts.

Ben Wells. A monster Jap 10 inches across; bluish white, with long, narrow florets, slightly reflexed, but deep. One of the finest. 20 cts.

C. J. Salter. A splendid variety. Japanese incurved; deep canary yellow; a lovely monster, fully 9 inches across; outer petals partly quilled and drooping, while the center builds up mammoth incurved; petals narrow, tips incurving; distinct from all others. One of the strongest growers. 20c.

Mrs. Chamberlin.

A very beautiful pink variety, deepest in color in the incurving center. Florets broad horizontal or slightly drooping; has proved a general favorite. The variety is equally good as a commercial and as an exhibition sort. One of the most beautiful pinks extant. 15c.

Mlle. Douillet. One of the finest whites yet introduced; an immense bloom very slightly reflexing its petals; pure in color and exquisite in form; belongs to the Mme. Carnot family but has a stiff stem and splendid foliage. A very vigorous grower, perfecting all its blooms. A fine sort, and is a fine keeper. The early crown brings a bloom the form of a good Mayflower, and three weeks earlier than the terminal, which comes quite closely reflexed. 20 cts.

THE YELLOW EATON (See page 37)

NEW CHRYSANTHEMUMS, continued

Mlle. Marie Liger.

This is the new French variety that won the prize offered by the Chrysanthemum Society of America, for the finest seedling at the recent Paris Exposition. It also was certificated by all the committees of the Society this year. It is one of the grandest varieties of recent years and will rank with Robinson, Appleton and Eaton in popularity, because it has all the requisites

to make it indispensable. Closely incurving blooms of large size. The color is pearl-pink, deepening to a very bright shade at the base of petals. In habit it is dwarf, June plantings reaching only three feet in height. Late propagations require no stakes or tying. Stems are stiff and fully covered with handsome foliage. It is perfectly uniform, perfecting every flower. 20 cts.

WILLIAM DUCKHAM. (See page 36.)

The Yellow Eaton.

A bright yellow sport from Timothy Eaton, only a shade lighter than Appleton, and especially valuable as the best in its color to follow that fine variety up to the close of the Chrysanthemum season; foliage very beautiful; stem first-rate and quite strong enough to hold up the monster blooms. 15 cts.

Timothy Eaton.

This now famous variety was the center of attraction and stood out conspicuously at all the fall exhibitions, and captured every prize and cup for which it was entered. It is the largest globular Japanese incurved white Chrysanthemum yet raised. Flowers of mammoth size, very compact and of good form; color ivory-white. 15c.

Col. D. Appleton.

A very large, deep golden yellow Japanese incurved flower of fine finish and form. Excellent stem, with foliage up to the flower, and an easy grower. Terminal bud only. This variety was in nearly all the prize-winning collections last fall, and is destined to become one of the best commercial varieties introduced for years. 15 cts.

Miss Alice Byron.

Among the many varieties recently introduced from Europe, this variety has shown exceptional merits as a commercial white, being an easy doer and pure in color. Broad, incurving petals similar to Mrs. Weeks. It also resembles it in growth, but flowers with Mrs. Robinson. Makes an effective exhibition bloom either in vases or in pots. 15 cts.

White Bonnaffon.

Of medium size, pure paper-white; form regular and perfect; where finely finished, medium-sized blooms are wanted, this is perfect. 15 cts.

Globosa Alba.

A very compact, closely incurved Japanese, of globular form, and pure white, as the name indicates; 5½ inches in diameter; 4 feet high. Stem and foliage all that could be desired. 20 cts.

Tancred Bastet.

Golden yellow, washed red, very bright; broad pointed petals, reflexing slightly. Four feet high; midseason; crown bud. 15 cts.

GENERAL COLLECTION OF CHRYSANTHEMUMS

THE CREAM OF THE OLD AND THE NEW CHRYSANTHEMUMS

Price, 10 cts. each. Our selection of 20 named varieties, all different, by mail, postpaid, for \$1

These include many of the best high-priced varieties, but the selection for bargain collections must always be left to us.

Black Hawk. The largest and most beautiful dark crimson-scarlet yet introduced. Looks like crimson velvet; the very shade so much desired in Chrysanthemums. Flowers of immense size on fine stiff stems.

C. Holst. Very early white. A pure white variety, very full and incurving, of large size for the date; has excellent stem and foliage; comes in just before Mrs. Robinson.

Golden Wedding. Nothing finer among yellows; shines like burnished gold; the standard for measuring color.

Ivory. A splendid dwarf early white, of great substance and durability. The flowers are of unusually fine and regularly round, incurved form; distinct and notable in any collection.

Louis Leroux. Color, clear nankin, shading to pale pink; one of the prettiest combinations we have yet seen, reminding one of a beautiful old sort called Incandescent. Petals large, center incurving, outer petals reflexing; a fine grower, with beautiful foliage. 15 cts.

Mrs. Baer (Yellow Mrs. Jerome Jones). Has all the good qualities of the famous Mrs. Jerome Jones and is identical except in color, which is rich golden yellow.

Marian Newell. Already one of the most popular of pinks; very bright pure shade, incurving, with tubular ray petals; a fine grower, producing a large flower. Be sure to take the first bud.

Mrs. H. Robinson. Grandest white extant. Has no rival among whites. Grand for exhibition; best commercial white.

CHRYSANTHEMUMS, continued

Major Bonnaffon. Soft, clear, incurving yellow; full in the center; 6 to 7 inches in diameter, and nearly as deep; habit dwarf; keeping qualities excellent.

Mrs. Perrin. The nearest approach to the true pink so long desired. It has slender, stiff stems and ornamental foliage. Color rose-pink within, glistening pink without. The flower is of globular form, incurved, full, and with a finish as fine as satin.

Maud Dean. Still unexcelled; beautiful bright pink, rather flat incurved; splendid stem and foliage.

Mrs. H. Weeks. An immense flower, with broad, claw-like petals, incurving to form a globe of white, a few outer petals reflexing. Of medium height; easy to grow.

Mrs. Jerome Jones. Flowers pure white; incurved, high, rounded, of enormous size and perfect habit.

Nellie Pockett. A grand new variety. An extra-early white Chrysanthemum of mammoth size. Creamy white Japanese, with long, drooping florets, curling at the tips, making a very solid, compact bloom.

Opah. A large flower, informal and showy in build; white, slightly suffused with pink. The late buds show a decided pink coloring, and the early ones produce nearly white flowers.

Omega. Beautiful light yellow, with broad, yet well-rounded flowers, often, under good cultivation, reaching $7\frac{1}{2}$ inches in diameter. Well recommended by all growers of Chrysanthemums.

Polly Rose. This is one of the prettiest of all the early varieties; being a sport from Glory of the Pacific, it has all the parent's good qualities, together with a perfect color, pure paper white. Very easy to do; fine for pots.

Robt. Halliday. Robt. Halliday is still near the top of the list of early yellows; it has taken several years to show its possibilities, but this variety has attained wide popularity, and deservedly so; it is indispensable; very large, when well done.

Silver Queen. One of the best of the new pinks, a beautiful bright shade, every flower coming good; nice stiff stems, fine form.

The Queen. This novelty is undoubtedly the finest white variety up to date. It excels all in purity, is extra large in size; and of beautiful half-globular form, with broad, incurved shapely petals of great substance.

Vivian Morel. Extra large flowers; petals long and loosely arranged; beautiful light shade of pink.

Willowbrook. The very best early white, pure in color, large in size, showy form, informal and spreading. Each year finds this grown in increasing quantities. Very satisfactory.

White Dean. Large white. An extra good grower, making long stout stems with beautiful foliage. Flowers extra large and splendidly formed.

CALLA LILIES

Aethiopica. The well-known Egyptian Lily, with large white flowers and broad leaves; of the very easiest culture, and always satisfactory, especially as a house plant. Dry bulbs that will bloom well, 25 cts.; blooming plants, in pots, 50 cts. to 75 cts.

Spotted Calla (*Richardia albo-maculata*). The leaves of this species are spotted with white, thus making it a very fine ornamental plant even when out of flower. The spathe is smaller than in the preceding, and purplish in the throat. Dormant tubers, 20 cts.

COLEUS

Coleuses are tender and should not be put out of doors till the ground is quite warm. In this latitude it is best to wait till the middle of April, or even the first of May, before planting them in the open ground. In southern Texas they may be planted a month earlier, but we strongly advise our customers not to order Coleus in January and February, as they often do. Even if the plants live (which is doubtful), they will not thrive and show color until warm weather. We grow a large list of the leading varieties and can usually furnish them by the thousand, but if many are wanted it would be well to correspond with us in February or March. If we receive orders at least one month before the plants are needed, we can make specially low prices. We have not space here to give description of varieties, but, as stated above, we grow most of the leading kinds. 5 cts. each, 50 cts. per doz., \$3 per 100.

COSMOS

An autumn-flowering plant of rapid growth, making large bushes 5 feet high and as broad across, which are a mass of elegant foliage until they begin to bloom. From September to November each plant is covered with hundreds of showy blossoms 2 to 4 inches in diameter. Half-hardy annuals. Young plants, 5 cts. each, 50 cts. per doz.

CYPERUS ALTERNIFOLIUS

A grass-like plant sending up stems to the height of about 2 feet, surmounted by a cluster or whorl of leaves diverging horizontally, giving the plant a very curious appearance. Fine for center of baskets, vases or Wardian cases, or as a water plant. 25 cts. and 50 cts.

MRS. PERRIN.

CLEMATIS PANICULATA.

CLEMATIS

Jackmani. The best known and most valued variety of this popular family. A perfect mass of bloom when in full flower. Color dark, rich, royal purple. Strong, 2-yr., 50 cts.

Paniculata. Flowers white, star-shaped; produced during the midsummer and fall, upon long shoots. In addition to its profusion of flowers, the latter are also very fragrant, and the foliage is handsome. A most desirable new climber, which is attracting much attention, and is perfectly hardy. 50 cts.; small plants, 25c.

CROTONS

The Crotons are among the finest decorative foliage plants known. They are as easy to grow as coleus, and much brighter in their coloring. Our customers everywhere, especially in the South, should bed out Crotons. The leaves of all are more or less veined and margined, sometimes entirely variegated with shades of yellow, orange and crimson. Crotons love heat, sunshine and moisture. They are among our most beautiful bedding and house plants. 10 cts. each, \$1 per doz.; larger plants, 25 cts. each.

CYCLAMEN PERSICUM.

CYCLAMEN PERSICUM

Charming bulbous-rooted plant, with beautiful foliage and rich-colored, orchid-like, fragrant flowers; universal favorites for winter and spring flowering. They require sandy loam. Blooming plants, 25 cts. to 75 cts.

CYCAS REVOLUTA (Sago Palm)

These are probably the most valuable decorative plants grown, both for lawn and house decoration; their heavy, glossy, deep green fronds resist alike the gas, dust and cold to which decorative plants are frequently exposed. We have an exceptionally fine lot in popular sizes for house decoration. 75 cts. to \$6.

The most useful Palms of other sorts, in sizes convenient for house culture and decoration, are offered on page 47, at prices within reach of all.

DIANTHUS, or PINKS

Hardy and free-flowering; well known and useful. 5 cts. each, 40 cts. per doz.

DAISIES

Double English. The flowers average 1½ to 2 inches in diameter, are very double, ranging from snowy white to pink and blood-red, with the prettiest combination of pink and white. English Daisies have never been grown extensively in Texas, because if grown from seed sown in the spring they do not become thoroughly established before the hot weather sets in and checks their blooming. We sow the seed in the fall and keep the young plants in frames during winter, so that when transplanted in January, February or March they bloom freely for several months, giving entire satisfaction. Treated just like Pansies, they will bloom as long and as freely. 5 cts. each, 50 cts. per doz.

THE SHASTA. Luther Burbank, who has originated so many wonderful new fruits, has turned his attention to flowers, and has astonished the floral world with a Daisy which seems to surpass anything he has ever produced in fruit. It is a perfectly hardy perennial that will be a great addition to bedding plants and to cut-flowers. The plants grow fast and increase rapidly. It is a fine bloomer. A bed of these giant white Daisies in full bloom is a sight worth seeing. The flowers measure 3½ to 4 inches across, and are borne on stems 18 inches to 2 feet long. They have two rows of long, broad white petals and a yellow center. The foliage grows near the ground and the numerous long, slender-stemmed white flowers rise most gracefully amid the bed of green. It is a wonderfully effective bedding plant, blooming all through the spring and summer months. The flowers keep in water for two weeks. 10 cts. each, \$1 per doz.

DAHLIAS

The Dahlia is one flower in which it seems that almost perfection has been reached. For this reason perhaps it is somewhat neglected. In Texas, if strong roots be planted early they can be had in bloom as early as May 1, and will continue to bloom until winter. Last fall our Dahlias bloomed until the end of November. Strong roots of leading varieties, 20 cts. each, \$2 per doz. After April 1, pot plants, 75c. per doz.

Admiral Dewey. A grand new variety with flowers of perfect form. Brilliant royal purple elegantly shaded. No collection complete without it.

A. D. Livoni (No. 2). Very valuable as the best clear pink. Magnificently formed flowers, perfectly full double, of a beautiful soft pink. The petals are quilled, of fine substance and closely formed about the center.

American Flag. Bright cherry-red, with center of each sharp-pointed petal striped with white. Striking and unique.

Keystone. Bright rose-pink with wide stripes of rich crimson. Strong grower and free bloomer.

Ruby Queen (No. 9). A distinct variety, with large, full flowers of fine ruby-purple. Long stems; free blooming.

Gloriosa (No. 4). One of the most superb Dahlias in existence, with unusually large and beautifully formed flowers, having very broad petals, filling the flower well into the center. At a distance it does not look unlike a Peony. The color is the richest that can be had in any flower—bright, velvety crimson, almost the color of the Prince Camille de Rohan Rose. The plant grows to a medium size, producing flowers freely on long, stiff stems.

Maid of Kent (No. 1). A beautiful variety. Scarlet-maroon at base of petal, point of each petal white.

Professor Baldwin. Deep orange-scarlet flowers of striking form. Petals beautifully twisted at the tips, giving the flower a very pleasing appearance.

Clifford W. Bruton. The finest clear yellow decorative Dahlia in existence. The flowers are immense in size, 5 to 6 inches across, perfectly full and double, like a Chrysanthemum. Rich, deep, lemon-yellow flowers are produced on tall, stiff stems, making them very desirable for cutting. An early and very free bloomer.

Constancy. Rich reddish orange shaded bronze, tipped with white. Beautiful and perfect.

Fern-leaf Beauty. One of the most distinct varieties, totally unlike any other. Fern-like foliage of dwarf, branching habit. Variegations very regular and even. A fine grower and splendid bloomer. Creamy white flowers, each petal having a dark crimson margin.

Oban. Rosy lavender shaded fawn. Flowers large and of a very distinct type.

EPIPHYLLUM (Lobster Cactus)

A wonderfully free bloomer, frequently flowering three or four times during the year. Of drooping-weeping habit; the flowers are bright and beautiful. It is of the easiest culture, will bloom for everybody, and we can recommend it as being very handsome. 10 cts.

FERNS

Most Ferns require a shady, moist atmosphere, and for this reason many of the leading kinds offered in the average catalogue will not succeed in northern or western Texas, or in the Indian Territory. In the southern or eastern parts of the state, and in Louisiana and Arkansas, nearly all Ferns succeed well. As Fort Worth is situated in the more difficult region, we have made a special study of the Ferns best suited to this section, and are now able to offer several kinds that will succeed with any average treatment. The Boston Fern, *Nephrolepis cordata compacta* and *Pteris tremula* are prominent among this class, while all in the following list can be grown with little care.

New Fern, *Nephrolepis Piersonii*

The best plant novelty that has been introduced in several years. The photograph of the plant on this page gives a very good idea of the feathery, plume-like fronds, although one has to see the plant in growth to appreciate its beauty and value. The fronds grow broad and heavy, measuring at least 6 inches across when fully developed, increasing in beauty as they develop. On account of the weight of the foliage, the plant assumes an exceedingly graceful appearance, and, owing to the fullness of the fronds, even small plants are well furnished, making much more symmetrical and beautiful plants than the Boston Fern. The divided pinnæ, or the miniature fronds, keep growing constantly, showing two distinct shades of green, the ends

FRONDS OF NEPHROLEPIS PIERSONII

FERNS, continued

being a light green, while the center and main part of the fronds show a dark, rich shade, the contrast producing a very beautiful effect. Strong, young plants, 25 cts. each; large plants, 50 cts. to \$1.

Anna Foster, the New Nephrolepis

A sport from the Boston Fern. This Fern is as easily grown as its parent, the Boston; as free in producing plants. It has a much finer foliage than its parent, and is quicker in making length of frond. It is as good a house plant as the Boston and far more beautiful. 25 cts.

Cyrtomium falcatum. One of the best decorative species for growing in the window. A strong grower, with fronds 12 to 30 inches long and 4 to 8 inches broad. The segments are very large and the upper side a deep glossy green. So hardy it is sometimes grown in the open ground in England, where it is called Holly Fern. Makes a splendid specimen. 15c.: large plants, 35c.

Maidenhair. Well suited to this climate. Small, 10 cts.; large, 25 cts.

Nephrolepis cordata compacta. It is of free, strong-growing, compact habit, attaining, when fully grown, a height of about 2 feet. The fronds are dark green, very rich, of upright growth, with just sufficient arch in them to make them graceful. Strong plants, 20 cts.; large plants, 40 cts.

Nephrolepis exaltata Bostoniensis (The Boston Fern). This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than in the common Sword Fern, and do not stand so stiff, but droop over in a graceful manner. Excellent for making large specimen plants, also very fine for hanging baskets. If you have always failed with other Ferns, try this and *N. cordata compacta*. You will doubtless succeed and be well pleased. A strong and rapid grower. Small plants, 15 cts.; large, 25 cts.; fine specimens, 50 cts. to \$1.

Nephrolepis exaltata. The famous Sword Fern, native to all parts of the tropics. Universally grown as a basket plant, and with long leaves of fine appearance. We grow this largely. 10 cts. and 15 cts.; large plants, \$1.

Nephrolepis Wittboldii (Wittbold). Very robust and graceful grower; one of the most prolific Ferns in existence, equaling if not excelling *Bostoniensis* in beauty. Long, graceful fronds, with broad, undulated pinnates. Strong, thrifty plants, 50 cts.; large specimens, \$1.

Pteris cretica albo-lineata. A pretty and useful variegated variety, distinctly showing the clear white variegation. A useful and easily grown Fern. 15 cts.; large plants, 25 cts.

JAPANESE FERN BALL.

NEPHROLEPIS EXALTATA BOSTONIENSIS.

Pteris tremula (Shaking Fern). The foliage of the *Pteris* varieties is large and very graceful. The slightest movement of the air shakes the leaves. We recommend them for house culture more than any other. *P. tremula* grows readily and very fast. Keep the leaves from dust, and sprinkle slightly every warm day. 15 cts.; large plants, 25 cts.

Japanese Fern Ball

This beautiful novelty is an importation from Japan, and is certainly the finest addition to the fernery yet introduced. The Ball is composed of the Japanese Island Fern Roots and sphagnum moss, and so constructed as to send out leaves of beautiful emerald-green from every point. They grow rapidly and make a handsome ornament for the home, conservatory or greenhouse.

Directions for Starting. Place Ball in water for 15 minutes, and then suspend in any desired position. Repeat every two days until growth is started, after which water occasionally as required. To use in Fern dish, cut Ball in halves, placing flat side down, thus getting two dishes of beautiful Ferns. The Fern Ball may be allowed to dry up at any time and be set away, and started again by watering as before. 75 cts.

Selaginellas

Curious and delicately beautiful plants, which require about the same treatment as ferns. Some are erect, with large, spreading fern-like fronds, invaluable for cut-flower work, while others are prostrate and creeping, forming an excellent ground work for ferneries.

DOUBLE FEVERFEW (Pyrethrum)

This is the well-known double white Feverfew, so valuable for cut-flowers, and suitable for pot or garden culture. The blossoms are freely borne on stems 18 inches high. They produce immense crops of double daisy-like flowers all through the summer. The plants are perfectly hardy, and thrive and spread from year to year with little care. 10 cts.

FUCHSIAS

Fuchsias require about the same treatment as begonias. Use light soil, with one-fourth clean, coarse builders' sand. Keep in a cool, partially shaded place and out of the wind. They will flourish and bloom freely till July, when they may as well be thrown away, as here it is difficult and disappointing to try to keep them alive through August and September.

Price, 10 cts. each, \$1 per doz.

Bland's New Striped. The tube and sepals are a glowing crimson, corolla a rich plum-colored purple, regularly and distinctly striped red-rose.

Charles Blanc. Single; sepals dark red; corolla rosy amaranth; very free bloomer.

Earl of Beaconsfield. Vigorous-growing, free-flowing variety; tube and sepals light rosy carmine, corolla deep carmine.

Gloire des Maches. It is nearly perfection as to free growing and habit, being strong and bushy, beginning to bloom quite early in the season and continuing very late. The tube and sepals are brilliant deep scarlet, thick and leathery in texture; the corolla is very large and double and pure white. 15 cts.

Mrs. E. G. Hill. A free-blooming variety producing large double flowers. Corolla pure white, sepals dark red.

Monstrosa superba. Very large, double flowers; pure white corolla, beautifully reflexed; bright scarlet sepals.

Phenomenal. The largest Fuchsias we have yet seen. The tube and sepals are bright coral-red, beautifully formed. The corolla, nearly 2½ inches across, is of the very richest violet shade. The habit is remarkably free, and it blooms more freely than any large variety we have seen. 15 cts.

Purple Prince. Fine double variety; sepals scarlet; corolla a beautiful distinct blue; very dwarf.

GLADIOLUS.

Speciosa. Pale red tube and sepals; dark red corolla, there frequently being from 30 to 40 flowers on a single branch.

Trophee. Double; buds quite round and beautiful deep red color; open flower; dark purple and very beautiful. One of the very finest of the Fuchsias.

GLOIRE DES MACHES.

FICUS ELASTICA

The well-known Rubber Plant; 12 to 15 inches; beautifully leaved. 75 cts.

GLADIOLI

The Gladiolus is the most beautiful of summer-blooming bulbs, and has tall spikes of flowers, some 2 feet or more in height; often several spikes spring up from the same bulb. It is a good plan to plant bulbs two or three different times, ten days or two weeks apart, so that there may be a continual succession of flowers. The Gladiolus likes a rich soil, full sun and some support for its splendid heavy flower-spikes. 5 cts. each, 40 cts. per doz.

Childsi. They are very tall and erect, often standing 4 or 5 feet high, with spikes of bloom over 2 feet in length. They branch freely, in most cases each stem producing three or four spikes of bloom, and bloom much earlier than ordinary varieties. The flowers are of great substance and gigantic size, frequently seven to nine inches across. The form of both flower and spike is perfection itself, and they last in bloom a long time before fading, owing to their great substance and vigor, but the most remarkable feature is the coloring. Orchids cannot surpass them in their varied and delicate shades, markings and blendings. Every color known among Gladioli is represented, and many never before seen, particularly blues, smoky grays and purple-blacks, all having beautifully mottled and spotted throats, made up of white, crimson, pink, yellow, etc., and in this peculiar network of charming spots and colors lies one of its special points of unsurpassed beauty. 10 cts. each, 75 cts. per doz.

HOYA CARNOSA (Wax Plant)

A climbing plant, with thick, fleshy leaves, bearing flesh-colored, star-shaped flowers; one of the best plants for house culture, as it stands the extremes of heat and cold better than most plants, and is not easily injured by neglect. 25 cts.

GERANIUMS

The Geranium is the most popular summer bedding plant and also makes a fine plant for winter in the house. As its value is known, it is being more generally planted. This season we are growing more Geraniums than any other plant. The list below comprises the very cream of the old and new varieties. If plants are to be used for bedding in the open ground, it is best to confine your plantings to a few varieties and colors. The dark red and the pink are the showiest and also the hardiest in our hot weather. The Spalding's Pet is the best red, and the Poëte Nationale and Master Christine are the best pinks.

Price for strong, healthy plants from 2½-inch pots, all named, 10 cts. each, 75 cts. per doz.; unnamed, 50 cts. per doz. Plants from 4-inch pots, 15 cts. each, \$1.50 per doz.

NOTICE. When Geraniums are wanted by the 100 or 1,000, write for special prices, giving the name and size wanted.

DOUBLE VARIETIES

Asa Gray. Light salmon-orange color; dwarf, free-flowering; one of the best.

Beaute Poitevine. It is very dwarf and compact, and of a very branching habit. The color is unique and changeable, some trusses being of a deep rosy salmon, streaked and veined carmine, with deep magenta color; others with the outer petals almost a pearly white, with carmine color. 15 cts.

Buckner. A new Geranium of the large-flowering type, and one that has proved to be a fine bedder. Flowers purest white, not a trace of coloring at center. Very free-flowering, always a perfect mass of white. Plant dwarf and bushy. One of the finest whites we have ever seen. 15 cts.

Bruant. The giant among Geraniums. We consider this the best bedding Geranium of all varieties. The plant abounds in vigor; foliage strong, striking and of perfect habit. Color of the flower is a bright vermilion-red of most striking shade.

Chas. Darwin. Rich violet-purple.

F. Perkins. Rich carmine flowers of medium size
Heteranthe (Double Gen. Grant). A splendid variety for bedding, the clear vermilion-red of its flowers showing well above compact, sturdy foliage.

Jean Viaud. Double. Very large semi-double blooms borne in large trusses well above the foliage; individual floret large; color bright rosy pink, with distinct white blotch in the center; habit dwarf, compact, very vigorous and exceptionally free blooming. Foliage clear deep green, with distinct bronze green zone; probably the best pink Geranium for bedding yet introduced. 15 cts.

Jas. T. Murkland. Clear flesh-pink petals prettily edged with deep rose, passing to white with rose center. Flowers large and borne in large, bold heads. A good hardy grower and profuse bloomer. 15 cts.

John Doyle. One of the brightest, most free-blooming and most satisfactory Geraniums in all our collection. Is accepted as the standard of excellence for scarlet bedders. Plant is dense and compact in growth; blooms in large, round trusses of brightest vermilion-scarlet; semi-double.

DOUBLE GERANIUMS, continued

La Favorite. A fine double white Geranium, claimed to be an advance on White Swan. The florets are pure white and in large trusses. It stands the sun well and is an excellent bedder.

Le Soleil. One of the finest double scarlet bedding Geraniums. Color is most brilliant scarlet; very effective when planted in masses. Flowers large and held up by straight, heavy stems; stands storm and heat perfectly. Without an exception, the most intense scarlet bedding Geranium up to date. 15 cts.

Mad. Landry. Flowers very large, in immense trusses, on long, rigid stems; semi-double. Plant remarkably free in bloom, being a mass of flowers until the end of the season; color rich salmon, shaded orange, edge of petals of a brighter shade than the rest of the flower; a beautiful and distinct variety. 15 cts.

Marquis de Castelaine. A giant among Geraniums. Produces a wealth of bloom the whole season. Flowers 2 inches and over in diameter. Trusses of bloom 5 to 7 inches across. Petals broad, arranged to form a round flower of perfect shape. Color deep rosy scarlet, shading into pure scarlet at the edge of upper petals. We consider it one of the best red Geraniums ever introduced.

Mad. Jaulin. Without question the finest new semi-double Geranium offered in many years. This is an entirely distinct color in the Bruant or bedding type; very large florets compose a truss of grand size; center of flower very delicate pink, bordered with pure white.

M. Lockray. This new variety has wonderfully large flowers of the semi-double type that is so effective. The color is a peculiar apricot-salmon in center, diverging to a lighter hue, sometimes almost white on the edge. The trusses are of immense size, and the individual flowers are very perfect, altogether making one of the best new Geraniums. 15 cts.

Paul Bruant. Splendid scarlet.

Rose-bud. Perfectly double florets, like little roses, the trusses like clusters of rose-buds; deep rich scarlet, very beautiful; nice for pots and bedding.

S. A. Nutt. Rich, dark crimson; the flowers are of perfect shape and large size.

Spaulding's Pet. Rich, dark crimson; blooms borne on long stems well above the plant; the best crimson bedder we know of for our climate.

Thomas Meehan. Fine semi-double, of a bright magenta shade, flowering very freely in large trusses of well-opened flowers with distinctly fluted petals, the base of the upper petals marked with orange.

SINGLE GERANIUMS

A. Chardin. A very distinct Geranium of a beautiful new color, nankeen rose, veined in a still lighter shade.

Bishop Simpson. A very large variety, with immense trusses of rich salmon flowers.

Comtesse de Harcourt. Pure snow-white; extremely free in bloom.

Duchess of Orleans. Single oriole. This is the finest variegated variety that we have been able to secure. Pure white center, tipped with a beautiful scarlet tinge.

John P. Cleary. One of the most brilliant and one of the best single scarlets. Flowers large and fairly leathery in substance, standing sun and storm without injury. Flowers in good-sized round trusses. 15 cts.

L'Aube. Enormous-sized trusses, large, round florets, pure snow-white, retaining its pureness the entire season; in freedom of bloom, splendid habit and growth of plant this variety resembles the excellent double white variety, La Favorite.

Mary Hallock Foote. Immense trusses of bright, pale salmon, with a pure white eye. A great variety.

Master Christine. One of the best pink Geraniums in cultivation; fine grower and beautiful flowers.

Mrs. E. G. Hill. Single; soft, light salmon, bordered with rosy salmon and veined with deep rose; vigorous grower, with broad, heavily zoned foliage.

Mrs. J. M. Garr. Probably the finest of the single whites; florets nicely shaped and of medium size.

Madam Bruant. Very showy and novel; center of flower is white, veined with carmine-lake, each petal regularly and distinctly bordered bright solferino. Excellent as a pot-plant, being a continuous bloomer all summer and winter.

Poete Nationale. Delicate pink, deepening to soft peach bloom. 15 cts.

Queen of the West. This is one of the best bedding Geraniums on the list. It grows very freely and blooms in the greatest profusion. Color light orange-scarlet.

IVY GERANIUMS

A fine assortment of the best kinds.

SCENTED GERANIUMS

Apple. The most delightful of all scented Geraniums. Foliage round, smooth and large, with pure apple fragrance. A strong-growing and handsome plant. Fine, large plants, from seed; the true variety. 25 cts.; extra large plants, 50 cts.

Balm. Large foliage; deliciously fragrant.

Oak. Leaves marked with black.

Attar of Roses. One of the sweetest-scented Geraniums.

Rose-scented. Two kinds; one with a broad leaf and another more finely cut.

HIBISCUS

A rapid-growing tropical shrub, with rich, glossy foliage and large, showy blossoms. It blooms freely through our hottest weather, and is one of the most satisfactory plants of this climate.

Price, 15 cts. each, \$1.50 per doz., except where noted.

Collerii. Flowers double, buff yellow, with a scarlet base; distinct. New variety from the South Sea Islands.

Decorus. Foliage very large and lobed. Flowers enormous, on long stems, beautiful rosy carmine; stamens and pistils very showy; the stigma is large, circular and golden yellow. Single. 20 cts.

Grandiflora. Rich, glossy foliage, with crimson-scarlet flowers.

Peachblow. One of the finest plant novelties of recent years. Flowers double, 4 to 5 inches across; rich, clear pink, with small, deep crimson center—an entirely new and most beautiful shading. Blooms freely even on small plants. Good as house plant or planted out in the garden. 25 cts.

Miniatus. Semi-double flowers, brilliant vermilion-scarlet. Very handsome.

Sub-violaceus. The largest flowering of the Hibiscus family. A beautiful shade of bright crimson, tinted with violet.

Versicolor. Very large single flowers, beautifully striped with crimson, rose and white.

HIBISCUS.

IRIS KÄMPFERI.

HELIOTROPES

These plants are universal favorites, on account of their delightful fragrance. They flower equally well as bedding plants in summer or as pot-plants in winter.

Price, 10c. each, \$1 per doz., except where noted.

Czar. One of the best of the dark Heliotropes; very distinct in color and habit. Color deep purple; free bloomer and very fragrant. 15 cts.

Picciola. Rosy violet, indeed almost red, with a distinct white center showing upright growth, producing immense heads of flowers well above the foliage.

Violet Queen. Deepest violet-purple, with long, almost pure white eye; very fragrant.

Madame de Blonay. Fine large, strong foliage; produces very large trusses of pure white flowers.

Florence Nightingale. Foliage is bright deep green. In bloom it is exquisite. The deep lavender color of the flowers contrasts admirably with the beautiful foliage.

Snow Wreath. This comes to us heralded as far superior to any existing white variety. The introducer describes it as low-growing and with strong, luxuriant foliage. The flower is very large and of snowy whiteness.

IRIS KÄMPFERI

This new Iris from Japan rivals the lily in stateliness, the peony in majestic beauty, the orchid in marvelous delicacy and blending of colors, the chrysanthemum in profusion, and surpasses almost every plant in size and kingly magnificence of its flowers. Think of a plant sending up to the height of three feet a dozen flower-spikes, each spike bearing from two to four enormous blossoms eight or ten inches across and of the most delicate and beautiful colors, markings and combinations. Think of a bed of all colors, white, indigo, violet, lavender, mauve, sky-blue royal purple, blush, yellow, etc. Your imagination can conceive of nothing grander, and when you see them you will realize that they are infinitely more grand and beautiful than your imagination could portray. Such is this new *Iris Kämpferi*, the king of hardy perennial plants. Single or double, 10 cts. each, \$1 per doz.

IVIES

English. The well-known evergreen climber; quite hardy. 25 cts.

German, or Parlor Ivy (*Senecio scandens*). A more rapid-growing and more succulent kind, well adapted for covering trellis work quickly, or training in the parlor; leaves glossy green and flowers yellow, in clusters. 10c.

Kenilworth Ivy (*Linaria cymbalaria*). A neat and delicate plant of trailing habit, with small, bright green, ivy-shaped leaves and diminutive light violet-colored flowers; well adapted for hanging baskets, vases, etc. 10c.

IMPATIENS SULTANI

Of compact, neat habit, and a perpetual bloomer; the flowers are of a peculiar brilliant rosy scarlet, 1½ inches in diameter, and produced very freely. 15 cts. each, \$1.50 per doz.

IPOMOEAS (Moonflowers)

Learii. This handsome new climber, a native of Ceylon, has large deep azure blue flowers with crimson bars, and is frequently called the "Blue Moonflower." When grown with the white one, the contrast is striking and very effective. If you want something really handsome, buy this. 20 cts.

Noctiflora. This still continues one of the most popular vines in existence. For easy culture, rapid growth and freedom of bloom it has no equal. The flowers are pure white, 6 inches in diameter, and open at night and on dull days. The demand exceeded our supply last spring, but we think we shall be able to fill all orders this season. 15 cts. each, \$1.50 per doz.

JASMINES

Cape. Flowers large, white, fragrant; foliage rich, glossy. 25 cts. to 50 cts.

Catalonian. Foliage fine; flowers white, star-shaped, very fragrant; hardy. 10 cts. to 25 cts.

Gracillimum. A new Jasmine, and remarkable for its freedom of bloom. Beautiful pure white flowers, borne in clusters. Delightfully fragrant. In bloom from October to February. 20 cts.

Grand Duke. Easily grown; flowers double, creamy white, very fragrant. 25 cts. to 50 cts.

Maid of Orleans. A very attractive new sort, with good-sized double flowers, blooming profusely all summer; shining pale green foliage. We predict for it a rapid sale, as it is much easier to handle than other Cape Jasmynes, and, as a whole, more desirable. 25c.

THE WONDERFUL NEW LEMON, PONDEROSA

Nothing that has ever been brought to our notice in the plant line has caused half the commotion that this wonderful Lemon has. It is a true everbearing variety. On a plant 6 feet high no less than 89 of these ponderous Lemons were growing at one time. It was a beautiful sight to see. The tree was blooming, and also held fruit in all stages of development, from the size of a pea up to the ripe fruit, showing it to be truly everbearing. Fruit has been taken from this tree weighing over 4 pounds. The lemons have very thin rinds for such large fruits. It is the juiciest of all Lemons; makes delicious lemonade, and for culinary purposes cannot be excelled. The Ponderosa Lemon is sure to become popular when it is known. It fruits when quite small, and makes a lovely house plant. Everybody can grow their own lemons; will fruit freely the second year. Thrifty young plants. 35 cts.

LOBELIA

A beautiful dwarf plant, with dark blue flowers, suitable for baskets, rockeries, or planting in the open ground. 10 cts. each, 75 cts. per doz.

LANTANAS

There has been a wonderful improvement in the Lantanas in the last few years. We offer a number of new varieties which are far superior to the old ones. Not that they grow or bloom better in our hot climate, for that is well-nigh impossible, but they offer a greater variety of colors and delicate shades. The plants, too, are much more dwarf and compact in their growth, and hence make neater and more desirable ornaments. We cannot urge the planting of Lantanas too strongly in this hot, dry climate. The plant is equal to the Plumbago and superior to nearly everything else in its hardiness and freedom of bloom. Especially to those who "can't raise flowers in Texas" would we recommend this plant. The Delicatissima, or Weeping Lantana, is exceedingly graceful and floriferous.

Price, 10c. each, \$1 per doz., except where noted

Alba perfecta. White; very fine.

A. Claveau. Very dwarf and of bushy, spreading habit; covered with flowers of silvery rose, with center of soft yellow; a beautiful contrast.

Amiel. Semi-dwarf; very compact; very free in blooming; umbel and floret of fine size; color reddish orange, with yellow center.

Aurantiaca. Large, orange-red flowers.

Aurora. Light and dark shades of pink.

Delicatissima, or Weeping Lantana. The trailing or creeping variety, with slender stems, fine leaves, and dainty flowers of pink and lavender; beautiful for edging, for baskets and boxes.

Francine. Quite dwarf; flowers large, rosy lilac.

Golden Ball. Bright orange flowers, borne in large round trusses; one of the best bedders.

Protee. Ten to 12 inches. Rose color, with yellow center; flower and truss large; color very bright. 15c.

Seraphine. Dwarf; red and yellow.

Tethys. Eight inches. Pure canary color; very compact and free-flowering. 15 cts.

MIGNONETTE

The well-known fragrant flower. Succeeds admirably in the open ground. 5 cts. each, 40 cts. per doz.

MADEIRA VINE

A rapid climbing plant, with thick, glossy green foliage and fine, white, fragrant flowers. 10 cts.

MESEMBRYANTHEMUM (Ice Plant)

Suitable for rockwork, hanging baskets, vases, etc. Very useful. 10 cts.

NASTURTIUM

A desirable plant for rockwork, vases, trellises, etc. Showy. 5 cts. each, 40 cts. per doz.

ORANGE TREES

Trifoliate. The new hardy Orange delights all who like beautiful and novel hardy plants. An Orange tree, growing vigorously on the lawn or in the garden, blooming or fruiting in abundance, is certainly a rare sight. The beautiful little trees are entirely hardy in the open ground as far north as Boston. They are of dwarf, symmetrical growth, with glossy green trifoliate leaves. The lovely pure white blossoms are elegantly perfumed, and borne in constant succession. The fruit is small, bright red in color, and very curious. 15 cts. to 25 cts.

Dwarf Otaheite. One of the most desirable pot-plants it is possible to possess. While it will grow 3 or 4 feet high and branch freely, it is not uncommon to see cunning little plants, 5 or 6 inches high, full of bloom, and even bearing one or two medium-sized Oranges. The fruits at their best are not more than half the size of an ordinary Orange, but are very bright and beautiful in color and delicious in quality. Its flowers more than its fruit commend the plant to general cultivation. It blooms so profusely that it seems to be all flowers. The pure waxen white blossoms emit a delicate yet powerful fragrance. 25 cts.

OLEANDERS

The well-known shrubby plant. Blooms well when planted outdoors in summer, but must be taken into the house or pit in winter in northern Texas. In southern Texas it requires no protection. We have fine plants of the Double Pink, Single White and Semi-Double White. 25 cts. to \$1 each, according to size.

PANSIES

The Pansy begins to bloom in February, and continues until July and August. Should be planted in very rich soil and watered freely. Our plants this season are from seed of the very largest flowers and brightest colors. Order a dozen or a hundred and see how easily cultivated and how beautiful a bed of these new Pansies will be. 5 cts. each, 40 cts. per doz., \$3 per 100.

LANTANA.

CHINESE PRIMROSE

Few house plants afford more satisfaction than Primroses. They require to be kept cool, a north window suiting them best. Care should be taken in watering that no water gets on the buds, as it causes them to decay. In the summer they can be turned out into a shady border. The plants we offer are fine, and the colors will please. We have them in white, pink and crimson. Large blooming plants, 25 cts.

Primula Obconica

Always in bloom. This is a charming plant for winter; in fact, we know of none better adapted to home culture than this one. It is not susceptible to the changes of temperature that influence most plants. It bears its elegant panicles and sprays of delicate pink and white bloom in the greatest profusion. It is certainly elegant. 15 cts. and 25 cts.

New Everblooming Baby Primrose, Forbesii

This is the freest-blooming plant we know of, blooming continuously through the entire season. Plants in very small pots have from 15 to 20 sprays of lovely light pink flowers on stems 10 to 12 inches high at one time. It is a very rapid grower and the easiest grown of all the Primrose family. Very desirable for window culture and for cutting; its long stems and pretty clusters are charming. 15 cts. each, 2 for 25 cts.

PALMS

Palms are growing more rapidly in favor than any other class of plants we handle. It is because people are beginning to find they can grow them much more easily than they thought. This is the result of a better knowledge as to what varieties and what sizes to handle. Few people can succeed with Cocos, Arcas, etc., and a small plant is never pretty, and rarely ever successful. Almost any one, however, can succeed with the *Latania*, *Kentia* and *Phoenix*, if the larger plants costing not less than \$1 each are bought. A \$2 or \$3 plant is generally more satisfactory. Two or three well-grown Palms in a house produce a better decorative effect than a hundred small pot-plants of geraniums, etc., and are not one-tenth the trouble. They are of the easiest culture, and thrive best in a light, airy room. They should be watered moderately, and the leaves should be sponged with water every week or so.

Areca lutescens. A most elegant Palm. One of the best for general decorative purposes; easily grown, useful in every stage of growth; of fine color, graceful habit, and pleases all. 25 cts.; fine plants, \$1 to \$2.

Cycas revoluta. See page 39.

Kentia Forsteriana. This is one of the finest pot-plants imaginable, and the easiest to grow of any of the Palm family. Being almost hardy it is not injured by slight changes in temperature, and its stiff, glossy leaves enable it to stand the dry, hot air of the living-room without injury. The leaves are a deep, glossy green, fan-shaped, split deeply into segments. 50 cts.; strong plants, \$1 to \$3.

Latania Borbonica. The well-known Fan Palm. This is one of the most exquisitely graceful among Palms; its wide-spreading, gracefully arching leaves are elegant and effective for apartment decoration. The handsomest and most valuable of all the Palms. 25 cts. each; fine plants, 50 cts., 75 cts., \$1 to \$3.

Phoenix Canariensis. This is one of the most exquisitely graceful among Palms. Its wide-spreading, gracefully arching fern-like leaves are elegant and effective. 40 cts.; large plants, \$1 to \$2.

PETUNIAS

Double. We keep on hand a good collection of double Petunias; some of them show flowers in the most beautiful shades of crimson, white, rose, maroon, etc.; others are blotched, striped, veined, bordered, marked and fringed. 10 cts. each, \$1 per doz.

Single. Free-blooming; fine for bedding, showy. Mixed colors, 5 cts. each, 40 cts. per doz.

Giants of California. These Petunias have been widely advertised of late, and we found them to be remarkably fine. The flowers are very large, and of every conceivable shade of crimson, white, violet, lavender, etc. 10 cts. each, 75 cts. per doz.

PARIS DAISIES (Marguerites)

Very profitable for cut-flowers. Always in active demand because of the many uses to which they are adapted, and also very easily grown and handled.

White. Best white, having a ray of white petals around a salmon disk; splendid variety for cut-flowers. 10 cts.

Yellow. Similar to above, with yellow petals. 10c.

PILEA MUSCOSA (Artillery Plant)

Graceful fern-like foliage, and quantities of very small flowers, which snap when sprinkled. 10 cts.

PINKS

A race dwarfier than the carnation, growing about one foot in height. The flowers are various shades of maroon, carmine and rose, beautifully laced and banded on white ground; they are perfectly double and clove-scented. The plants will stand outdoors year after year, being entirely hardy. 10 cts. each, 75 cts. per doz.

PENNISETUM LONGISTYLUM

(Silver Plume Grass)

This is the prettiest, showiest and most satisfactory hardy plant we have tried in several years. It is sure to become very popular in Texas, and can be made very effective in bedding with cannas, bananas, salvias, etc. It grows 3 to 4 feet high, producing long, graceful cylindrical purplish plumes. The grass-like foliage is long and slender, and the plumes bend and wave with the slightest wind. Strong roots, 15c. each, \$1.50 per doz.

PHLOX DRUMMONDII

A race of annuals remarkable for the brilliancy and abundance of their large terminal flowers, which completely hide the foliage; the blooms are of many colors, from pure white to deepest purple, eyed and striped. For masses of separate colors and for cutting they are unsurpassed. Give good, rich ground, and set plants 6 inches apart. White, rose, scarlet, deep blood or mixed colors. 50 cts. per doz.

Perennial Phlox

The Phloxes are among the very showiest and most valuable of all our hardy plants, and by growing a complete collection they can be had in bloom from early June until late fall. We offer a number of the leading varieties. 10 cts. each, \$1 per doz.

PARROT'S FEATHER

An aquatic hanging plant is a novelty indeed, and we have it to perfection in this dainty little jewel. Its long, trailing stems are clothed with whorls of the most exquisite foliage, as finely cut as the leaves of cypress vine, and much more delicate. Planted in a water-tight hanging basket, so that the water can be kept standing on the surface, it will trail finely. 15 cts.

PLUMBAGO

Capensis. A beautiful plant, producing freely throughout the summer and fall large trusses of azure-blue flowers. The plants are of neat and bushy habit, and can be trimmed into symmetrical shape. Also a fine pot-plant. We have never found a better bedding plant than this, nor one that blooms more freely all the time. In southern Texas it is hardy, but in the latitude of Fort Worth it must be taken up and kept in the house during winter. 10 cts. each, \$1 per doz.; larger plants, 20 cts. each, \$2 per doz.

Alba. Pure white flowers; beautiful in contrast with the blue sort. 15 cts.

RHYNCHOSPERMUM JASMINOIDES

(Malayan Jasmine)

One of the most valuable evergreen climbers, hardy throughout the South. Flowers small, white, very fragrant, and produced in great profusion. 15 cts.

RUSSELLIA JUNCEA

A basket plant, of neat, slender habit, with bright scarlet tubular flowers borne in loose racemes. 10 cts.

SANSEVIERA ZEYLANICA

There is no decorative plant that is more attractive in habit and foliage than this, and none that will stand as much abuse and neglect. It will grow and flourish in any dark corner, and will stand gas and dust or heat. Indeed, the only thing that seems to check it is too much water or frost. The leaves grow to a length of 3 or 4 feet, and are beautifully striped crosswise with broad, white variegations on a dark green ground. Grows splendidly out of doors in summer. 15 cts. to 50 cts.

SALVIA

The prevailing color in the brilliant bedding at the World's Fair at St. Louis last summer was bright red, and this was produced by the liberal planting of Salvias. It grows easily in Texas, and blooms freely all summer and fall, and is especially recommended where bright brilliant coloring is desired.

Price, except where noted, 10 cts. each, 50 cts. per doz., \$3.50 per 100

Splendens. Tall-growing, large-flowering. The standard variety for bedding.

New Dwarf Scarlet Salvia, Le President. The grandest addition to our list of bedding plants. It forms a compact bush completely covered with rich, scarlet flowers. We have had plants that by actual measurement were only 15 inches high and 2 feet across. As a border or vase plant it will be indispensable, and as it will bloom abundantly in pots, it will be of greatest value as a market plant for florists.

Silverspot. The distinctive feature of this splendid novelty is its strikingly handsome spotted foliage. The leaves are rich, soft, dark green, with light sulphur or cream-colored spots of various sizes liberally sprinkled over them. The intense, bright scarlet flowers are very large, the plants are of neat, compact habit. This will make a desirable bedding plant, rivaling the most gorgeous coleus, its bright spotted leaves and brilliant scarlet flowers making it a most effective bedder. 10 cts. each, 75 cts. per doz.

STOKESIA CYANEA (Corn Flower Aster)

This beautiful hardy perennial plant is not yet quite so well known as it should and deserves to be. No garden, large or small, should be without it. As a single specimen or group in the hardy border it makes for itself a place that cannot be filled by any other hardy plant, while for beds or masses of any size it ranks with the Phlox, Peony and Iris. It is of the easiest culture, blooming the first year from seed, and succeeding in any open sunny position. The plants grow from 18 to 24 inches high, and begin flowering in July, continuing without interruption till late in October to produce their handsome lavender-blue centaurea-like blossoms, which are highly valuable for cutting, supplying a shade of color not over-plentiful at any season of the year. 10 cts. each, \$1 per doz.

SWAINSONA ROSEA

This is the very best red variety. Identical with the white, except in color of flowers. 15 cts.

SMILAX

A pretty climbing plant with dark, glossy green leaves; extensively used in cut-flower work, decorations, etc. Also a good parlor or basket plant. 10 cts.

SOLANUM

Azureum (The Blue Solanum). Of robust growth, soon making fine specimens that cover a porch with handsomely cut foliage. In mild localities it is covered during the late summer months with clusters of large lavender-blue, wistaria-like flowers, which are succeeded by bright scarlet berries that remain perfect a long time. 20 cts.

Jasminoides. A beautiful plant which inclines to a trailing or climbing habit, but never grows higher than 3 to 5 feet, and can be pinched back to bush form. Its flowers are star-shaped, like a clematis, and borne in enormous panicles or clusters, often a foot across. They are pure white, with a violet tinge on the back of petals and buds. In pots it is a fine bloomer, both summer and winter, but when trained against an outdoor wall or trellis, and showing hundreds of magnificent panicles of bloom, it is superb. 10 cts.

TUBEROSES

Well known and easily grown. The bulbs we offer will produce large double flowers of the finest form and texture. 5 cts. each, 50 cts. per doz.

TRADESCANTIA (Wandering Jew)

Fine for hanging baskets, vases, etc. Easily grown if given plenty of water.

Multicolor. Leaves beautifully striped with white, crimson and olive-green; the plant sometimes sports. 10 cts.

Zebrina. Leaves very rich dark green, with a silvery stripe. 10 cts.

VIOLETS

New Giant-flowered Violet, "California."

Single flowers of the deepest blue or purple, and borne on stems 8 to 10 inches long. Can be worn nicely as a corsage bouquet—a difficulty that is overcome in comparison with old sorts. Try one. 10c. each, 75c. per doz.

BED OF CALIFORNIA VIOLETS.

Lady Campbell. Deep purple; fine large double flowers. 15 cts.

Swanley White. This is a sport of the popular and well-known Violet Marie Louise, and is in every way equal to its parents, having the same growth, the same freedom of flowering, the same perfume, the individual flower equally as large but of the purest white. The finest white Violet ever introduced. 10 cts.

Marie Louise. Bold, fine flowers, very fragrant and very prolific. The color is of a dark blue; flowers double. This is the favorite double blue Violet that you see in the florist's window. 10 cts.

Russian. Single dark purple, large, on long stems. Best bloomer of the large kind and altogether the most useful Violet we have ever tried. 10 cts. each, 75 cts. per doz., \$4 per 100.

VERBENAS

Our collection can hardly be surpassed anywhere for large size and distinct and brilliant blooms. It contains the best varieties of the Mammoth and other strains. A bed of Verbenas forms a brilliant ornament for lawn or garden through spring, summer and often through the winter in Texas. We grow a great many named varieties, and can supply plants with flowers in all colors and shades. 5 cts. each, 50 cts. per doz., \$4 per 100.

VINCA (Madagascar Periwinkle)

This old and popular plant should be in every garden. It produces masses of bloom from June till frost, and is of compact, bushy growth. 10c. each, 50c. per doz.

Alba. Glossy leaves; flowers white; beautiful.

Rosea. Rose-colored flowers, with dark eye; very attractive.

WATER HYACINTH

This unique plant floats on the water by means of its curious inflated leaf-stalks, which resemble bladders or balloons filled with air. The beautiful feathery blue roots grow downward in the water in a mass. The plant forms a lovely rosette of its curious, shining green leaves, and sends up spikes of exquisite flowers, resembling in form a spike of hyacinth bloom. Each flower is as large as or larger than a silver dollar, and in color a beautiful soft lilac-rose, sparkling as if covered with diamond dust. The upper petal, which is the largest, has a metallic-blue blotch in the center, and in the center of that a small, deep golden yellow spot. 15c.

Grass and Clover Seeds

ALFALFA CLOVER. Succeeds best on bottom or second-bottom land, where the tap-roots can penetrate and reach water. For hay it should be cut when in bloom, and put in the stack before it becomes dry enough to break in handling. Under favorable circumstances it will produce 5 to 6 tons per acre per year. Sow 20 to 25 pounds per acre. Lb., by mail, 35 cts. Write for prices on larger lots.

WHITE CLOVER. Largely used in making "lawn" mixtures, and is highly esteemed as forage for bees. 60 lbs. to the bus. Plant in fall or spring, 12 lbs. to the acre. Lb. 40 cts. (by mail, 50 cts.).

KENTUCKY BLUE GRASS. For pasture and lawns. Lb. 40 cts., free by mail; \$3 per bus., by express only.

RED-TOP GRASS. Valuable for moist soils; 25 to 30 lbs. to the acre. Lb. 20 cts., free by mail; \$1.50 per bus., by express only.

ORCHARD GRASS. Extremely hardy; one of the earliest to start in the spring, and furnishes pasture the entire season. Sow in spring for fall, 1½ to 2 bus. per acre. Lb. 30 cts., free by mail; \$2.50 per bus., by express only.

BERMUDA SOD. Planting sod is the surest way of getting a stand of Bermuda Grass. Chop the sod into small pieces, scatter broadcast and cover with a plow. The Bermuda will soon come through the ground and spread rapidly. \$1.50 per barrel, \$12.50 for 10 barrels.

BERMUDA GRASS. Our best lawn grass, and also excellent for pasture. Should be sown in spring. 2 lbs. to the acre. Lb. 85 cts.

COLORADO. Grows something like crab grass and about 3 feet high. It sprouts and branches at the joints, and one seed will grow a large bunch. All stock relish it while green and as hay. All who want a first-class grass for summer pasture or for hay should plant Colorado Grass. Lb. 25 cts., postpaid; 20 lbs. \$2.50, 100 lbs. \$10.

JOHNSON GRASS. This is a very fine grass and makes splendid hay. Should be planted where it can be kept isolated, as the seeds soon spread; very hard to kill. Lb. 25 cts., free by mail. Prices on large lots given on application.

RESCUE GRASS. Finest grass for winter pasture. Comes up in the fall and grows all winter. Can be used successfully with Bermuda and Johnson Grass. Lb. by mail, 35 cts., by express 25 cts., 10 lbs. \$2.

LAWN GRASS SEED. Nothing adds more to the attractiveness of a rural home than a well-kept lawn. The first requisite is good seed. For our Lawn Grass Mixture, we use the best quality of the finest varieties of natural grasses, embracing such as are of neat growth, hardy, and best adapted to produce a permanent and fine turf. The quantity required to seed a lawn well should be from 1 to 1½ lbs. for about 300 square feet, or an area of 25 x 15 feet. Per lb., postpaid, 40 cts.; per bus. \$3.

Field Seeds

SEED CORN. Last season, on account of the late summer rains, the native late-maturing varieties of Corn produced better crops than the early northern Corn. The two preceding years, the northern Corn did the best. No one can foresee the seasons. Hence the wise farmer will plant some of each kind. We handle both home-grown and northern Seed Corn of leading varieties, and shall be pleased to quote prices at any time.

TEOSINTE. In wet seasons this is one of the most profitable forage plants that can be grown here. It is a wonderful yielder, and is liked by stock better than sorghum or alfalfa. In appearance it somewhat resembles Corn, but the leaves are much longer and broader. The stalk, containing much saccharine matter, is very nutritious. It can be cut several times during the season, yielding enormously. If allowed to remain without cutting will attain a height of 12 to 15 feet. One seed will sometimes produce twenty to sixty stalks or shoots. It was introduced from a tropical country, and the warmer the climate the better it yields. Should not be planted until the soil is perfectly warm in the spring. Requires about four pounds of seed per acre. Plant in drills 3 feet apart, and two or three seeds every 12 inches in drill. Lb. \$1.10.

MILLO MAIZE. This is quick-growing, and very highly recommended for green food, fodder or ensilage. It makes an enormous yield, making, in favorable seasons, three cuttings from one sowing. It is very nutritious, and greatly relished by all kinds of stock. It also makes a large yield of seed, which makes excellent grain feed for stock and poultry. Sow in May or June, at the rate of six or eight pounds per acre, in drills 3 feet apart. Lb. 25 cts., by mail. Price by peck or bushel given on application.

KAFFIR CORN. Heads of grain weigh from 6 ounces to a pound. Excellent forage, easy to cure, keeps well in shock. If cut in green state makes good green food, and the shoots that spring at once from the roots make a second crop of forage. The grains are said to make excellent meal for human food. Lb. 20 cts., by mail. Prices on large lots on application.

SORGHUM, or CANE SEED. Will give fodder in the driest seasons. Sow broadcast for this purpose about 1 to 1½ bus. to the acre. Prices on application.

BLACK-EYED PEAS, WHIPPOORWILL PEA, MUSH PEAS, LADY PEAS, DELICIOUS PEAS and CLAY PEAS. Prices on application.

SUNFLOWER SEEDS. It is claimed that the seed is equal to linseed for fattening cattle. Sheep, pigs, pigeons, parrots, rabbits and poultry of all sorts will fatten rapidly upon it, and prefer it to other food; it increases the quality of eggs from poultry fed upon it. It is said the plants keep away malaria, chills and fever. Lb. 25 cts., by mail; by express, 10 lbs. for \$1.

DWARF ESSEX RAPE. The true Dwarf Essex Rape is valuable as a fattening food for pasturing sheep in autumn. It is particularly adapted as a "catchcrop," for it grows best late in the season. In the northern states it can be sown at any time from May until the end of Aug., but in the southern states it should not be sown until Sept. or Oct. for winter pasture. Its fattening properties are said to be twice as good as clover. Sow 10 to 12 lbs. per acre broadcast, or 4 to 5 lbs. in drills 15 in. apart. Lb. 25c., by mail; 10 lbs. \$1, by express.

ARTICHOKE, JERUSALEM. This is entirely distinct from the Globe Artichoke, and is propagated by and for its tubers, which are used for pickling and for feeding stock. They yield about 300 bushels per acre. Pk. 50c., bus. \$1.50; 3 lbs. by mail, postpaid, 50c.

SOJA BEAN, or COFFEE BERRY. This valuable forage plant yearly attracts increasing attention. It is one of the most nutritious of all vegetable products. It produces crops of 20 to 30 bushels per acre, and is as easily grown as other beans. The vines are bushy and vigorous; entirely self-supporting. For pasturing or feeding as green fodder it is very valuable and nearly equal to clover for fertilizing. It has also been widely advertised and sold as German or American Coffee Berry. Sow half a bushel per acre broadcast, or a gallon per acre in drills 3½ feet apart and 1½ feet between the plants, dropping two or three beans in a hill. Lb. 20 cts., postpaid; pk. \$1, bus. \$3.50.

BLACK LOCUST SEED. There is a constantly increasing demand for Black Locust Seed in the Panhandle and Oklahoma country, where large trees can in a few years be grown successfully from seed. Oz., 10 cts., lb. 50 cts. postpaid.

FIELD SEEDS, continued

PEANUTS

By planting peanuts and cow-peas the poorest sandy lands may be made to yield crops as productive, regular and profitable as the richer prairie or bottom lands. An acre of peanuts will put more fat on a hog than an acre of corn, and the vines make the finest hay for horses or cattle. They enrich the soil, and in a few years will reclaim and restore old worn-out fields. Should be planted late in the spring, in rows 3½ feet wide, by 18 inches in the row. It requires nearly a bushel of seed per acre.

Spanish. The earliest variety grown. Pods small, but remarkably solid and well filled, and the yield per acre very large; the best variety to grow for fattening hogs. Lb. 25 cts., postpaid; by freight or express, 10 lbs. \$1, 100 lbs. \$7.

Large White and Red Tennessee. These make heavy tops and bear many pods, but the pods often fail to fill out. Prices same as for Spanish.

MACARONI WHEAT. There is an increasing demand for Macaroni hard Wheat, as it seems to be especially adapted to growing in Texas, yielding from 25 to 40 bushels per acre; stands dry weather better than any other wheat. The Government has been recommending our Texas farmers to plant this Wheat, and on this account there is a big demand for it. It makes first-class bread and is also splendid for feeding stock and is a surer crop than any other variety of Wheat. Pk. 50 cts., bus. \$1.65.

SPELTZ, or EMMER. The valuable new grain from Russia. We were much pleased with our experience in growing Speltz last season, and are planting much more extensively of it this season. We believe Speltz has come to take its place with oats, barley, etc.

Speltz has now been grown in the United States in a large way for several years, and each succeeding season not only emphasizes its value, but sees its production increasing to an enormous extent. It is found to be adapted to a wide range of soil and climate, to resist extremes of weather, to be of superior feeding value and to yield so much more heavily than oats and barley as to insure its increasing popularity and its eventual place among the leading and standard cereal crops of the world. Those who have not grown Speltz should not let another season go by without giving it a place, and an important place, too, on the farm. The grain grows tall like rye and matures as early as barley, and each year, when tested by the side of each, it has yielded twice as much per acre as oats and three bushels to one of barley, and it is much better feed for stock than either. It yields from 40 to 80 bushels to the acre, and from 4 to 6 tons of straw hay. You who are interested in your own success will admit that if possible we want to raise grain that is adapted to this country. We are satisfied from experience that this is the coming feed for all kinds of stock. Tough and hardy, it stands the drought better than any other grain, making it a sure crop. It is a grain to sow for profit. Your chickens and geese, your horses and colts, your cows and calves, your sheep, lambs and swine, all will eat it eagerly and flourish. The culture of Speltz is simplicity itself. It's just as easy as sowing oats or wheat. Prepare your land as you would for wheat or oats, and sow at the rate of 75 or 100 pounds per acre. Sow very early in the spring or fall and do not let it stand until it gets too ripe before cutting, as any grain that yields well shells easily. In the green state it makes an excellent pasture. Has given good results both in Texas and Oklahoma. Lb. 25 cts., 3 lbs. 60 cts., postpaid; by freight, 20 lbs. \$1, 100 lbs. \$3.50.

COTTON SEED

Notwithstanding the ravages of the boll weevil in many localities, there is more interest manifested in Cotton than for several years past. The government experts who are studying the boll weevil, advise that the only way now known to fight the weevil is to plant early and improved Cotton Seed, thorough cultivation,

gather the crop early, burn all the stalks and weeds, and in this way destroy the weevil and their eggs. To aid the farmer to plant the best and earliest maturing Cotton we have taken some pains to secure the following varieties:

Geo. W. Truitt Early Large Boll Prolific. Forty bolls will make a pound. Champion Cotton Stalk of the World; 811 Matured Bolls. Exhibited in Dallas, Texas, at Boll Weevil Convention, 1903. Awarded first premium Atlanta Piedmont Exposition, 1889-90; Chattanooga Valley Exposition, 1889-90; Augusta Exposition, 1903. First premium in Savannah, 1901; first premium in Valdosta, Ga., 1902; first premium in Macon, Ga., 1903.

The Augusta, Ga. "Chronicle" gives the following account of Mr. Geo. W. Truitt's triumph at the Augusta Exposition:

Mr. Geo. W. Truitt, of Troup County, is one of the most remarkable farmers in Georgia. By industry and ingenuity Mr. Truitt has made the old red hills of Georgia blossom like the rose. From them he has gotten the most remarkable yields of cotton on record. Truitt's Early Prolific Cotton took first premium for the earliest and most prolific Cotton shown at the Exposition. There were entries of cotton from North Carolina, South Carolina and Georgia, but none to compare with this magnificent specimen that was admired by the thousands of visitors at the Exposition. From the moment the judges saw it there could be no question as to it taking first premium.

Mr. Truitt has raised of this Cotton fifty-two bales to the mule, a record that has never been equaled by any other farm. Has gathered eighty-seven bales in the month of August from one hundred and fifty acres. Has raised 1,635 pounds of lint on one acre. On our own experimental farm last season the Truitt Cotton in competition with the other leading varieties was the best in every respect. It was large and early, and produced more seed Cotton and more lint Cotton than any other variety. To be sure of getting good seed, orders should be placed early. Bus. \$1.10, 10 bus. \$10.

Rowden. The Rowden is early, large and handsome, and seems to be the general favorite wherever known. It is three weeks earlier than average Cotton and produces half a bale more to the acre; does not fall out like some big boll Cotton, and can be picked before the rush season comes on. One man can pick 200 pounds more of this Cotton in a day than of any other varieties. The lint sells for more than average Cotton, on account of its length and whiteness. In fact, no other Cotton we know of combines the good qualities found in the Rowden. Bus. \$1, 10 bus. \$9.

King's Latest Improved. From what we can learn, King's seems to be the best of the early North Carolina Seed. For years past it has stood at the front as the earliest and most productive Cotton grown in this country. Our claims are not idle boasts, but every statement made is backed by official State Reports from various State Experimental Farms. Every one must know that these tests are fair and absolutely impartial, and one shows beyond any doubt that under same conditions of soil, climate and cultivation King's Improved Cotton made an average of 64 per cent more than the other improved Cottons. We give the following from a large Houston firm:

"The superiority of King's Improved Cotton Seed over the others is that it is exceedingly prolific, that it is a fine staple, and what is of the greatest importance is that it is the earliest known variety of Cotton, and as in this section we suffer a great deal by the ravages of the Mexican weevil, this Cotton, maturing so early, in a measure overcomes this drawback. From our experience we can unhesitatingly recommend it to planters." —BORCHARD, BRASHER & Co. Bus. \$1, 10 bus. \$9.

Jones' Improved. This is an early variety of Cotton which has been grown successfully in Texas for several years. It is a good yielder and, owing to its length of staple, commands a premium on the market. Bus. 90 cts., 10 bus. \$8.50.

Vegetable Seeds

Following is a list of Vegetable Seeds generally planted by the market-gardeners around Fort Worth, and includes the varieties best adapted to Texas.

NOTICE.—While we exercise the greatest care to have all our seeds pure and reliable and true to name, we do not give any warranty, express or implied, and will not in any way be responsible for the crops. If the purchaser does not accept the seeds on these conditions, they must be returned at once.

When **Packets, Ounces and Pounds** are ordered at list prices, they will be mailed free of postage.

When **Pints and Quarts** are ordered by mail at list prices, 15 cents per quart or 8 cents per pint must be added for postage.

Fifteen cents must be added to every order for seeds in bulk, from a peck up to two bushels; this is to cover cost of seamless sacks in which to ship the seeds.

PACKET SEED DISCOUNT

This does not refer to seeds offered by weight or measure, but to seeds in packets only, nor does it refer to Potatoes, Onion Sets or Bulbs.

For 25 cents you may select six 5-cent packets of Vegetable or Flower Seeds.

For 50 cents you may select thirteen 5-cent packets of Vegetable or Flower Seeds.

For \$1 you may select seeds in packets to the amount of \$1.30.

For \$2 you may select seeds in packets to the amount of \$2.75.

For \$5 you may select seeds in packets to the amount of \$7.25.

Market-gardeners should write for special prices, stating quantity of each sort of seed wanted

ASPARAGUS

Conover's Colossal. The standard variety. A strong, rapid-growing sort. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Columbian Mammoth White. An entirely new and magnificent variety of Asparagus, which is sure to be in great demand, because it furnishes white shoots which stay white as long as fit for use without earthing up. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb., 75 cts.

Asparagus Roots. When roots instead of seeds are planted, the Asparagus bed is ready for use a year or two earlier, thus saving both time and trouble. The extra expense is comparatively light, and the beds last a long time. \$1.50 per 100. Write for prices on large lots.

BEANS

If Beans are sent by mail, add 15 cts. per quart for postage.

Dwarf, or Bush

Improved Extra-Early Red Valentine. Pkt. 5 cts., qt. 25 cts., pk. \$1.50.

Burpee's Stringless Green Pod. Qt. 30c., pk. \$1.75.

Dwarf German Black Wax. Pkt. 5 cts., qt. 30 cts., pk. \$2.

Golden Wax. Pkt. 5 cts., qt. 30 cts., pk. \$2.

Wardwell's Kidney Wax. Write for prices.

Improved Golden Wax. Pkt. 5c., qt. 30c., pk. \$2.

Henderson's Bush Lima. Qt. 35 cts., pk. \$2.

Pole, or Running Beans

Southern Prolific. Produces pods in clusters, and excellent Snap Beans in 80 days. Pkt. 5 cts., qt. 35 cts.; by mail, 50 cts.

Kentucky Wonder. Blossoms white, pods green, very long, often reaching 9 to 10 inches. Pkt. 5 cts., qt. 40 cts.; by mail, 55 cts.

White Creaseback. This is the earliest and best early green-podded pole bean for snapshorts. Pkt. 5 cts., qt. 30 cts.; by mail, 45 cts.

Lazy Wife. A superior home garden variety. Desirable either for cooking in the pod or shelled for winter. The large, green pods are from 4 to 6 inches in length. Very tender and of delicious flavor. They are broad and thick, and are stringless until quite large. Dry beans are round, pure white. Possibly so named because easy to pick and cook. Rather late in bearing. Qt. 40 cts.; by mail, 55 cts.

Large Lima Pole Beans. Qt. 40c.; by mail 55c.

BEETS

Bastian Early Blood Turnip. Early and of fine flavor. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 55 cts.

Early Egyptian. An old standard variety; flat and somewhat coarser grained than Eclipse. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Eclipse. Skin smooth, deep red. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Edmand Early Blood Turnip. Roots smooth, deep dark red, very tender and sweet. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Early Flat Bassano. Early and flat; flesh white and rose, very tender, sweet and juicy. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Half-Long Blood. An excellent second-early. Good also for winter use. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Smooth Long Dark Blood. As the name indicates, this is a long, dark blood Beet, grown for winter use. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 55 cts.

Mangel-Wurzels

Stock-feeding varieties. Sow 6 or 8 lbs. to acre.

The following varieties, used for stock feeding, are easily grown and harvested, and their value for this purpose cannot be overestimated. They keep well during the winter, and furnish a great abundance of cattle food at small cost. They do admirably well in Texas, and should be planted by every farmer and stock-raiser. We make special prices when ordered in quantity.

Norbiton Giant, or Red Mammoth Mangel. Enormous size and very productive. Oz. 5 cts., $\frac{1}{4}$ lb. 15 cts., lb. 45 cts.

Golden Tankard Mangel. Contains less water and more sugar than any other Mangel. A special feature is the rich, deep yellow color of the flesh, and its nutritious and milk-producing qualities. It is very hardy and productive, grows two-thirds above ground, and can be dug very easily. Oz. 10c., $\frac{1}{4}$ lb. 15c., lb. 45c.

Sugar, White French. Roots long and smooth, and grows to a large size. Oz. 10c., $\frac{1}{4}$ lb. 15c., lb. 45c.

BRUSSELS SPROUTS

Cultivated for the small heads that spring in considerable numbers from the main stem. Sow in seed-bed middle of spring, and transplant and manage as winter cabbage. Pkt. 5 cts., oz. 20 cts.

CAULIFLOWER

Early Snowball. An extremely early dwarf variety, producing magnificent white heads of fine quality. Adapted to hotbed culture. Pkt. 20c., oz. \$2.50.

CARROTS

Danvers. It is of a bright orange color, smooth, symmetrically formed. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 90 cts.

Early Oxheart, or Guerande. The shape is nearly oval, and the color and quality all that can be desired. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

Half-Long Scarlet Nantes. Bright scarlet in color, and of fine flavor. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

Long Orange. The old standby, both for table use and for stock-feeding for late summer and winter. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 90 cts.

HENDERSON'S EARLY SUMMER CABBAGE.

CABBAGE

Realizing the vital importance of having our Cabbage seed absolutely pure, fresh, reliable, and of the very best strains, we have taken pains to procure the seed of the leading Cabbage seed specialists in America. Growers cannot afford to plant cheap seed if the quality is thereby lowered.

All-Head Early. The earliest of all large Cabbages; fully one-third larger than Early Summer. Very tender and of fine quality. Pkt. 5c., oz. 25c., $\frac{1}{4}$ lb. 75c.

All-Seasons. The best general-crop Cabbage in cultivation; early, and a good keeper. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 70 cts.

American Perfection Savoy. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts.

Early Flat Dutch. An excellent second-early sure-heading, reliable Cabbage. Solid, and stands long without bursting. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 50c., lb. \$1.50.

Early Jersey Wakefield. A select strain. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 75 cts.

Early Large York. This succeeds the Early York, and is more desirable. It is of large size, about 10 days later. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.25.

Early Winnigstadt. A good variety for general use, being a sure header; comes in about three weeks later than the first-early sorts. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 50 cts.

Extra-Early Express. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 50c.

Early Drumhead, or Johnsdad Drumhead. Heads round, flat; one of the latest among the early sorts. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 50 cts.

Fottler's Improved Brunswick. Heads large, flat, solid, and of good quality. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts.

Georgia Collards. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 35c.

Large Late Drumhead. Heads large, flat, and solid, and a good keeper. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 50c.

Henderson Early Summer. An excellent early Cabbage, with large, flat heads, maturing about the same time as Wakefield. Pkt. 5c., oz. 20c., $\frac{1}{4}$ lb. 60c.

Mammoth Rock Red. This is by far the best, largest and surest-heading red Cabbage ever introduced. Pkt. 5 cts., oz. 20 cts.

Premium Late Flat Dutch. Head large, bluish green; round, solid, broad and flat on top; is a fall and winter variety, and one of the very best to keep. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts.

Succession. A very even heading second-early sort; heads round; ready for use a few days later than Early Wakefield. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 75 cts.

Surehead. Solid, large head, with a few outer leaves. It is a strong, vigorous grower, ripening late for a main crop. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 65 cts.

"The Charleston," or large type of Wakefield. (Selected stock.) This new variety is considerably larger than the old type Jersey Wakefield, and only three or four days later. Oz. 25 cts., $\frac{1}{4}$ lb. 90 cts.

CELERY

Half-Dwarf. An excellent and popular variety. Pkt. 5 cts., oz. 15 cts.

White Plume. Self-blanching to a great extent. Pkt. 5 cts., oz. 20 cts.

Boston Market. White, crisp and solid; of rather loose habit. Pkt. 5 cts., oz. 20 cts.

CELERIAC (Turnip-rooted Celery)

A variety of celery having turnip-shaped roots, which are cooked and sliced and used in vinegar, making a most excellent salad. Pkt. 5 cts., oz. 20 cts.

CUCUMBER

The Cucumber crop was almost a total failure the last two years, thus causing the greatest shortage ever known.

Evergreen White Spine. Very early and prolific; straight and full; retains its deep green color, in all stages of growth; fine for market and forcing. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 35 cts.

Arlington White Spine. The old standard favorite for market and shipping. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 35c.

Early Frame, or Short Green. For slicing or pickling; productive and early. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 35 cts.

Improved Long Green. (Jersey Pickle.) Dark green; crisp and productive. Pkt. 5 cts., oz. 10c., $\frac{1}{4}$ lb. 35c.

CORN, SWEET

Our Corn is all northern-grown, and must not be confounded with Texas-grown stock, as it is from 10 to 15 days earlier.

If sent by mail, add 5c. per pt. 10c. per qt. for postage.

Extra-Early Adams. Earliest good Corn. Ears small, but well filled. Must be planted on very rich soil, and well cultivated. Qt. 20 cts., pk. 90 cts., bus. \$3.50.

Early Adams. The most popular and profitable early fine Corn for this section. Ears white, large; free from worms. Pkt. 5c., pt. 10c., qt. 20c., pk. 90c., bus. \$3.50.

Improved Stowell Evergreen. Standard late variety. Pkt. 5c., pt. 10c., qt. 20c., pk. \$1, bus. \$4.

Country Gentleman. Entirely distinct; cob small, with deep pearly white kernels. Pkt. 5 cts., pt. 10 cts., qt. 20 cts., pk. \$1.25.

Mexican June. See Field Corn.

EGGPLANT

Improved New York Purple. The best Eggplant in cultivation. Fruit large, round, solid and weighty. Popular with market-gardeners and amateurs. Pkt. 5 cts., oz. 40 cts., $\frac{1}{4}$ lb. \$1.15.

Florida High Bush. A new variety of strong, upright growth; fruit large, of excellent quality, and usually borne a foot or more above ground. Pkt. 10c., oz. 50c.

ENDIVE

Green Curled. Has beautifully curled, dark green leaves, which blanch white and are very crisp and tender, forming a valuable addition to the list of salads. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 45 cts

KALE

Dwarf Curled Scotch, or German Greens. Plant low and compact, but with large leaves curled, cut and crimped until the whole plant seems like a bunch of moss. Oz. 15 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

Siberian. Pkt. 5c. and 10c., $\frac{1}{4}$ lb. 25c., lb. 90c.

Tall Green Curled Scotch. This makes a beautiful plant about 2 $\frac{1}{2}$ ft. high. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

KOHLRABI

CULTURE.—Same as for turnips.

Early White Vienna. Very early; small, handsome white bulbs; a fine variety for forcing. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 70 cts.

LEEK

London Flag. Pkt. 5 cts., oz. 15 cts.

LETTUCE

Black-seeded Simpson. A cutting variety of unusual merit; one of the most popular sorts. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. \$1.

Early Curled Simpson. Similar to above; more curled. Price same as above.

Grand Rapids. Leaves of medium size, light yellowish green, much crimped and frilled, thin, but of very upright growth; crisp, tender and of good quality. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. \$1.

Denver Market. Forms large, solid heads of light green, very slow to go to seed. The leaves are beautifully marked and crimped, very crisp, tender and of excellent flavor. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.10.

Deacon. Stands hot weather better than any other of the rich butter varieties; it is also good for forcing. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 40 cts., lb. \$1.25.

NEW ICEBERG LETTUCE.

Salamander. One of the best summer varieties, forming large, solid heads, composed of thick, smooth, very tender leaves, bright green and attractive; the inner ones finely blanched and of the finest quality; a hardy, crisp and good eating sort and splendid to sow for a succession of crops. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

Big Boston. Resembles the popular Boston Market, but is nearly twice as large. A most desirable variety for forcing in coldframes and for outdoor planting. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.10.

New Iceberg. There is no handsomer or more solid Cabbage Lettuce in cultivation—in fact, it is strikingly beautiful. The large curly leaves which cover the outside of the solid heads are of a bright, light green. It matters not whether in the early spring or the hottest days of summer, the leaves are always crisp and tender. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.25.

Boston Curled. Early; very curly and fringed. Showy, and a fine seller. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.10.

Prize Head. Plant large, deep green, so washed with red as often to appear more red than green, forming a head of a dense mass of leaves rather than one like a cabbage, and very slow to run to seed; leaves large, nearly round, frilled at the edge and densely blistered. They are exceedingly crisp, tender and good flavored. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

Passion. A large, handsome cabbage Lettuce. The leaves are golden yellow and very tender. It is specially fine for autumn and winter planting at the South, maturing finely for spring shipments. It grows very large, and is one of the mammoth varieties. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.10.

Hanson. A good heat-resisting variety; compact head; very crisp and tender. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

Brown Dutch Winter. A very hardy sort, medium size, fine flavor. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

MUSKMELONS, or Cantaloupes

Baltimore, or Acme. Oblong fruit, of large size, ribbed and heavily netted; a good shipper. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.10.

Chicago Market. Almost perfection in appearance and flavor. Very popular with the market-gardeners here. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

Emerald Gem. Pkt. 10 cts., oz. 15 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.10.

Extra-Early Hackensack. A week or ten days earlier than the old Hackensack. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 40 cts., lb. \$1.25.

Hackensack. Large, round; of delicious flavor, and wonderfully productive. Oz. 10 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.10.

Nutmeg. Small, netted, and sweet-flavored. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. \$1.

Paul Rose. A choice breakfast table delicacy. Sweet as nectar. Pure seed. Pkt. 5 cts., oz. 15 cts., $\frac{1}{4}$ lb. 50 cts., lb. \$1.50.

Rocky Ford, or Netted Gem. Oval, slightly ribbed, densely netted. Flesh thick, green, very sweet and high flavored. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 70 cts.

WATERMELONS

Black Diamond. A cross between Kolb's Gem and Hoosier King. Its prominent point of merit is its extreme size and productiveness. Melons weighing from 75 to 90 lbs. are frequent. Form somewhat oval; skin dark green, almost black. Quality equal to Sweetheart. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 75 cts.

Black Boulder. Skin dark green; very large, productive and of finest quality. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 75 cts.

Cuban Queen. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Florida Favorite. Oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75c.

Georgia Rattlesnake, or Gipsy. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Gray Monarch, or Mammoth White Icing. Truly fine variety. The skin is a very light green color. The flesh is deep red in color, and of very fine quality. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Kolb Gem. The best late melon for this climate; nearly round and grows to a large size. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 65 cts.

WATERMELONS, continued

Pride of Georgia. Nearly round; rind dark green, flesh bright red and very sweet; a good market melon. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 35 cts., lb. 75 cts.

Kleckley Sweets. This is one of the finest flavored melons grown. Shape oblong, skin dark green, rind thin. The melons are always extremely solid, never a hollow one. The flesh is beautiful bright red, and heart very large and meaty. The quality and flavor are grand, being extremely sweet, melting and luscious. For the family garden, and also for home market, this variety is highly recommended. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 35 cts., lb. \$1.

Seminole. This melon has the peculiar distinction of being of two distinct colors—gray and light green; melons of both colors are exactly alike in shape, size, color of seed and all other points except color of skin; oblong, large, productive and of superior quality. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Duke Jones. Outside color solid green. Flesh bright red, sweet, juicy and melting. Large size; resembles Kolb's Gem in shape, and is a splendid shipper. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 75 cts.

Jones Jumbo. The color of the skin is a solid green, and the flesh is a very bright red, particularly sweet, juicy and melting. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Sweetheart. Fine, vigorous and productive, ripening its fruits early. Large, oval, mottled light and dark green; flesh bright red, firm, solid but very tender, melting and sweet. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Girardeau's Triumph. Nearly round; color blackish blue; rind thin but firm; flesh bright red, sweet, juicy, of unsurpassed quality and an excellent shipper. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 75 cts.

Bradford. Favorite in the South. Long, dark green, lighter wavy bands. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

THE HALBERT HONEY WATERMELON.

The Halbert Honey. This melon originated in Texas, and is therefore as well adapted to this section as it is possible for it to be, and we are convinced that it is one of the best melons ever grown with us for private use or near-by markets. The rind is thin, and will not hold for shipping any great distance. As the name indicates, the beautiful crimson flesh of this melon is probably sweeter than any other variety in cultivation, surpassing even the famous Kleckley's Sweet. It has scarcely any pulp, and is very melting. It is long, dark green, slightly ridged, blunt at both blossom and stem ends, and runs from 15 to 30 inches in length, and from 5 to 10 inches in diameter. There are earlier melons, but they cannot compete with this variety after it is ready for market. It uniformly demands the highest price, and nearly always considerably more than the market. It is more productive than any other variety we have seen, in all combining so many good points that we feel that it is a valuable addition to our list of melons. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

MUSTARD

Black. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 15 cts., lb. 40c.

Giant Southern Curled. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

White. For flavoring. Lb. 40 cts.

OKRA

White Velvet. Excellent; used chiefly for flavoring soups. White Velvet is by far the best variety. Plant in rich soil, and use the pods while tender. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

ONIONS

Wethersfield Large Red. A standard variety; large and productive. A good keeper and shipper. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 90 cts.

Yellow Globe Danvers. A standard yellow sort. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 90 cts.

Australian Brown. An extra-early, long-keeping Onion, recently introduced from Australia. It is of medium size, almost globular, deep amber-brown and extremely early; planted with Wethersfield it proved to be nearly four weeks earlier. The flesh is extremely hard, firm, of fine flavor, and will keep almost indefinitely. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 90 cts.

Italian Onions

Prizetaker. The Prizetaker Onion grows uniform in shape, of a nearly perfect globe, with thin skin of a clean, bright straw color; it is of immense size, measuring from 12 to 16 inches in circumference, while under special cultivation specimen bulbs have been raised to weigh from 4 to 6 pounds each. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.10.

Extra-Early White Pearl. This remarkable Onion is the earliest and best of all the white varieties. It grows to an enormous size and shape; color pearly white, the outer skin having a most showy, waxy appearance; flesh pure snow-white; flavor so mild that it can be eaten like an apple. It grows with wonderful rapidity, reaching a fine size the first season from seed. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 75 cts., lb. \$2.50.

Mammoth Silver King. A large variety, with bulbs often weighing 2 pounds or more; skin silvery white. The flesh is snowy white and of particularly mild and pleasant flavor; very sweet, crisp and tender; one of the best for slicing with salads. Its fine appearance makes it a great favorite. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.25.

Giant White Tripoli. Grows to an enormous size, especially in the South. White skin, flat and of mild flavor. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 75 cts., lb. \$2.25.

ONION SETS, Red, White, Yellow. Qt. 35 cts., free by mail.

Price by peck or bushel given on application. Be sure to write us for prices. We can make them interesting to you.

PEPPERS

Bell, or Bull Nose. Similar to Sweet Spanish, but large and very hot. Pkt. 5 cts., oz. 25 cts.

Large Sweet Spanish. The large, red variety, generally used for pickles. Pkt. 5 cts., oz. 25 cts.

Long Red Cayenne. Pods long, slim, pointed, bright red, pungent. Pkt. 5 cts., oz. 25 cts.

Ruby King. Fruit bright red; very large; can be sliced like tomatoes and cucumbers. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 75 cts.

Small Chili Red. Very hot. Pkt. 5c., oz. 25c.

Procopp's Giant. Large size, measuring from 8 to 9 inches long and 3 inches thick. In flavor they are just hot enough to be pleasant to the taste. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 75 cts.

PARSNIPS

Hollow Crown. An old and well-known variety. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 50 cts.

PARSLEY

For flavoring and ornamenting dishes

Moss Curled. Elegant ornamental leaves. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Plain, or Single. Pkt. 5 cts., oz. 10 cts., lb. 60 cts.

POTATOES

We offer for seed only the choicest Potatoes, selected especially for seed purposes. With the exception of Bliss' Triumph, which is southern-grown, all our seed Potatoes comes from far north. We cannot here give prices, as they are subject to change at any moment according to market conditions. We shall be pleased to quote prices on any quantity.

SWEET POTATOES

Write for prices on Potatoes and slips.

PUMPKINS

Connecticut Field. Grown for feeding stock. Pkt. 5 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Cushaw. A large Pumpkin, weighing from 60 to 80 pounds; a good keeper, and excellent for pies. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 85 cts.

Large Cheese. An excellent table sort; large, flat and a good keeper. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Kentucky Field. Large; round; soft shell; salmon color; very productive; best for stock. Pkt. 5 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

Tennessee Sweet Potato. Of medium size, pear-shaped; color creamy white, lightly striped with green; flesh thick, fine-grained, dry, brittle, and of excellent flavor. Oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

PEAS

Postage 15 cts. per quart extra if sent by mail

Alaska. A novelty of remarkable earliness. Height 2 feet. Ripens evenly. Pkt. 5 cts., qt. 25 cts., pk. \$1.25.

Bliss' Everbearing. A variety maturing soon after the Gem, and continuing a long time in bearing. Vine stout; 18 inches. Qt. 25 cts., pk. \$1.40.

White Marrowfat. Qt. 20 cts., pk. \$1.25.

Extra-Early. Similar to First and Best. Pkt. 5 cts., qt. 30 cts., pk. \$1.40.

First and Best. Smooth-seeded; plant heavy yielder. Fine for market. Pkt. 5c., qt. 25c. pk. \$1.40.

McLean's Advancer. A fine market variety; prolific, early, tender; 2 $\frac{1}{2}$ feet. Qt. 30 cts., pk. \$1.50.

Carter's Premium Gem. (Wrinkled.) A valuable extra-early, dwarf wrinkled Pea, robust in growth, with long pods; height 1 foot. Qt. 30 cts., pk. \$1.60.

Telephone. A wrinkled variety of very robust habit and a great bearer. A single vine produces from 18 to 20 unusually long, well-filled pods, of largest size, containing 10 to 11 peas, often forming a double row; height about 4 or 5 feet. Qt. 30 cts., pk. \$1.75.

Abundance. Pods containing 6 to 8 large wrinkled peas of excellent quality. It ripens about one week after the earliest kinds. Qt. 25 cts., pk. \$1.40.

Nott's Excelsior. Here is a Pea that should be planted in every garden. It takes the prize for the best extra-early, dwarf wrinkled sort, that in quality surpasses all. In brief, it combines every good point of the American Wonder and Premium Gem, and without any of their deficiencies; about 15 inches. Pkt. 5 cts., qt. 35 cts., pk. \$2.

Champion of England. For the late general crop in the South, the sale of this seed is larger than that of any other. Is very productive and of the best quality; average 4 $\frac{1}{2}$ feet. Pkt. 5c., qt. 25c., pk. \$1.40.

Gradus (Prosperity). Generally as early as the earliest tall smooth sorts, with peas and pod fully twice as large. Has every good quality of the late wrinkled sorts, and only misses being the most valuable Pea of any kind by lacking somewhat in productiveness. However, many market-gardeners grow it quite extensively, and it will always be popular for home gardens; about 18 inches. Pkt. 10 cts., qt. 50 cts.

WHITE STRASBURG SUMMER RADISH.

RADISHES

Early and Late

Chartier, or Long Rose. Second early; in color the greatest length of the root is scarlet and pink, while the lower part is white. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 65 cts.

China Rose. Large and mild; a fine fall Radish. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 65 cts.

Early Deep Scarlet Olive. Pkt. 5 and 10 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 70 cts.

Early Scarlet Turnip-rooted. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

French Breakfast. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 70 cts.

Half-Long Deep Scarlet. Oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 65 cts.

Long Black Spanish. Black skin, flesh white, firm and of excellent flavor. Pkt. 5 cts., oz. 7 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Round Black Spanish. Similar to above except in form. Pkt. 5 cts., oz. 7 cts., $\frac{1}{4}$ lb. 20 cts., lb. 75 cts.

Long Scarlet Short-Top. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Non Plus Ultra. The earliest. Pkt. 5 cts., $\frac{1}{4}$ lb. 20 cts., lb. 65 cts.

Short-topped Earliest White Turnip. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 65 cts.

White-tipped Early Scarlet Turnip. A fancy French variety; scarlet roots with white tips. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Early Long White Lady Finger. Shape handsome; skin and flesh beautiful snow-white. It is of very rapid growth and its flesh is remarkably crisp, brittle and tender. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 20c., lb. 65c.

Long Cardinal, or Long Brightest Scarlet. Tipped with white. Oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 60 cts.

Early Scarlet Globe. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Forcing Early Scarlet Turnip White-tipped. One week earlier than the Scarlet Turnip White-tipped. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts., lb. 75 cts.

White Strasburg Summer. Large, oblong; flesh and skin pure white. Continues to grow and remains tender all summer. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 25 cts.

SALSIFY (Oyster Plant)

Sandwich Island. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 50c., lb. \$1.50.

SPINACH

Savoy-leaved. Pkt. 5 cts., $\frac{1}{4}$ lb. 20 cts., lb. 40 cts.

SQUASHES

Early Bush Summer Crookneck. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

Hubbard. An excellent sort in every way. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 40 cts., lb. \$1.25.

White Bush Scalloped. The kind most commonly planted. Early and productive. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 30 cts., lb. \$1.

TOBACCO

Big Oronoca. Pkt 5 cts., oz. 25 cts.

TOMATOES

Acme. A standard purple-fruited variety. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 65 cts.

Atlantic Prize. The largest, smoothest, best-flavored, brightest-colored and earliest Tomato. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 65 cts.

Beauty. Well known; still a leading sort. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 65 cts.

BEAUTY TOMATO.

Dwarf Champion. Erect, tree-shaped plants, producing very fine Tomatoes in great abundance. Pkt. 5 cts., oz. 25 cts., $\frac{1}{4}$ lb. 90 cts.

Golden Champion. Similar to the Dwarf Champion, but of golden yellow color. Pkt. 5 cts., oz. 35 cts.

Yellow Plum, or Pear. For pickling and preserves. Fruit uniformly oval, lemon-colored and smooth-skinned. Pkt. 5 cts., oz. 35 cts.

Large Round Yellow (Golden Trophy). Firm, yellow flesh, with a clear, semi-transparent, yellow skin. Pkt. 5 cts., oz. 30 cts.

Yellow Cherry. Pkt. 5 cts., $\frac{1}{4}$ oz. 30 cts.

Sparks' Earliana. The earliest large, smooth Tomato in the world. The most perfect of all Tomatoes; of large, uniform size and beautiful red color; quality almost beyond praise; ripens thoroughly all over, the stem-end coloring up perfectly; almost seedless and as solid as beefsteak; most vigorous grower; a prodigious bearer, continuing until frost. Succeeds everywhere from Maine to California, and Canada to Mexico. Pkt. 10 cts., oz. 50 cts.

Dwarf Aristocrat. (New.) Resembles Dwarf Champion in habit of growth, but has beautiful rich, glossy red fruit. Desirable for forcing or growing outside for early market. Pkt. 5 cts., oz. 25 cts.

TURNIPS

We can furnish most of the leading varieties of Turnips.

Golden Ball. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 50 cts.

Yellow Aberdeen. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 50 cts.

Early White Flat Dutch. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 50 cts.

Purple-top Strap-leaved. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 50 cts.

Purple-top White Globe. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 50 cts.

Pomeranian White Globe. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 50 cts.

Amber Globe. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 20c., lb. 50c.

Seven Top. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 20c., lb. 50c.

Improved Rutabaga. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 50c.

White Egg. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 20c., lb. 60c.

White Cow Horn. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 20c., lb. 60c.

Large Sweet German. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 60 cts.

Extra-Early Purple-Top Milan. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 70 cts.

Extra-Early White Milan. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 20 cts., lb. 70 cts.

Herbs, Sweet, Pot and Medicinal

Anise, Basil (Sweet), Caraway, Coriander, Dill, Hoarhound, Hyssop, Lavender, Marjoram (Sweet), Sage, Thyme. Each, 5 cts. per packet.

Vegetable Plants and Roots

No orders shipped for less than \$1. Prices net; no discount. Plants must go by express.

ASPARAGUS

This is one of the first and finest relishes that come to the table from the garden, and it really requires very little trouble in cultivation. 25 cts. per doz., \$1.50 per 100.

CABBAGE PLANTS

We grow and can furnish plants of nearly all the varieties quoted in this catalogue. 25 cts. per doz., \$1 per 100. After April 1, 40 cts. per 100, \$3 per 1,000.

SWEET POTATO PLANTS

Prices on application.

HORSE-RADISH ROOTS

Small roots. 25 cts. per doz.

TOMATO PLANTS

All the leading and popular varieties. 25 cts. per doz., \$1 per 100. After April 1, 50 cts. per 100, \$4 per 1,000.

PEPPER, EGGPLANT and SAGE

Pot-grown, 50 cts. per doz.

RHUBARB ROOTS

10 cts. each, \$1 per doz.

FLOWERS OF NASTURTIIUMS.

Flower Seeds for Southern Climes

ANY people in Texas have an idea that flowers cannot be raised successfully from seeds here, and so never make the attempt. This impression is often due to failures caused by the gardener's not knowing *how*, *when* and *where* to plant, and more especially *what* to plant. The plants recommended most highly in northern catalogues as growing well from seeds are often just the ones that fail first here, because the season, temperature, etc., are entirely different. If, instead of trying to grow Asters, Gloxinias, Cyclamen, etc., we would devote our time to **Phloxes, Vincas, Nasturtiums, Cosmos, Dianthus, Calliopsis, Sweet Peas, Snapdragon, Mignonette, Candytuft, Alyssum, Hollyhocks, Petunias, Verbenas, Portulacas, Zinnias**, etc., there would be less disappointment and many more flowers.

We import our seeds from the best growers in Europe, and feel perfectly safe in recommending them as pure, fresh and reliable. The seeds should be sown much earlier here than is usually recommended, because our season begins much earlier here than in the North. February, March and April are the months in which to sow nearly all flower seeds. It is a good plan to first sow seeds in shallow boxes of any good, light soil—sandy is the best—and keep them in a warm, sunny part of the room till the young plants are large enough to be transplanted to the open ground.

Annuals are plants that blossom, mature their seeds within a year after the seed is sown, and then perish. **Biennials** flower the second and sometimes the third year after the seed is sown, and then perish. **Perennials** live and bloom for many years after the seed is sown.

☛ All Flower Seeds sent by mail, postpaid, on receipt of remittance, as above. Prices quoted are for seeds in packets

ABRONIA. Beautiful trailing plants, with pretty verberna-like clusters of flowers; valuable for hanging baskets or vases. Half-hardy annuals.

Umbellata. Rosy lilac, white eye. 5 cts.

ADONIS. Also known as Pheasant's Eye. Showy, hardy annuals of easy culture, with pretty, fine-cut foliage, and lasting a long time in bloom.

Aestivalis. Dark crimson flowers with a lighter center. 1 foot. 5 cts.

AGERATUM. A flower greatly in demand on account of its easy culture and constant blooming. Half-hardy annual. Choice mixed. 5 cts.

AGROSTEMMA. Very useful for cutting for bouquets, and pretty in masses in beds. 1½ feet high; hardy. 5 cts.

AMARANTUS. Highly ornamental plants, giving the border a subtropical appearance.

Tricolor (Joseph's Coat). Leaves red, yellow and green. 5 cts.

Caudatus (Love-Lies-Bleeding). 5 cts.

ALYSSUM, SWEET. A general favorite. Fragrant; much prized for cutting. Hardy annual. 5 cts.

Vaughan's Little Gem. This should really be called "**Snow White Carpet Plant**," for the plants, which are only a few inches high, grow so dense, and are so completely covered with snow-white blossoms, that they create the impression of a beautiful carpet spread over the ground. We know of no other white flower which is so particularly well adapted to borders, ribbons, etc., as our "Little Gem" Alyssum. The plants commence to bloom when quite small, and will flower uninterruptedly all summer long till late in the fall. Added to this is the sweet fragrance, and we cannot see how a garden can be complete without this variety. Pkt. 10 cts.

AMMOBIUM. Small but pretty white flowers. This is one of the hardiest of the Everlastings.

Alatum grandiflorum. 5 cts.

ANNUAL CHRYSANTHEMUMS. No annual furnishes so many cut-flowers as these, which bloom plentifully throughout the summer.

Double White. 2 feet. 5 cts.

Double Sulphur-Yellow. A new color; very delicate lemon; valuable for bouquets. 5 cts.

ANTIRRHINUM (Snapdragon). An old favorite for summer and fall flowering. Half-hardy perennial. Dwarf mixed. Flowers of many colors. 5c.

New Giant Fragrant. The flowers of this new strain are of very large size, very fragrant, and are produced on immense long spikes, which render them extremely well adapted for cut-flowers. They are easily raised from seeds, and will grow and bloom in almost any rich, sunny bed. Spring seedlings begin to bloom by midsummer, and if the flowers are cut freely the flowering will be continuous till fall. If intended for winter-flowering in the house, cut them well back in September. Pkt. 10 cts.

Coral Red. A magnificent rich color.

Lovely. White with pink lip.

Crescia. Dark scarlet.

Golden King. Pure golden yellow.

Giant White. Beautiful cut-flowers.

All Colors Mixed.

AQUILEGIA (Columbine). Hardy perennial; very showy. Double mixed. 5 cts.

ASPARAGUS Sprengeri (Emerald Feather). One of the best plants to grow in suspended baskets, for greenhouse or for outdoors in the summer. The fronds frequently grow 4 feet long and are now considered indispensable in all fine decorations; grows readily from seed. Pkt. (15 seeds) 10 cts.

ASPERULA. Very pretty dwarf plant, very much admired for its delightful odor; valuable for bedding and cut-flowers. Choicest mixed. 5 cts.

ASTERS are beautiful annual plants. The seed should be sown under glass and transplanted into rich, loose soil. They need plenty of water.

German Quilled. Mixed colors. 5 cts.

German Globe. Mixed colors. 5 cts.

BALSAM (Lady Slipper, or Touch-me-not). A family of beautiful annuals. Rich soil and deep culture is necessary in order to produce large, showy flowers.

Camellia-flowered. Very fine mixed. 10 cts.

Fine Double Mixed. 5 cts.

Dwarf Double Mixed. 5 cts.

BALSAM APPLE. Very curious climber, with ornamental foliage and golden yellow fruit which opens when ripe, showing the seed and carmine interior. 5 cts.

BRACHYCOME (Swan River Daisy). Free-flowering, dwarf-growing plants, covered during the greater part of the summer with pretty cineraria-like flowers; suitable for edging and small beds, or for pot culture; half-hardy annual.

Iberidifolia. Mixed. Light blue and white. 6 inches. 5 cts.

BROWALLIA. A profuse bloomer, bearing light blue and white flowers. Tender annual. 5 cts.

BELLIS perennis (English Daisy). Well known and liked by everybody. Perfectly hardy. If sown in the fall they will bloom by February and continue blooming until June or July. Mixed colors. 10 cts.

CALENDULA. Handsome hardy annuals, commonly called Cape or Pot Marigolds. They bloom continuously all season; of easy culture. 5 cts.

CALLIOPSIS, or COREOPSIS. One of the finest hardy annuals. Flowers red, orange and yellow, with a center of deep brown or purple.

Finest Single and Double Mixed. 5 cts.

CAMPANULA (Canterbury Bell). A tall, stately plant, with a rich coloring. Will bloom the first year if seed is sown early. Mixed seed. 5 cts.

CANDYTUFT (Iberis). An excellent flower for bedding and cutting; of easy culture.

White. 5 cts.

Mixed. 5 cts.

Snowflake. Extremely free-blooming new sort. The plants grow about 7 inches high, forming a very neat, round bush, covered with the finest pure white flowers. This is an excellent variety, both for pot culture and bedding outside. A continuous bloom may be had throughout the summer by repeated sowings at intervals of about two weeks. Pkt. 10 cts.

CARNATIONS, Margaret. With the simplest culture these lovely, fragrant Carnations will be in full bloom about four months after sowing the seed. The beautiful flowers are of high type, exquisitely sweet, and fully 80 per cent are perfectly double. The range of color, marking, variegation and shadings is simply wonderful. By planting at different seasons, the beautiful flowers of these Carnations can be had all the year round. Pkt. 10 cts., 3 pkts. 25 cts.

 For other varieties, see *Dianthus*.

CANNA (Indian-shot). All colors, mixed. 10 cts.

CLARKIA elegans. Very pretty hardy annuals. Mixed colors. 5 cts.

CELOSIA (Cockscomb). Very handsome, and easily grown.

President Thiers. One of the most dwarf of all Cockscombs; bears largest crimson combs. It has been grown in our public parks between or alongside of rows of Golden Feverfew and *Centaurea candidissima*, and, when so planted, made one of the most brilliant strips of bordered bedding. It is also a very handsome pot-plant. Pkt. 15 cts.

Crimson-feathered. 10 cts.

Mixed. 5 cts.

CENTAUREA Cyanus, Mixed (Bluebottle, or Corn Flower). Beautiful flowers, in blooms all summer; pretty shades of white, blue and deep rose. Hardy annual. 1½ feet. 5 cts.

CENTROSEMA grandiflora. A hardy perennial flower of rare beauty. It blooms early in June from seed sown in April; inverted pea-shaped flowers from 1½ to 2½ inches in diameter, ranging in color from rosy violet to reddish purple. Pkt. 10 cts.

CHRYSANTHEMUM frutescens (Marguerite, or Paris Daisy). This variety, under the name of Marguerite, has attained great popularity among florists. The pretty star-shaped white flowers are freely produced, and the plant will grow under almost any circumstances. Perennial. 10 cts.

CONVOLVULUS major (Morning-Glory). A universally popular climber. Half-hardy annuals. Finest mixture. 5 cts.

COSMOS. Plants 4 to 6 feet high, with fine, feathery foliage. The flowers, resembling the single dahlia, though smaller, are of all shades of rose, purple and pure white, and abundant late in the fall. For cutting, this is one of the finest flowers grown.

Mixed. 5 cts.

Early-flowering. This early-flowering strain will produce blooms from July to November. It is such a strong, vigorous grower, and its fringe-like foliage is such a pretty background for its lovely spreading flowers of white, pink, crimson or rosy purple that it can hardly be spared from any garden. It grows with the greatest freedom in any soil, but repays right royally the best care you can give it. It grows fast and blooms with the greatest freedom. The plants should be set about 3 feet apart and supported by a strong stake, for they are easily bent by the wind. It is really one of the most satisfactory of annuals. 10 cts.

COSMOS, continued

Dwarf Early-flowering "Dawn." Like the preceding, this comes into flower early in the summer, and continues until frost. The flowers are large and of a beautiful white, with just a touch of delicate pink at the base of the petals. It is a decided, most attractive and useful novelty. 10 cts.

"White Pond Lily." A most chaste and lovely flower, with large, plain-edged petals, so beautifully formed as to remind one of a small pond-lily; plants grow about 4 feet high and are very bushy. Flowers on long, strong stems. A very attractive and distinct variety. 10 cts.

"Pink Butterfly." A magnificent new variety, the richest and loveliest shade of pink imaginable. Petals very large, measuring from $3\frac{1}{2}$ to 5 inches across, regularly plaited, giving a full and very beautiful flower; edges evenly toothed. Flowers are on long stems and are quite deep, giving the appearance of large pink butterflies; they have a rich maroon ring around the eye. This is the most exquisite pink Cosmos that has ever been offered. 10 cts.

CYPRESS VINE. A handsome climber, with star-like flowers and delicate foliage; height 15 feet. Half-hardy annual. This ranks among the very best vines for this climate. Scarlet and white. 5c.

DAHLIA. Both the single and double strains of this magnificent race of plants may be had in the greatest variety and beauty from seed. If planted early and forced they can be made to flower the first season. Tender herbaceous perennials. Mixed, 10 cts.

DIANTHUS (Pinks). The China and Japan Pinks comprise many distinct and beautifully marked varieties, of rich and varied colors, and bloom continually all summer and fall, until overtaken by severe frost; they live over winter, and bloom finely again the second season.

Chinensis (Double Chinese Pinks). Clusters of small double flowers; finest mixed. 5 cts.

Double Diadem. Very regular, densely double, and of all tints, from crimson-purple to deep black-purple. Half-hardy biennial, blooming freely the first season. 10 cts.

Heddewigii, Finest Single. Mixed. Magnificent flowers, 2 to 3 inches in diameter. 5 cts.

Laciniatus, Mixed Colors. Finest single fringed sorts. 5 cts.

DELPHINIUM. See Larkspur.

DIGITALIS (Foxglove). Of very stately growth and varied colors, bearing mottled thimble-shaped flowers in fine, showy spikes. The different species have been much improved, and the new large-flowered forms are far superior to old varieties. Hardy perennial. 3 feet. All colors mixed. 5 cts.

DOLICHOS. Mixed. See Hyacinth Bean.

ESCHSCHOLTZIA (California Poppy). A very profuse-flowering plant, with a fine fragrance. Sow in open border about April 1. Hardy annual. Double mixed. 5 cts.

New Giant Eschscholtzia, "Golden West."

Giant Eschscholtzias, developed from *E. maritima*, a variety having light canary-yellow flowers with an orange blotch at the base of each petal, forming a Maltese cross in the center. The flowers of the old type measure 2 inches across; the flowers of these Giants measure from $3\frac{1}{2}$ to 6 inches in diameter and have very large, overlapping petals, often delicately waved at the edges. They are beautifully and variously formed; some are flat and wide open, some saucer-shaped, others very deep with flaring edges. In some the orange blotch almost suffuses the whole flower, in others it runs into the yellow in fine penciled lines; others again have an orange center with a margin of clear yellow, while the Maltese cross in some of the flowers is very distinct. Gorgeous beyond description. 10 cts.

FOUR O'CLOCK. See Marvel of Peru.

FORGET-ME-NOT (Myosotis). The Forget-Me-Not is an old favorite, bearing clusters of star-shaped flowers. It thrives well in the shade or open border. Hardy perennial. 10 cts.

FOXGLOVE. See Digitalis.

GAILLARDIA. Splendid bedding plants, remarkable for the profusion, size and brilliancy of their flowers, continuing in bloom during the summer and autumn. Half-hardy annuals. $1\frac{1}{2}$ feet. Mixed. 5 cts.

GERANIUMS, Splendid Mixed. Planted early, they bloom the first summer. 10 cts.

GOETIA, Lady Albemarle. Plants compact, profusely covered with rosy carmine flowers. 5 cts.

GOURDS. Choice ornamental climbers of rapid growth, bearing fruit of various and curious forms. Many peculiar shapes may be grown by enclosing the young fruits in bottles or molds; they will grow to fit the molds exactly. Mixed seed. 5 cts.

HELIANTHUS (Sunflower). Grown both for its seeds and showy yellow blossoms.

Mammoth Russian. As the name implies, this is an enormous-flowered tall variety, the best to grow for seed; the stalks may be used for fuel. 5 cts.

HELICHRYSUM (Everlasting). Flowers very large and full, and of a good variety of colors. Cut just before the flowers expand. Seeds germinate readily in the open ground. Mixed. 5 cts.

HELIOTROPE. It is but little known that seed sown in February and March will produce large, flowering plants the first summer. Our mixture contains seed from many named sorts, and will produce fine plants with proper treatment. Cultural directions on packages. Mixed. 10 cts.

HOLLYHOCK (Althæa). The seed we offer of this well-known flower is especially fine. Sow in June or July and plants will bloom the next summer. Hardy perennial. Double mixed. 10 cts.

HYACINTH BEAN (Dolichos). Splendid climber, with abundant clustered spikes of purple and white flowers, which are followed by exceedingly ornamental seed-pods. Tender annual. 10 to 20 feet high. 5 cts.

ICE PLANT (Mesembryanthemum). An odd plant of dwarf habit, with leaves covered with crystal globules, from which it takes its name. 5 cts.

IPOMOEA grandiflora (Moonflower). A very desirable climber, not unlike the morning-glory in form. It grows with wonderful rapidity, and will completely cover the side of a house in one season. As its name implies, it blooms only in the night, covering the vines with enormous white flowers, 5 to 6 inches in diameter, with a five-pointed star in the center. Fragrant. A profuse bloomer. Start seed early in boxes, and transplant plants as soon as safe. Half-hardy annuals. 10 cts.

Heavenly Blue. Foliage very large, heart-shaped; flowers 4 to 5 inches across, in large clusters and produced in such abundance as to nearly hide the foliage. Color most magnificent sky-blue. Pkt. (12 seeds) 15 cts.

JAPANESE HOP. A wonderful new annual climber from Japan, growing with great rapidity and having very dense foliage. Color is a lively green. It is undoubtedly one of the best climbers for covering verandas, trellises, etc. 20 feet. Hardy annual. Pkt. 10 cts., 3 pkts. 25 cts.

JAPANESE MORNING-GLORIES. By all odds the grandest of all climbing plants. The flowers, which often attain the enormous size of 5 or 6 inches in diameter, are of the most exquisite beauty, embracing white, rose, purple to almost black, crimson, blue, mottled, striped, penciled, bordered, and an indefinite number of the most beautiful combinations. Vines grow quickly, and 30 to 40 feet in height. 10 cts.

LARKSPUR. Noted for the richness of their colors.
Double Dwarf Rocket. Finest mixed. 5 cts.
Emperor. A single plant has 50 or more erect spikes of flowers. 5 cts.
Tall Rocket. Double mixed. 5 cts.

LOBELIA. Very pretty dwarf plant, with blue, white, crimson and rose-colored flowers. Excellent for baskets. Half-hardy annual. 5 cts.

LUPINUS (Sun-Dial). Long spikes of brilliant flowers. Mixed annual. 5 cts.

MARIGOLD (Tagetes). Handsome double flowers. Half-hardy annual.

African Double Mixed. 5 cts.

Double French Mixed. Dwarf. 5 cts.

MARVEL OF PERU (Four-O'clock). Half-hardy perennial. Fine mixed. 5 cts.

MAURANDIA. Graceful climber for greenhouse, parlor, basket or outdoor purposes. Tender perennial, blooming first season. 6 feet high. Choicest kinds mixed. Pkt. 10 cts.

MIGNONETTE. Hardy annual. Best sorts.

Golden Queen. A very fine new variety; flowers golden hue; effective; of pyramidal habit. 5 cts.

Machet. Dwarf; of delicious fragrance. 10 cts.

Reseda odorata. Large-flowering. 5 cts.

MIRABILIS. See Marvel of Peru.

MOONFLOWER. See *Ipomœa grandiflora*.

MORNING-GLORY. See *Convolvulus*.

MYOSOTIS. See Forget-Me-Not.

NASTURTIUM. This plant is and always will be justly popular. It grows in almost any soil, and withstands heat and drought as few other plants can. The dwarf varieties make very fine beds, while the tall are excellent for trellises, porches and lattices. The seeds are used as a substitute for capers. Hardy annual.

Dwarf Mixed. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 35 cts.

Tall Mixed. Pkt. 5 cts., oz. 10 cts., $\frac{1}{4}$ lb. 35 cts.

Chameleon. This new strain of Nasturtiums is a most remarkable advance in this brilliant family. We find that in richness and varieties of colors it surpasses any other strain, and is also unique in bearing flowers of quite distinct colorings on the same plant, some clear deep crimson, others blotched on light ground and others beautifully mottled. **Tall Chameleon,** pkt. 10 cts., oz. 25 cts. **Dwarf Chameleon.** 10 cts.

NIGELLA (Love-in-a-Mist). An odd plant with curious flowers and seed-pods. Hardy annual. Best mixture, 5 cts.

POPPY.

PANSY. A well-known favorite plant. Sow seed early, in rich beds.

Choice Mixed. 5 cts.

Chicago Park Mixture. This is the best strain for bedding purposes. The plants are of vigorous, even growth; the flowers are large and of good substance. Pkt. 10 cts., 3 for 25 cts.

German Mixed. This is a mixture of several strains from different German growers. Very large and fine. Pkt. 15 cts., 2 for 25 cts.

PETUNIA. Most valuable plants, succeeding well everywhere. They are particularly showy in beds or masses, and are universal favorites on account of their richness of color, fragrance and continuous blooming.

Hybrida. Finest mixed. 5 cts.

Striata. Flowers beautifully striped. 10 cts.

PHLOX DRUMMONDII. No flowers are more showy or brilliant than those of this popular annual, which thrives so generally throughout our country. We know of no plant more easily grown, or which gives better satisfaction. It should be in every flower garden.

Finest Mixed. All colors. 5 cts.

Star. 5 cts.

Large-flowering Sorts—

Alba. Pure white, extra-large. Pkt. 10 cts.

Intense Scarlet. Pkt. 10 cts.

POPPY. A tall plant, bearing very large and brilliantly colored flowers; very pretty as a garden center, or planted in clumps. Hardy annual. Mixed. 5 cts.

Danebrog. Fine single Poppy; flowers bright scarlet, with large white spot on the base of the petals. 5 cts.

Improved Double Mixed. For dazzling richness and varieties of colors, the flowers are unequaled. Simply scatter the seed in the open ground, and a mass of beauty will result, which will amply repay the grower. Pkt. 5 cts., oz. 25 cts.

Ranunculus-flowered. Small. double French. 5c.

Shirley. A new strain of marvelous beauty. The colors range through all shades of delicate rose, pink, carmine and brilliant crimson. Many of the flowers are edged with white. 5 cts.

New Giant White Fringed (Maid-of-the-Mist). A magnificent new, single, peony-flowered white Poppy. The flowers measure from 7 to 9 inches across; the petals are very large, overlapping, daintily incurved, deeply and irregularly fringed. 10 cts.

PORTULACA (Sun Plant). A small trailing plant, bearing pretty delicate flowers. It thrives in a sandy soil, with plenty of light and heat. Hardy annual.

Fine Single Mixed. 5 cts.

Double Mixed. 10 cts.

RICINUS, or CASTOR BEAN. Good for ornament or shade for young plants. Pkt. 5 cts.

SALVIA (Flowering Sage). A favorite greenhouse and bedding plant, bearing long spikes of flowers in great profusion from July to October. Half-hardy perennial, blooming the first year from seed. 3 feet.

Scarlet. 5 cts.

SCABIOSA (Mourning Bride). One of our handsomest summer border plants, producing in great profusion very double flowers in a variety of shades and colors. Hardy annual.

Finest Varieties Mixed. 5 cts.

SCHIZANTHUS. A very free-flowering annual; is quite beautiful in the garden during summer; nice for the house in winter. It requires but little care in cultivation and does well in any soil. Mixed colors. 5 cts.

SILENE (Catchfly). A dwarf plant; very pretty for spring bedding or rockwork. Hardy annual. Mixed. 5 cts.

STOCKS (Gillyflower). Select German Ten-Weeks. Fine mixture. 10 cts.

SWEET PEAS. A few years ago we were afraid to recommend Sweet Peas for Texas, as our experience had shown us that the plant generally died as soon as it began blooming, or oftener before it began to bloom. But now we understand better what, when and where to plant and how to care for them, so that we do not hesitate to offer them to all planters.

In the first place, the strongest and hardiest sorts should be planted, and they should be planted early. February is the month for Texas, though they may be planted as early as December in a sheltered place. And they should be planted deep. Failure is due oftener to shallow planting than any other cause. Dig a trench 6 inches deep, in good soil. Sow the peas in the bottom of this and cover with 2 inches of soil; as the plants grow continue to fill in the trench. When 6 or 8 inches high, furnish support for the vines. They should be watered freely, especially while blooming. The flowers should be picked every day and not allowed to go to seed.

Prices, except where noted, pkt. 5 cts., oz. 10 cts., ¼lb. 25 cts., lb. 75 cts.

Aurora (Burpee's). Both standard and wings beautifully flaked with bright orange-salmon on a creamy white ground.

Blanche Burpee. White.

Black Knight. Almost black.

Blanche Ferry. Bright rose-pink; wings creamy white, tinted with rose.

Captain of the Blues.

Countess of Radnor. Light lavender, with faint purple tinge.

Fashion (Burpee's). The coloring is a soft shade of rose-magenta.

Firefly. A deep, brilliant scarlet.

Golden Gleam. Deep primrose-yellow.

Gorgeous (Burpee's). Salmon orange.

Her Majesty. Soft rose, deep and glowing.

Katherine Tracy. Soft rosy pink, lighter at edges.

Mars. An intense glowing scarlet.

Navy Blue (Burpee's). Deep, glowing violet-purple.

SWEET PEAS, continued

New Countess (Burpee's). A clear light lavender. **Othello.** A deep maroon self-color.

Royal Rose. Deep rosy pink.

Senator. Purplish maroon, heavily striped on a white ground.

Eckford Mixture. This includes many of Eckford choice varieties in all colors. Pkt. 5 cts., oz. 10c.

All Colors Mixed. Only choice varieties in splendid mixture. Pkt. 5 cts., oz. 10c., ¼lb. 20c., lb. 60c.

SUNFLOWER. See *Helianthus*.

SWEET VIOLET, The Czar. Large-flowering, blue. 10 cts.

Blue Sweet Violet. The old-fashioned sort. 5c.

SWEET WILLIAM (*Dianthus barbatus*). Hardy annuals; universally popular, and deservedly so. Fine mixed. 5 cts.

VERBENA. Fine for mounds, vases, etc. Half-hardy perennial. Finest mixed. 10 cts.

White. Extra choice. Pkt. 15 cts., 2 for 25 cts.

Brilliant Scarlet. Pkt. 15 cts., 2 for 25 cts.

VINCA (Madagascar Periwinkle). Splendid house and bedding plants, 18 inches high, with glossy green leaves and circular flowers.

Alba Pura. Clear, pure white; like the above in other respects. 10 cts.

Rosea. Fine rose color. A very fine variety for cutting. 10 cts.

Mixed. Seeds of the above two varieties in mixture. 5 cts.

WALLFLOWER. A plant much esteemed for beds and borders. Very fragrant; handsome flowers in many shades of purple, orange and chocolate. Half-hardy perennial. Finest mixed, double. 5 cts.

ZINNIA elegans. A very showy and popular flower; appropriate for bedding, pot culture and cutting, for which it is well adapted. Half-hardy annual. *Z. elegans* is the earliest bloomer of all. 10 cts.

Our Wild Flower and Children's Garden Seeds

There is a great need for a spot in the garden that the little ones can call their own, where the daintiest, sweetest flowers, easy of culture and of rapid growth, can be grown for their special enjoyment. Nothing appeals so instantly to a young fancy as bright colors and beauty of form, and the influence on the mind, when in its most receptive state, of a constant association with nature and its beauties, will be found to create beneficial impressions lasting a lifetime. Not only is the love of the beautiful and the artistic taste aroused, but there also comes a love of order and an incentive to work with a noble object when the child is given a personal interest in the cultivation of the garden. With a small expense of loving and thoughtful labor, the Children's Garden can be transformed into a delightfully attractive spot, overflowing with charms and fascination in its quaint, exquisite beauty and forming the most instructive of schoolrooms and the happiest of playgrounds. This mixture embraces over 100 sorts of easy-growing flowers most suitable for any bare or unsightly spot in the yard, to sow along fences, on embankments, etc. All the cultivation necessary is some thinning out where the plants are too crowded and to keep the spot clear of weeds. Large pkt. 5 cts.

Winter- and Spring-Blooming Bulbs

In the fall from August to Christmas we keep in stock a good line of bulbs of such kinds as thrive best in Texas. We cannot here give the prices, as we do not know what they will be by fall. Write for prices on **Hyacinths, Roman Hyacinths, Tulips, Narcissi, Crocuses, Chinese Lilies, Calla Lilies, Easter Lilies, Jonquils, etc**

Garden Conveniences

Flower Pots. These are carefully packed in barrels, and delivered to the express or freight office and receipted for; they are then at purchaser's risk.

Hanging Baskets. Well filled with growing plants and vines. \$1 to \$1.25 each.

Bowker's Plant-Food. Full directions go with each package. ¼lb. pkg. 25 cts.; by mail, 30 cts.

The Cyphers Non-Moisture Incubators and Apartment Brooders in Texas

FREE ON BOARD CARS, FORT WORTH, AT FACTORY PRICES

NON-MOISTURE INCUBATORS

The celebrated **Cyphers Non-Moisture Incubators**, of which we are authorized agents, are guaranteed by the manufacturers as follows:

First.—To require no supplied moisture, thus disposing of the "moisture question."

Second.—To be self-ventilating, the air in the egg-chamber remaining sweet and pure.

Third.—To be self-regulating, being equipped with the most sensitive, accurate and durable regulator thus far invented.

Fourth.—To operate with less oil and at less expense than any other make of incubator, and to be as free from offensive odors as an ordinary house lamp.

Fifth.—To be in **all essentials** the simplest and easiest to operate and control, requiring less labor and less attention than any other style or make of incubator.

Sixth.—To produce larger, stronger and healthier chicks and ducklings than any other style or make of incubator.

Seventh.—That where it is run in competition with any incubator of a different make, it shall, in three or more hatches, bring out a larger average percentage of the fertile eggs in good healthy chicks and ducklings than does its competitor.

Eighth.—That each and every **Standard Cyphers Incubator**, sold under registered trade-mark, will do satisfactory work in the hands of the purchaser who will give it a fair trial, or it can be returned to us within 90 days in good repair, less reasonable wear, and the purchase price will be refunded.

We, as agents for the Cyphers Incubators and Brooders, are authorized by the manufacturers to stand back of the foregoing guaranty in every particular, and hereby agree to do so. Under this arrangement all who purchase of us are insured ample protection.

By purchasing Cyphers Incubators and Brooders in car-load lots, we are prepared to sell them delivered free on board cars, Fort Worth, at factory prices, as follows:

No. 0.	60-egg size.....	\$12 00
No. 1.	120-egg size.....	17 00
No. 2.	220-egg size.....	24 00
No. 3.	360-egg size.....	30 00

There is a considerable demand for a low-priced incubator, and while we do not have great faith in other than the very best machines, we believe that we are warranted in offering such a machine as can be purchased by people who wish to attempt artificial incubation, and yet not risk a great amount of money. This machine is

manufactured by the Cyphers Incubator Company, and while it is not as good a machine as their regular incubator, it is a better machine than any other low-priced incubator on the market, and will, under ordinary favorable conditions, hatch a good percentage of the eggs entrusted to it. It is made in two sizes: the 100-egg size, known as the **Farm Economy**, and the 50-egg size, known as the **Boys' Choice**. These machines are both made of kiln-dried lumber, all joints being thoroughly glued together and fastened with cement-coated nails.

The only difference between the **Farm Economy** and the **Boys' Choice** is that of size and the fact that the **Boys' Choice** has only a single wall, while the **Farm Economy** has double walls. Being smaller, the **Boys' Choice** has no nursery, yet is equipped with upper diaphragm and lower diaphragm attached to bottom of egg tray. Both are self-regulating, self-ventilating and non-moisture incubators. We believe them to be better than any other incubators on the market of like capacity and price.

Farm Economy, 100 eggs.....\$10 00

Boys' Choice, 50 eggs.....6 50

CYPHERS APARTMENT BROODERS

Cyphers Brooders, like the Cyphers Incubators, are correct in principle, are durably made out of suitable materials, are fire-proof and guaranteed to be best brooder value on the market, regardless of price. They are fit companions for the Cyphers Patent Diaphragm, Non-Moisture, Self-Ventilating and Self-Regulating Incubators, and with reasonable attention will take proper care of the chicks until they are ready to shift for themselves.

Style B, Indoor Brooder (standard size, 36 inches square) is for indoor use exclusively. It consists of two apartments, one warmer than the other, the chicks being at liberty to go from one temperature to the other, at will.

Next to its incubators, the Cyphers Company especially pride itself on its **Three-Apartment Style A Outdoor Brooder**, which is pronounced by thousands of users to be the **best brooding device invented thus far for either outdoor or indoor use**. This brooder, 36 x 60 inches in size, has three apartments, one under the hover, which averages 90 degrees in temperature, another outside the hover which averages 80 to 85 degrees, and a separate runaway, or "feeding apartment," which averages 70 degrees. It is roofed with tin, is heated by a Cyphers Safety Brooder Stove and will last many years with reasonable care.

Purchasing, as we do, in car-load lots, we are able to sell these brooders, free on board cars at Fort Worth, at factory prices, as follows:

Style A, Outdoor Brooder.....	\$12 00
Style B, Indoor Brooder.....	10 00

APARTMENT BROODER

STORM KING BROODERS

Recognizing the widespread demand for a thoroughly well-made practical brooder that can be sold at a lower price than the Cyphers Standard Style A Brooder, we have made arrangements with the Cyphers Incubator Company for the sale of their Storm King Brooder. This is a combined brooder and colony coop, manufactured in two sizes. The No. 1 has a floor space 24 x 39 inches and is 50-chick capacity; the No. 2 has a floor space 28 x 45 inches, and is 75-chick capacity. Aside from size, these brooders are exactly the same in construction. They are built of first-class $\frac{3}{4}$ -inch pine lumber, well matched and machined, dressed on both sides, and are free from all loose knots. This lumber is all thoroughly kiln-dried before being worked into the brooders, which prevents it from shrinking and opening up joints when exposed to the weather. We know the Storm King Brooder to be an unequaled artificial mother, and one that will safely care for the chicks from the time they are hatched until they are half grown, if need be. The construction of the brooders permits the heating device to be taken out, giving the chicks the entire floor space and making a full capacity cool brooder. When it is time to wean the chicks from the cool brooder and provide them with roosting quarters, the entire floor space of this brooder, together with the lamp slide and other working parts, may be removed and roosts placed on the floor cleats inside the brooder, thus making a well-lighted, well-ventilated colony roosting coop.

While the Storm King Brooder is not for all purposes as serviceable or as satisfactory a brooder as the Cyphers Standard Style A, we believe that it is more satisfactory than any other low-priced brooder on the market.

No. 1, 24 x 39 inches.....\$6 00

No. 2, 28 x 45 inches.....8 00

Thirty-two page circulars free on request. Complete catalogue for 1905, consisting of 212 pages, 8 x 11 inches in size, profusely illustrated, showing hundreds of photographic views of many of America's largest poultry plants, and containing valuable chapters treating of "Profitable Poultry Keeping in all Branches," will be sent, postpaid, on receipt of ten cents (stamps or silver) to cover cost of postage—the book itself is free.

POULTRY SUPPLIES

NAPCREOL. A non-poisonous, fluid disinfectant and deodorant, unexcelled for disinfecting poultry houses and runs, stables, dog kennels, toilet or any place where a good germ- or odor-destroyer is needed. Each gallon makes one hundred gallons of disinfectant. $\frac{1}{2}$ gal. can 85 cts., 1-gal. can \$1.50.

CYPHERS LICE POWDER. Not a lice-driver, but a lice-killer. In offering this powder we present a powder that is more deadly than any other preparation sold for this purpose. It is carefully compounded, and contains no carbolic acid or other chemicals injurious to eggs. A trial package will convince you. 5-oz. pkg. 10 cts., postpaid 15 cts.; 15-oz. box 25 cts., postpaid 40 cts.; 48-oz. box 50 cts., postpaid \$1; 100-oz. pkg. \$1 (can be sent by express only).

CYPHERS LICE PAINT. Is a scientifically compounded liquid preparation for use primarily in killing lice, mites and other parasites on fowls, but which also does an excellent execution on lice and ticks on sheep, hogs, horses and cattle. The vapor which arises from the liquid does the work. It is applied by use of a sprayer on roost and dropping-boards, not on the fowls, and is the easiest applied and most economical preparation to use for destroying lice, mites, ticks and other parasites ever offered. 1-qt. can 35 cts., 1-gal. can \$1.

CYPHERS ROUP CURE. Roup is a contagious catarrhal germ disease. It usually follows neglected, simple colds. Cyphers Roup Cure is positively guaranteed to cure roup in all its forms. It is simply put in the drinking-water and the chicken takes its own medicine. Money refunded if it fails to cure. Small size pkg. (makes 25 gal.) 50 cts., large pkg. \$1.

PERFECT CHICK MARKERS. It makes a good, clear, clean cut, and does not mutilate the web, as do many cheaper punches. 50 cts. each.

IDEAL ALUMINUM LEG BANDS. Are neat, light, strong and durable; easily and quickly put on and guaranteed to stay on. 15 cts. per doz., 30 cts. for 25, 50 cts. for 50, 75 cts. per 100, by mail, postpaid.

GALVANIZED DRINKING FOUNTAINS. One of the most important appliances for use in the poultry-yard is a truly sanitary drinking fountain. These galvanized iron fountains embody every good feature of an up-to-date drinking fountain and are acknowledged to be the best in use. They are light and non-breakable, easily cleaned and keep the water cool. Small size 25 cts., medium 35 cts., large 50 cts.

SANITARY SELF-FEEDING BOXES. This box is manufactured from the best galvanized iron and contains three compartments for foods, shell or grit. Can be hung up against the wall at any height desired, and is a thoroughly first-class article. Practically indestructible and will last a life-time. It is the best self-feeding food-hopper on the market. 60 cts.

X-RAY EGG-TESTER. The X-Ray Egg-Tester is designed for use on an ordinary hand-lamp and fits over any style of burner with a diameter approximating that of the tester. 25 cts., by mail 35 cts.

JUMBO POWDER GUNS. This insect powder gun has been made to meet the demand for a large size gun that can be held in the hand. Made with large opening, so that it may be easily filled with powder. 20 cts., postpaid 25 cts.

CYPHERS INCUBATOR AND BROODER THERMOMETERS. The best incubator or brooder manufactured is worthless unless the thermometer used therein is accurate. Many hatches fail on account of inferior thermometers, and a large number of chicks are lost in brooders owing to defective or worthless thermometers. In Cyphers Incubator Co.'s thermometers nothing but well-seasoned tubes, which have been aged at least two years, is used. Can be used in any make of incubator and brooder. Incubator thermometers, 60 cts. each, \$1.10 for two, postpaid; brooder thermometers, 45c. each, 80c. for two, postpaid; brooder thermometers, mounted on wooden holders, 55 cts. postpaid.

ASPINWALL SPRAYERS. Just the thing for use in exterminating potato bugs, tobacco, tomato and cabbage worms, and all plant insects; also, for killing lice in poultry houses. They are light, strong, compact and well made. We recommend them for applying Cyphers Lice Paint, Napcreol and other liquid insecticides. Tin, 75 cts.

POULTRY SUPPLIES, continued

CYPHERS CHICK FOOD. A complete scientifically compounded food. For young chicks. Cyphers Chick Food is a mixture of eleven different grains and seeds, proportioned so as to meet all the needs of grow-

ing chicks and to fully nourish them. By the term "fully nourish" we mean a great deal. Chick foods, as a rule, contain too much fat-forming and not enough bone-forming elements, and in consequence the chick develops indigestion and diarrhoea (which ultimately means no digestion at all), and quickly starves to death. Or, if partially nourished, leg-weakness develops and the chick drags out a miserable existence. Cyphers Chick Food fills all requirements, as the food is a complete and properly balanced ration, ready for use. In compounding Cyphers Chick Food, the protein (or flesh-and-muscle-forming element) is maintained high, the carbohydrates (or fat and heat-forming elements) are reduced to their proper proportion, and the ash (or mineral elements) is in sufficient amount to supply the needs of the rapidly growing bird. If chicks are to be developed into breeders, no other food is required for the first eight weeks. 50-lb. sealed bag, bearing trade mark, \$2 each; 100-lb. sealed bag, bearing trade mark, \$3.50 each.

FULL-NEST EGG-FOOD. Makes hens lay. Everybody wants eggs when prices are high. You can

get them by using Full-Nest Egg-Food. This article is a standard condition powder for all ages of poultry. Besides being an unexcelled egg-producer, it is a concentrated meat food, possessing tonic properties which promote good health and fine condition. Full-Nest Egg-Food will help your birds through the moult, making the feathers develop normally and induce a high state of perfection in plumage. Hens begin laying sooner after moulting where this egg food is used. Full-Nest Egg-Food contains no injurious drugs or chemicals. It is safe and easy to use. When used according to directions it will prevent bowel trouble and other chicken ailments. 42-oz. pkg. 25 cts.; 25-lb. pail \$2.

POOL'S POULTRY PANACEA. A guaranteed cure for sorehead, roup and cholera. Some seasons sorehead is the most destructive disease among poultry. A few applications of Panacea will cure the very worst case. It will also prevent roup and cholera, by simply using it in the drinking water. Should be kept

on hand by every poultry raiser, even if he has but two or three chickens. 25 cts. per bottle; can go only by express. We would like to have an agent for this in every town or village.

Lee's Lice Killer. 1-qt. can 35 cts., ½ gal. 60 cts., gal. \$1.

Conkey's Roup Cure. 50 cts.

Sunflower Seed. For parrots and poultry. Lb. 10 cts., by mail 20 cts.; by express, 10 lbs. 75 cts.

Canary Seed. Lb. 10 cts., by mail 20 cts.

Hemp Seed. Lb. 10 cts., by mail 20 cts.

Rape Seed. Lb. 10 cts., by mail 20 cts.

Mixed Bird Seed. Lb. 10 cts., by mail 20 cts.; by express, 10 lbs. of the above, 75 cts.

Cyphers Safety Brooder Stove. \$1.25.

Cyphers Fumigating Candles. 15 cts.

Crushed Oyster Shells. 6 lbs. 25 cts., 100 lbs. \$2.

Mica Crystal Grit. 6 lbs. 25 cts., 100 lbs. \$2.

Bone Meal. 4 lbs. 25 cts., 25 lbs. \$1.

Pratt's Poultry Food. Pkg. 25c., 5-lb. pkg. 60c.

Pratt's Animal Regulator. For horses and cattle. small pkg. 25 cts., large pkg. 50 cts.

Pratt's Food. For horses and cows. 12-lb. pkg. 75c.

Myers' Royal Poultry Spice. Small pkg. 10 cts., 2 lbs. 35 cts.

Myers' Royal Horse and Cattle Spice. 2-lb. pkg. 25 cts.

International Stock Food. 1½ lb. 25c., 3½ lb. 50c.

International Poultry Food. 1½ lb. 25c., 3½ lb. 50c.

Lee's Lice Powder. 25 cts.

Lee Egg Maker. 25 cts.

Lee Germozone. 50 cts.

Eyrie Egg Boxes. 15 cts. each.

Eyrie Coops. Small 50 cts., large 75 cts.

Cyphers Egg Stimulant. 25 cts.

Cyphers Incubator Lamps. \$1.25 ea., burners 45c.

Bass' Stock Salt. 10 lbs. 50 cts., 20 lbs. 90 cts., 50 lbs. \$1.50.

SULPHO-TOBACCO SOAP

A WONDERFUL
AND INEXPENSIVE INSECTICIDE.

SURE	KILLS	REVIVES
TO	Sulpho-Tobacco Soap	PLANT
KILL	INSECTS	LIFE

Sulpho-Tobacco Soap is a powerful agent for the destruction of bugs and insects. One or two applications will rid plants of the pests. Animals may be washed with same solution that is used for plants, or a lather may be made and applied with hand or sponge. Full directions with each cake.

Destroys cabbage-, squash- and potato-bugs, currant-worms, lice, green-fly, mealy bug, red spider, etc. Sure death to all plant insects indoors and out-of-doors. Of special value for spraying shrubs, fruit-trees and vines. Produces luxuriant roses if bushes are sprayed liberally before blooming-time.

3-oz. Cake makes 1½ gallons prepared solution. 10 cents. Mailed, postpaid, for 13 cents.

8-oz. Cake makes 4 gallons prepared solution. 20 cents. Mailed, postpaid, for 28 cents.

10-lb. Cake makes 80 gallons prepared solution. By Express, \$3.00.

Free with every order, "The Window Garden," a booklet by Eben E. Rexford, giving valuable information on the cultivation of plants and the extermination of insects.
